Designed by Martha Dean.

THREE UP-TO-DATE SHIRTWAIST SLEEVES.

In remodeling the last season's dress some." the sleeves may need attention, and the mars the whole waist, and because of It many a frock has been given away or ripped up for other uses. It is always a good plan to have a sleeve pattern in the house for use whenever the occasion demands. The three sleeves shown here are very simple ones as to construction, but of excellent style and shaping. The first has narrow tucks at the wrist, instead of a cuff-a style much used in the season's waists. The other sleeves show the narrow and deep headaches, backaches, dizziness, lancuffs, both very popular for shirtwaists. inch material are needed for any one pair of sleeves.

3771.—Sizes, small, medium and large.

heart began to bleed—and I was forced According to Prof. William E. Ayrto go on with another part of the porcriticism of the scheme in the London on a little straw in the farthest corner trict consumes about 150,000 horsepower Times, the Johannesburg mining disat an average cost of \$100 a horsepower a year. Niagara sends 24,000 horsepower to Buffalo, where it is sold at about \$125 a horsepower a year, and Buffalo, as we have noted, is distant from Niagara only twenty miles.

Furthermore, in the neighborhood of Johannesburg are abundant supplies of coal, of which an excellent quality can be delivered on the Rand for from \$2 60 to \$2 a ton. Even if the Victoria Falls plant were to be built and a great transmission line constructed, it is not likely that the important mining industries in Johannesburg would be willing to trust the operation of their costly plants to the integrity of a few copper cables extending for over 700 miles Michigan Central through the wilds of a savage country. -Electric Power in Ottawa.

"Sculls" and "skulls" are really one word in origin, and both at various times have been spelled capriciously with a "a" or a "b" Power the digrist with a "c" or a "k." Pepys, the diarist, tells how he went on the Thames, at one time "in a scull," at another in a "skuller." The origin of the word is "skulle," or "sculle," a bowl or a goblet. While the cranium was obviously bowl-like in shape, a distant resemblance to a bowl was also detected in the scooped-out blade of a "scull" as opposed to the flat blade of an oar proper.
