

MIRAMICHI ADVANCE CHATHAM NEW BRUNSWICK, MAY 26, 1881.

Miramichi and the North Shore, etc.

REVERED NEW TESTAMENT at the Miramichi Bookstore. THE QUEEN'S BIRTHDAY was generally observed as a holiday here, and flags were displayed in various parts of the town.

BROKEN.—The crank-pin in Messrs. Burchill & Sons' mill broke on Thursday last, and work was stopped for a few days in consequence.

CONFERTORY.—Messrs. Stables and McMillan have established a confectionery store and office across from the new Canada House across Water St., Chatham.

THE GREAT FIRE.—The Sackville Transcript says:—"One house east of Chatham boats of having survived the great Miramichi fire of 1825." There are houses both east and west of Chatham that survived the fire.

THE TUG LADDIE had a slight breakdown on Thursday of last week while moving a vessel by her ballast berth. Capt. Haviland, with the Tug, went to the disabled tug's assistance and towed her to a place of safety where repairs were soon made.

NEW STORE.—Mr. Patrick Noonan of Chatham who has spent some two years in Boston, has returned home and opened a store in the Noonan building, last occupied by his father. His principal lines are ready made clothing and gentlemen's furnishings, groceries.

RECORD.—That wrecked "Pilot," who does the extra boat work for the "Times," made a pretty mess of it in that journal of the 10th. He will have to try again, and several times, before he will be able to make 39 and 49 add up 107.—Summer Journal.

STANDARDS.—One of the worst acts of the present local Government has been announced in the Royal Gazette—a change in the office of Sheriff in Gloucester county. A better Sheriff than Mr. Vail could not be found in the Province and the person appointed in his place is said to be not at all qualified to succeed him. Shame on such a man!

PLANTS AND FLOWERS.—Carmichael Bros. daily expect a choice lot of house and bedding plants, including some of the leading varieties of Roses, Paeonies, Geraniums, Calceolarias, Fuchsias, etc. As they intend to have them every week through the summer, they invite lovers of the stock to call and see them as they will be sold low.

FOGAL.—Mr. Charles Murray, of Campbellton, was recently appointed Postmaster of the L. C. R., to run between Moncton and Campbellton, in the place of the late Mr. Joseph McKenna. The politicians of Gloucester and Northumberland who supposed they were running the machine tried to get the office each for a friend, creating quite a breeze in the attempt, but failed in the end.—St. John Globe.

DR. ST. HELENA OF RELEASE ABANDONED.—Capt. Jas. McDonald of the barque Forest Queen, reports that on Friday the 6th of May, he passed the barque St. Helena of Belfast, bound from Liverpool to Quebec, with coal, which had been abandoned and was then in charge of a crew from the steamer Manuka of Liverpool. The crew of the St. Helena were on board the said steamer. The officer in charge of the St. Helena intended to take her to her destination.

AS USUAL, the fact that Excursion return tickets would be issued on the Intercolonial Railway for Queen's Birthday trips, was announced at the eleventh hour. The slipshod, procrastinating manner in which business is attended to at the Moncton Railway office, indicates that the management is in very inefficient hands. The difficulty seems to be that although the principal officials are very good men for ordinary purposes, they lack the calibre and capacity for the work required of them, and are incapable of appreciating the difference between doing all that is required of them and doing just "enough to get along with."

THREE TRIPS A WEEK are now made by the International Line steamers between St. John and Boston, calling at the intermediate ports of Eastport and Portland. The change from two to three trips per week is made nearly a month earlier than usual this season, showing an increased appreciation by the public of the accommodation offered by this excellent line. After July 1st, five trips a week are to be made. We yet expect to see a daily International Line service between St. John and Boston. Capt. Chisholm is agent of these steamers at St. John, and much of their success is due to his judicious and enterprising policy.

ON, no.—The Advocate published the following in its issue of yesterday:—"Notwithstanding the fact that the policy of the present Government is impeding the progress of the country, it is a country a buoyancy such as was unknown during the Grit regime—new manufactures springing up, commerce reviving, and a more encouraging condition of affairs prevailing generally from Sumner to the Atlantic. Still maintain an open warfare against Protection."

FROM SPAIN to (Gasp) represents the Protectionist idea of Canada. The Miramichi Service goes for nothing, to gether with the west and British Columbia. We saw the expression in an Ontario Conservative paper but did not expect to find it reproduced verbatim in an editorial even by so original a paper as the Advocate.

SHIPPING FRONT.—The summer shipping season being at hand the International S. S. Company are to the fore in offering the necessary facilities to old and new patrons. They enjoy a first class reputation as forwarders of food salmon and easily hold their own against competing railways, which make special combinations in order to overcome the advantages which the water route possesses. The fact that the inevitable jolting of railway cars is avoided and a comparatively cool atmosphere secured between St. John and Boston will always be powerful arguments in favor of the steamers, especially when they so successfully compete with the railways in point of time.

Shippers may obtain the fullest information by addressing Capt. H. W. Chisholm, the obliging agent at St. John.

HOME FROM ABROAD.—Mr. Samuel Press, Land Surveyor of Daoktown, is in the city on his return from Colorado, to which place he went in October last, to look after some property which he held there. Mr. Press first went to the territory in '65, when he invested in real estate, and returned some years afterwards with the intention of holding the property until it should rise in value.—He let it remain for some years unenclosed, and hearing that the Government was about making arrangements for re-locating abandoned mines, he started last fall for the locality to look after his investment. On arriving, he found that he was too late, the property having been

whittled away by silver plated. Mr. Robinson has also on hand, of which he makes two open book covers, the underworks of which are lake color relieved with fine light blue striping, the bodies being black with gold striping. They are trimmed in brown leather, the metal of the arm rails and dash board being silver plated. He has also a single open book, painted and finished in similar style, and to conclude the catalogue, we must mention a three spring, one horse express wagon, the underworks of which are painted vermilion, striped in black and white, the body being brown paneled in black with gold border. Mr. Robinson has also lately completed a light sloop for Mr. R. Bain, and a beer wagon for Mr. Geo. Traser. This latter for style, finish and material would compete very favorably with any similar wagon got up even in St. John, while the difference in cost would be quite an important item. The underworks are painted vermilion with fine black and white striping, and the body, finished with a gold belt, and ornamented with handsome gold lettering on both sides, also on the back of the seat and of the body. We may mention in this connection, the variety of what Mr. Robinson has prepared to turn out from his shop, that he has lately built three new Scotch carts for J. R. Snowball, Esq., and that in addition to any new work, he is also able to execute repairs of every description with promptness.

PERSONAL.—Sir Leonard Tilley, Lady Tilley and members of their party arrived in St. John on Sunday morning, and took rooms at the Royal Hotel. They will remain in St. John this week, leaving on Saturday for St. Andrews.

Mrs. Lipsett, wife of Mr. Andrew Lipsett, Chief Engineer of the Fredericton Fire Department, died shortly after noon on Friday, after a very lengthy and severe illness. She had been confined to bed since Christmas and during the past few weeks suffered most acutely. Mrs. Lipsett was a daughter of Thos. Morris, Esq., of Fredericton and a sister of Major Morris, of Chatham. Mr. Lipsett has the sympathy of a large circle of friends in his sad bereavement.—Sun.

Sir John A. Macdonald and Lady Macdonald left Quebec on Saturday morning by Paris for England. Sir John seemed greatly fatigued and worn. He saw only old friends, and few of them, while in Quebec. He remained in his quarters all day Friday and did not go out.

NEW STEAMERS.—The most diminutive steamer of the Miramichi fleet is a new one completed last week by Mr. Richard Blake, of Chatham, for R. R. Call, Esq., and now being fitted with engine and boiler by the Miramichi Foundry Company. She is a lapstrake, wherry-shaped boat, 16 ft. long, 4 ft. wide and 22 inches deep from the top of keel to top of combings. The keel and gunwales strakes are of birch, the stem and stern of hawthorn and the remainder, excepting the timbers—of pine. The boat is decked flush with the top of gunwales about two feet and a half inward from bow and stern, leaving nearly the whole of the interior open and trimmed around with a combing two inches above the gunwale. The boiler is a diminutive one, having from shell and copper tubes and the engine is correspondingly small. The propeller is 16 inches in diameter. Of course we cannot accompany Mr. Call when the trial trip is made, but we hope it will be a successful one.

CREDIT.—The Hopeful Corner Maple Leaf credited one of our locals to the credit of a part of its editorial to the St. John Sun. We took an extract from the Sun, but were not credited to any paper we supposed it had emanated from. The time seems to have passed when the St. John papers thought it necessary to credit the news which they might obtain from country exchanges. We observe that many of our items are stolen in St. John, while some of them, after being appropriated by other country papers, are credited to the latter, because they may be in accord in either politics or religion with our St. John friends. The Sun and Freeman are, perhaps, the most careless in this respect of all our exchanges. Of course we don't count the News, because it publishes news in all ways,—one of its staff having once deliberately opened a private letter that was given to him and conveyed to another St. John journalist. It is, perhaps, to be regretted that there was never a day of chivalry for St. John reporters or journalists.

READY FOR BUSINESS. A thriving factory, is that of Mr. Jas. Ready, brewer of lager beer and manufacturer of aerated waters, which is located between Church and Wellington Sts. near the Metropolitan Hotel. The establishment, which is a branch of that at Fairville, St. John, is in charge of Mr. Chas. Cassidy, who has for several seasons carried on his business about a mile from Chatham, on the road to Nelson, but this spring he leased the large building formerly occupied as office, coach house and fitted up by Hon. W. M. Kelly, and has constructed an ice house in it, and has about 100 tons of that essential commodity stored away, and has also had erected a ten feet square Box refrigerator, which he purchased from Mr. E. A. Strang. Water is conducted to the establishment through pipes from a spring a quarter of a mile away, and is forced by gravitation sufficiently to keep up the supply during all seasons of the year. The generators, cooler and cylinders used are of copper and equal to any in the country, while the facilities for bottling are of the most modern character. The lager beer is sold by the dozen, and receives the highest commendations and diploma at the Exhibition for the Maritime Provinces held last fall. It is brought to Chatham in ten gallon casks and bottled here. The aerated beverages made, include lemon and orange, and are of the most palatable and refreshing character. The business thrives in warm water and our people look upon Mr. Cassidy's wagon as a moving temperance lecture and, at the same time, a great source of supply to a thirsty public. Mr. Cassidy's beer is sold by the dozen, and receives the highest commendations and diploma at the Exhibition for the Maritime Provinces held last fall.
