

XXXVIII. And be it further enacted by the authority aforesaid, That every vessel having no passengers or not having more than ten passengers on board, coming from a healthy Port, having no sick persons on board, and not having had any during her passage, shall nevertheless be subject to a Quarantine of observation, of three days only, during which time she shall be aired and cleansed, and the linen and bedding of the Crew and Passengers (if any) shall be aired and washed:—And every vessel having on board more than ten passengers, coming from a healthy port, and on board of which no person shall have been sick (except of sea-sickness) during the passage, shall be subject to a Quarantine of                    days, the Crew and Passengers of such Vessel shall be landed with their linen and bedding, and shall wash and cleanse themselves, and shall wash and air their linen and bedding, and the vessel shall be aired and purified.

XXXIX. And be it further enacted by the authority aforesaid, That on the Report of the Boarding Officer, that there are persons sick on board any vessel, it shall be the duty of the Medical Officer at the Quarantine Station, or of his assistant to go on board such vessel, to cause such sick persons and their baggage to be carried to the Hospital, and then to cause the crew and passengers of such vessel to be landed with their linen and bedding; to isolate all suspected persons and baggage, and to keep them in places apart from the rest, and to order all the persons composing the crew or being passengers on board such vessel to be thoroughly cleansed, and their baggage, linen and bedding to be aired and fumigated; and according to the Report which shall be made by the Medical Officer or his assistant, to the commanding Officer at the Quarantine Station; concerning the nature of the disease which shall have prevailed on board such vessel, the said commanding Officer shall determine the number of days during which such vessel shall remain in Quarantine, and may thereupon order the vessel to be ventilated, cleansed and purified in such manner as may be necessary, and even when need shall be, that the
