

To Music Teachers ❀

Who desire to study one of the best Kindergarten Music Systems ever invented ❀ ❀

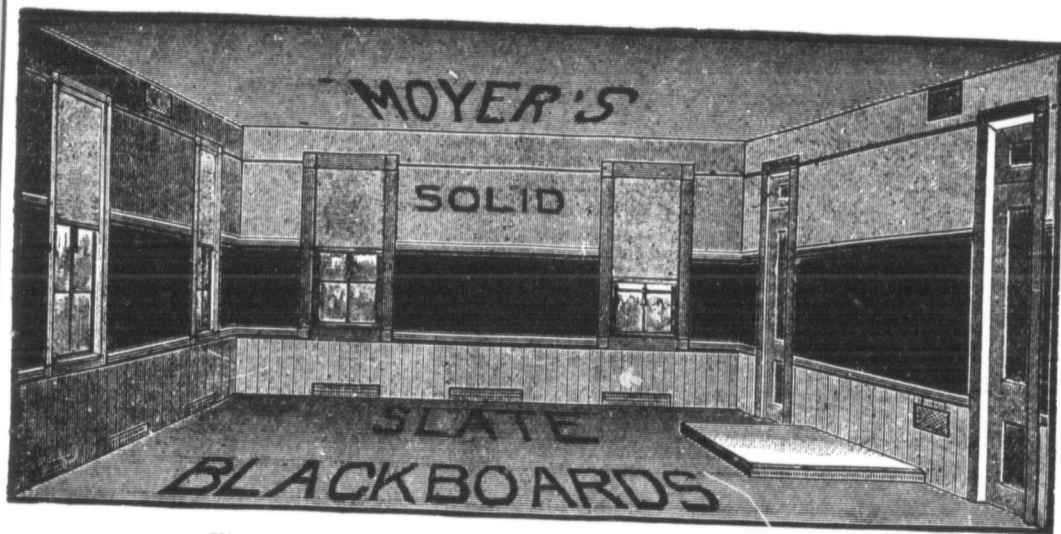

Do you wish to surpass your competitors and accomplish more than by teaching one of the old-time methods—make musicians and not machines—to make music study a positive pleasure

to yourself and pupils instead of the hitherto irksome drudgery? Then study the **Dr. Forfar Kindergarten Music System** which not only accomplishes these things but possesses a decidedly commercial value as well, as profit in music teaching depends upon the number of pupils obtained and the prices commanded. All things being equal the Teacher who does most for her classes is the one who succeeds. It is used with great success in Toronto and Winnipeg, and is endorsed by leading Educationalists, Kindergartners and Musicians. It promises to be one of the greatest boons of the century to those wishing to study or teach music. For particulars for teachers' course address—
