Showing Plow as in Work and Jointer Attached.

La Dow's Patent Float Spring Tooth Harrow.

This machine has been thoroughly tested, and found superior to any other Float Harrow, for the following

Important Reasons:

Its frame will not break, split, wear out, become rickety or load down with wet earth. Its frame is made of flat steel, and the sharp edges of its beam break and shave down sods and clods.

Its teeth will not trail in each other's tracks, in any kind of work.

Its teeth can be instantly set to work at any practical depth.

Its teeth can be instantly raised to clear rubbish.

Its teeth can be instantly raised and held up by the levers above the ground, so that it can be driven on its runners from one field to another.

It is the only Float Spring Tooth Harrow which has these improvements.

Write for circulars descriptive of this and other harrows.

700 Varieties to Select From.

D. B. HARRINGTON, Mason, Michigan.

Mention this paper.) 255-a Catalogue free.

LATEST INVENTION!—THE ROSS KNIFE SHARPENER—Patented May 7th, 1886.

The Best Yet.

Works Perfectly.

This machine was awarded Diplomas at Provincial Exhibition, Guelph; Western Fair, London; and Northern Exhibition, Walkerton, in 1886, and was shown against the Dutton Knife Grinder (the latest invented machine in the States,) and Strath's King Knife Sharpener, and came out victorious, with the above results.

We claim this machine to be the best invented, and we challenge anything to equal it.

Any person can work it. It grinds two sections at a time, or one if required. It will grind the point without the heel, or the heel without the point, or a gap out. It will grind any length of a section from point to heel without any change after you set it for the length of section you want to grind. You can give different lengths of stroke for different lengths of knives. If worked according to directions, we warrant it to give satisfaction every time, or money refunded. Price, only \$8.00 in Ontario or Quebec, freight paid; \$10.00 in other Provinces. See what the November number of the "Farmer's Advocate" of 1886 says about it. Send for circular giving full description of machine. Order early. All orders by mail promptly attended to.

JOHN M. ROSS, Manufacturer & Patentee, BLYTH, ONTARIO.

P. S.—Township and County rights for sale reasonable. 255-c.
