The Scott Act in Moncton.

The enforcement of the Scott Act in Moncton seems to be so difficult a thing

that the law was enforced has not been

The St. John Globe's Moncton despatch of Monday last says :fact that for a very short time, in one particular part of the river a few small bass are taken by bag-nets each season. This fact was so cunningly built upon, magnified and distorted as to impress the people of the future must be fought. The people of the future must be fought. The people and time time, in the desirable and their parent. In Canada we have both classes represented—ardent Federationists and equally ardent Independents.

It looks as though the Moncton temperance committee will cease all prosecutions under the Scott Act against Moncton liquid dents.

And on this ground—more dependence—the battle of the future must be fought. The people action who may last says:—

It looks as though the Moncton temperance committee will cease all prosecutions under the Scott Act against Moncton liquid dents.

And on this ground—more dependence—the battle of the indebtedness of the latter, who are to stop all pending suits and take no further committee to pay the indebtedness of the latter, who are to stop all pending suits and take no further committee to pay the indebtedness of the latter, who are to stop all pending suits and take no further committee to pay the indebtedness of the latter parent. In Canada we have both classes represented—ardent Federationists and equally ardent Independent independents.

The above-which is confirmed by a report of the proceedings of the Town Council—indicates that Moncton is having the experience of other places in fact that the traffic goes on in defiance it. The only essential difference between having the Scott Act and the license in operation is that under the ratepayers are obliged to pay in addition to their other taxes, while under the other the dealers would be obliged to bear a large share of the public bur

W. H. Lynch. Danville, P. Q., Nov. 24, 1888. Balloonist Drowned.

COLUMBUS, GA., Nov. 26-B. F. Vandergrift made an ascent in a balloon from the exposition grounds, in the presence of loon reached a height of about 3,000 feet it burst and began falling like a wet rag. The spectators were horror stricken, expecting the daring man to be dashed to the ground and crushed to a jelly, but, with great presence of mind, he cut his parachute loose from the balloon, and shot to the earth with speed of arrow, it seemed to the spectators. Down it These facts indicate, so far as exports some, and might have produced more, of came for 200 or 300 feet, when it began to open and the crowd breathed easier. Ontario being more of a wheat-growing country, has had less of the advantage of tor in a sense not indicated by figures, for milk production rather than being the swift flowing stream. The parachute settled about 300 feet from the west bank A bateau coming up stream with two men attracted the attention of the aere, nant, and he cried: "Save me, save me." The two men went to the rescue of the drowning man as swiftly as possible. Vandergrift caught the edge of the frail craft and attempted to draw himself up, but his efforts partially overturned the hoat, which began filling with water. The two parsmen rushed to the end of the boat, and by some means Vandergrift los his hold, and sank. His body has not yet been recovered. Vandergrift has been in the balloon business twelve years. He made a leap here on Tuesday from an al-
