

IV— <i>Simple Oxides</i> : Quartz and varieties—Hematite—Magnetite—Limonite—Corundum—Cassiterite—Pyrolusite ..	PAGE 75
V— <i>Carbonates</i> : Calcite—Aragonite—Dolomite—Siderite—Malachite—Azurite	84
VI— <i>Silicates</i> : Mica—Feldspar—Amphibole—Pyroxene—Olivine—Garnet—Tourmaline—Topaz—Serpentine—Talc—Chlorite—Kaolinite—Epidote—Zircon—Scapolite—Beryl—Nepheline—Sodalite	88
VII— <i>Sulphates</i> : Gypsum—Anhydrite—Celestite—Barite	104
VIII— <i>Phosphates</i> : Apatite	108
REVIEW NOTES—List of Common Minerals—Scale of Hardness—Specific Gravity—Crystals—Localities.....	110

PART III

ROCKS AND ROCK STRUCTURES	113
Classification of Rocks	113
A.—IGNEOUS ROCKS	114-118
Volcanic and Plutonic Rocks defined—Dikes and Veins—Names of Igneous Rocks—Table of Igneous Rocks.	
Representative Plutonic Rocks	120
Granite—Syenite—Diorite—Gabbro—Norite—Anorthosite.	
Representative Volcanic Rocks.....	124
Obsidian—Rhyolite—Pumice—Pitchstone—Felsite—Trachyte—Andesite—Basalt—Diabase—Trap—Porphyry.	
B.—AQUEOUS ROCKS.....	128
1. Arenaceous Rocks	131
Sand—Sandstone—Conglomerates—Arkose.	
2. Argillaceous Rocks	132
Clay—Shale—Slate.	
3. Calcareous Rocks.....	135
Limestone—Marl—Chalk.	
Rocks of Organic Origin.....	139
Limestone—Coal Beds—Infusorial Earth or Tripolite—Phosphatic Deposits—Iron Ores.	
Chemically-formed Rocks	140
Common Salt Deposits—Gypsum—Silicious Sinter.
