How hard on the poor laborer, with probably a family dependent on him for support, to have to go to jail, leaving the employer entire ly free to make up his fine or get it from someone else.

With the new order of things due to the introduction of the steam engine, when the spinning jenny and hand loom had to disappear, manufacturing was transferred from the country places, until villages became cities. The small manufacturer had to practically disappear, until production corporations and monopolies, and receive nothing in return for the protection given. The average production per laborer, according to census bulletin No. 150, U.S. reports, is \$2,451 per year. The average wage is \$437 per year. Now, if the laborers were completely organized, they would receive nearly the whole of the \$2,451 that they produce and they are surely working that way.

The worker is certainly struggling for improvement, not content any more to work 10 to 16 hours per day in unhealthy places, or wasting his spare time and money in low taverus, drinking, quarreling and bathing himself in an atmosphere of obscene stories and other filthy lan

Note the change of opinion in regard to slavery, war, drink, etc. If such rapid changes in regard to moral conceptions of justice can take place in comparatively a few years, it is possible we may see greater changes in the near future. It would hardly be possible to get an audience to turn their thumbs down to condemn a man to death, such as took place in the arena of a Roman as took place in the arena of a Roman
