General Booth's Farewell to America

MADE STIRRING SPECTACLE

SALVATION ARMY IN THOUSANDS PARADED THE STREETS OF NEW YORK-LAST WORDS OF

New York, Nov. 8.-Tonight, at a big open air demonstration, at which steroptican reproductions of various scenes connected with his life work was a novel feature, general Booth, who is to sail tomorrow for Europe, after what will probably be his last American campaign, bade his soldiers in America to show zeal and affection in their work. He preferred an open air meeting rather than an indoor meeting. He made an address in which he said that believed that no place was better fitted for the pulpit for his unique deminstration than out doors, where many of his army triumphs have been won As he stood on the steps of the city hall surrounded by hundreds of uni-formed followers, the glare of dozens of torches strikingly showing his tall, erect figure, but his voice was some-what husky from the strain of his many.

recent public addresses, so that it was necessary to repeat his words through megaphone. Thousands of adherents and friends of the Salvation Army bearing flags and torches formed in a parade in West Fourteenth street, near the national headquarters of the organization, at 8 o'clock, and to the music of four bands narched down through the poorer section of the East Side. Thousands of the residents of that district followed

in line to the city park. When a near approach to order was had, general Boooth addressed the assembly, three megaphones standing be-fore him repeating his words in unleon. He said: "My beloved comrades and friends: We have had an almighty good time. I believe with confidence in your loyalty and perseverance in the war. Be true to your principles ,and your Master, stand by His cross as He stood by you; be true to your commander, she is worth of it; she has the love of my soul. Be true to your general. Prepare to fight to the death for God, for salvation, for the true welfare of the nation; to get people to be good men and women, to be the saviors of your fellow men. Salvation for the your fellow men. Salvation for the president, for the government, for the people, for the police for the United States for poor old England for the world. Win the world for Jesus; fight, the whole of your lives; meet me in heaven. Glory to God in the highest, and on earth, peace, good will to men. "You have nearly killed me but I shall recuperate on the steamer, Friends of everybody, enemies of none. Goodbye: I may never live to come to see you again, I have lots of friends here. God bless them, your wives and yourselves. Hallelujah, all live for the salvation of the world. Fire a volley."

(Chorus of amen). Commander Miss Booth interrupted, be careful father, you are killing your-"be careful lather, you are kning your self," and the general concluded his enigrammatic address with the words, God be with you till we meet again." The hymn of this name was then thrown upon the screen and the crowd sang the words feelingly, after which the Salvationist leader stepped into an automobile and was taken to the steamer St. Louis, on which he will sail

After the meeting, general Booth dictated to the Associated Press the following words to the people of America: Farewell, America; you have given me right generous welcome. On this isit I have seemed to come nearer to the heart of the nation than on any other occasion. Fain would I have stayed longer with you, Indeed, I would have wished that some method might have been invented that I could have been constituted one of your own sons and so taken a practical step towards that fatherhood of the people which must of necessity he the first step to the brotherhood of nations, on which so many hearts are set. But I understand this to be impossible without sacrificing my fatherland, which nothing can prevent: however, my living is a the spirit of that relationship and in that spirit I shall think of you as I go forward on the path to which the beckoning finger of my duty invites me. My visit has been a busy, and I a useful one. It has served, among other things to reveal to me the fact of the improved understanding as the objects and methods of the army, together with the extent of higher appreciation of its value and influence. Many of your leaders in thought, commerce, politics, and religion, have said so in a most emphatic manner at the great gatherings, which I have been privileged to hold. The press, which if any where under the sun is a true exponent of the mind of the nation, has also said

which I have consecrated my life. That program, which contains the highest happiness and the truest welfare in this world, the world to come, not only of every citizen, high or low, but of every member of the human race. With every assurance of my prayers and tolls in all that concerns the righteousness and confidence in the future triumphs, on which the Army is founded, I remain, yours in the bond of faithful friend-

UNSANITARY CONDITIONS

PRESENT STATE OF THE PUBLIC SCHOOL BUILDING.

IS UNPLEASANT BUT IS NOT A MENACE TO HEALTH.

Dr. Arthur, who is not only secretary of the school trustees but also city medical health officer, speaking yester day to a representative of The Daily News of the sanitary condition of the public school and of some of the ru-mors which are rife in this regard, said: "It is perfectly true that the sanitary condition of the school, especsanitary condition of the school, espec-ially with reference to the lavatories, leaves much to be desired. It is also true that the hot air with which the school is heated is sometimes mixed with smoke. But these conditions, al-though unglessant, are not such as to compel a shutting down of the build-ing, nor is it likely that the health of the children will unfer in consecuence. the children will suffer in consequence. What is likely to happen, however, is that which has happened in the past and may happen again this winter, if the weather is severe, and that is the school will have to be closed sometime for a whole day or more because of the inability of properly heating it. Some-times only some of the rooms are af-fected. We have then to keep them shut for an hour or so after the proper time, for the opening of the classes in order to give them time to warm. "The lavatories are being constantly

natched up. Every month there is a bill of repairs varying between \$3 and \$15. For years past the lavatories have been a source of nuisance. Nothing can well be done to remedy this except the building of a new set of lavatories. The floor is a cement one and it is often puddly. In fact it is impossible, with the plumbing arrangements, to have the floor constantly dry. But with a new building in sight it would be foolish to make any change. With the new building proper lavatories will be inling proper lavatories will be installed and there should then be further trouble. It is true that two years ago close upon \$1000 were spent to put the building in a better condi-tion but as far as permanent benefit is concerned the larger part of that money might just as well have been thrown into the lake.

"As to heating arrangements, they ae not good. It is possible, that ander exceptional circumstances. In rare cases, the health of a child might suffer from the smoke which is occasionally present. The condition is more of nuisance than a menace to health. Still, as with a new school in sight, it would not be justifiable to plunge into an expenditure which would mean many hundred dollars to have the heating arrangements brought up to date. With the new school all desirable arrangements will be made but it is not worth while patching up the old building."

WEATHER.

New York, Nov. 8.—The marvellous record established less than a month ago by the giant turbine, Lusitania, when she cut several hours from the passage time across the Atlantic, al-ready has been broken. But the Lusit-ania still remains the Queen of the das, as it was herself that estab-lished the new mark and placed several new records to her credit. These in-clude the best single day's run, 618 knots made on November 5th, an averknots made on November 6th, an aver-age of more than 600 knots for every age of more than 600 knots for every full day, and an average hourly of 24.25 knots for the full 2781 miles. The best previous record for the westward pis-sage across the ocean was by the Lus-itania on her last voyage, when she cov-ered the distance in four days, nineteen hours and fifty-two minutes. The voy-age ended today over the same course, was completed in four days eighteen hours and forty minutes thus dipping one hour and were minutes from the previous low mark. And this was done in the face of bonditions none too favor-able. From the start the weather was stormy and on the jast two days when the big steamer was on the home

Peking, Nov. 8 .- Although th temporary arrangement regarding the trans port of mail which the imperial Chinese ary arrangement regarding the trans-port of mail which the imperial Chinese railroads are operating, pending the proposed Russian, Japanese and Chinese conference, was intended to simplify the complicated postal situation exist-ing in Manchuria, China's re-applica-tion, two days ago, of the coercive or-der forbidding Japanese mail under Japanese regulations on the Newchwang branch line of the Chinese railroads, has aroused the resentment of Japan and has resulted in the postponement of the final question until such time as the Japanese department of communi-cation is disposed to consider the new telegraph and postal regulations as im-posed by Peking. This will probably require months. The telegraph negotiations, which have been going on for a period of fifteen months, have made no headway because Japan declines to admit the basis upon which China is negotiating, namely, that Man-churia is soley on Chinese sol. Winnipeg, Nov. 8 .- The conservative fac winninger, Nov. 5. The conservative fac-tions in Brandon have lost no time in look-ing to the filling of the seat left vacant by the sudden and much regretted death of the hon, W. S. McInnes. A delegation of three men from Brandon, comprising B. W. Walace, T. M. Percival, president B. W. WALACE, T. M. Percival, president of the conservative club of the Wheat sity, and another worker were closted with premier Robtin for a long time this morn-ing and it is understood that there are a number of the leading supporters of the party who would like the go to Mr. Wallace, and that he has a go chance of carrying the constituency. Another party of workers of the conservative cause is advancing the claims of James Argue for the same position. The names of Jos, Bernier and T. W. Taylor are also being discussed for the position, so it can readily be seen that there is a problem seen that there is of before the government in the rearranging

of the slate. Rev. John Ferrier passed through the city today. While in the east Mr. Ferrie was a member of the delegation of minis ters and laymen of the Presbyterian ence to the future of the work of the church and the government among the Indians. The object of the members of the elegation was to increase the general efficiency of the Indian schools, and in order to do this, more money is required. Should the additional money be furnished, the equipment of a number of the scheds will be greatly improved, alt building will be perfect from the standpoint of sains ion, and, the management of some of the institutions will also be bettered. The churches will continue to superintend the working of the institutions as in the past, and will be responsible for any deficits

arising from bad management. The minister expressed full sympathy with the purpose of the delegation and acton will brobably he taken at once to mprove the schools in accordance with the wishes of the representatives of the
