Cotton Gossip.

Marshall, Spader & Co., King Edward Hotel, at the close of the market:

The cotton market has recently shown some steadiness as a result of moderate receipts and some anxiety on the part of exporters in covering, i.e., part contracts.

Crop news has been mainly good, and weather almost perfect for picking and marketing the crop.

Southern spot markets have been stronger, and foreign markets have shown strength. Trading in the option list has been almost entirely professional, with no evidence of outside speculative interest.

There is lots of vim and "expression" in this season's styles, and you get it all if we make your suit. You get exclusiveness, too.

We can show you any number of different things in cloths that are bound to appeal to you and the suit we make will be made as you want it—not as someone else wants it.

Suits from \$25.00.

Bradstreet's Trade Review.

Montreal trade reports to Bradstreet's say: Wholesale trade has continued quiet in tone during the past week. This, to a certain extent, is reasonable, but some local authorities say it is quieter than it should be at this time of the year.

Toronto reports to Bradstreet's say: The general movement of all lines of trade here continues very satisfactory. While general orders are not unusually heavy, they are good for this time of the year, and the outlook for future trade is as bright as ever.

Winnipeg trade reports say: There has been a better movement to wholesale trade here during the past week. Grain is going to market much more rapidly than it has in previous years, and it is generally showing an unexpectedly high grade.

It also entails a five-acre plot set aside for park purposes, known as Rummymede Park.

The striking piano workers will receive their first strike pay on Saturday morning. One of them writes The World as follows:

At a meeting of the striking piano workers, held in the rooms of the Waverley Club this morning, the article which appeared in The World of Wednesday morning purporting to be the views of a number of merchants of Toronto Junction, was discussed.

It seemed to the men that the merchants of this town know more about the condition of things in the piano trade than the men who are engaged in that industry, and that they (the strikers) do not know what they are out for.

One of the men, who has a family of four boys and four girls, and who is engaged in the grocery, butcher and shoe lines amounts to a total of between \$60 and \$75 per month, and who believes in spending his earnings in his own town, felt that if the merchants placed so little value on the patronage of "robust" men who are out on strike, whom they characterize as "fools," etc., it was pretty near up to those men to transfer their trade to the city stores, who, maybe, might give them the patronage more than the merchants of Toronto Junction.

Wilson did not look good to Twigg, so he gathered him in. Behind in Their Studies.

Because your children are behind in their studies does not of necessity imply that they are stupid. In a large percentage of such cases this seeming stupidity is due to eye-strain, and a pair of properly-fitted glasses would give them an equal chance with their more fortunate schoolmates.
