proposition submitted by the electrical magnates.

Since St. Catharines got its fingers burnt in the fire a couple of years ago, when the source of supply of the St. Catharines waterworks reservoir was handed over without any consideration to Hon. J. M. Gibson and his associates, the ordinary layman has begun to realize that the city on that occasion was the victim of a "touch" and any movement to strengthen the power people in their possession of this section of the earth will not be very popular with those who pay taxes and have some interest in the general welfare of the Garden City.

However, the public realize that there is considerable danger of the aldermen yielding to the blandishments of the clever legal gentlemen in the employ of the power interests. There are certain prominent local statesmen who are known to be out and out Cataract supporters, and it is felt that the interests of the ratepayers are not safe when a question involving the advantage of a powerful band of capitalists comes up.

The chief cause of Constipation and Indigestion is a weakness of the Muscles that contract the Intestines and Bowels. This contraction is what propels

Food onward, and squeezes into it the Digestive Juices formed by the body to digest food naturally. When these Contractile Muscles become weakened from lack of Exercise, or other reasons, Constipation sets in, and will grow more rapidly the more Cathartics are given to
