Have your screens made and ready to put up. We shall send a man to take measurements and give estimate free of charge. Samples of metal and wooden frame screens—Main Floor, Furniture Bldg.

SPRING TIME IS HOUSECLEANING TIME

THE OLD WAY

How Do You Welcome It, Mrs. Housewife, With Displeasure or With Joy?

GENERALLY SPEAKING, there are two methods of housecleaning. We call them "the old way" and "the new way."

"The old way" where one's home is turned upside down, in side out and where there's a general mix-up of affairs, lasting for days and sometimes weeks. "The old way," where furniture is moved from one room to another; carpets and rugs lifted, and sometimes torn from the floors and carried to the backyard, where, amid clouds of dust, someone struggles to get the best of the question. Inside the house there's sweeping and

scrubbing, cleaning and washing, scraping and scouring, and all the other hundred and one things that go to make the old housecleaning time a time of turmoil and unpleasant work.

But the housewife today housecleans in the modern, up-to-date fashion. The way that does not take half as long and does not require half as much physical effort as before. With the help and co-operation of science, electricity and other modern improvements, the duties of housecleaning become thoroughly interesting and satisfactory. Here are some of the labor-saving devices:

The Vacuum Cleaner or Suction Cleaner is one of the greatest household helps and should be in every home. It is simply attached to the ordinary electric socket, and used after the style of the carpet sweeper, cleans and extracts dirt and dust from every part of the household furnishings. Special attachments are available, each with a specified duty or use, such as special brushes for carpets and rugs. Another is used for extracting dust from every niche and corner in furniture, for bringing up the sediment from the very depths of Chesterfields, couches, chairs or settees. And still another is employed for cleaning walls, woodwork, pictures, draperies, beds, etc.

The "New-Way" Wash Tub is filled with clothes, the wire attached to the electric socket and left to do the washing—no rubbing, no bending over in steaming hot suds, no backaches—practically no effort whatever.

Special Washing Machines are also shown, that do the work with the aid of the ordinary kitchen water tap, which gives power enough to stir and swish the clothes around, inside the corrugated tub, cleaning them thoroughly without injury.

There are hosts of other labor-saving devices to be seen in the store, too, that are particularly adapted for housecleaning.

And on this page you'll find suggestions of the many modern household helps.

The demonstrations on the Fourth Floor of electric vacuum cleaners and hand-power cleaners, and in the Basement, of electric, water-power and hand-power machines, should all be of special interest to the modern housewife.

THE NEW WAY

An Electric Sweeper to Clean the House Thoroughly and With Ease

THE OHIO COMBINED Electric Suction Cleaner and Carpet Sweeper is a marvellous and ingenious electrical arrangement that saves time, furnishings and labor, and is so simply made that even a child can operate it.

Here are the facts and advantages that contribute to its efficiency for making it a necessity in every modern home. It is light in weight, properly balanced, light-running and easy to understand. It has a high-speed motor that propels the fan at a speed of about 10,000 revolutions per minute, moving an immense volume of air at high velocity. This quickly gathers up the dirt, ravelings, lint, etc., with the assistance of the spiral, belt driven brush.

The dust bag is double, preventing dust from escaping and is quickly and easily emptied. Patented check valve prevents dust dropping back into the fan chamber.

The motor is started and stopped by simply raising and lowering the handle—no danger of shock.

Here are the attachments for making the machine complete and providing for every possible use, both blowing and suction cleaning.

Eight feet of suction re-inforced rubber hose. Nickel-plated tube to connect hose and tools. Attachments for reaching under radiators or cracks, also for blowing.

To attach in place of dust bag on machine for blowing purpose. Main attachment to receive dome with motor installed and fan attached.

Brush for cleaning clothes, cushions, curtains, etc. Nozzle tool for small rugs, curtains, upholstered furniture, etc.

Price complete with all attachments 50.00 See it demonstrated on the Fourth Floor.
