is the most valuable improvement in furnace construction in recent years. By means of this patented method we fuse the steel and iron which go to make up the dome and radiator into **ONE SOLID CASTING**. There is no danger of cement falling out, to let the dust, smoke and gas escape into the house. Another feature of the Hecla is that it will burn

**THE DEAN OF AMERICAN DAIRYING ON THE  
DE LAVAL CREAM SEPARATORS.**

Mr. H. B. Gurler is well deserving of the title the dairying public has come to affectionately give him—"The Dean of American Dairying." No man has given more unselfishly of his time and energies to the advancement of practical dairying, and no man's judgment of any feature of modern dairy practice or creamery operation can be more unreservedly accepted by everyone, than that of Mr. Gurler. His opinion is simply the highest attainable.

The De Laval Separator Co., New York:

Gentlemen,—It is now ten years since I made the acquaintance of the "Alpha" De Laval Separator at the Wisconsin Dairy School. I was convinced at that time that it was the leader in the race, and this opinion has been reinforced from year to year as I have had more experience with it. With me the "Alpha" is first and the others "nowhere."

Respectfully yours,  
**H. B. GURLER.**

The Ripley Hardware Co.

Gentlemen:—For three years I have been experimenting with  
different things to keep flies off my cows, but not until I tried  
your Fly Remover and Compressed Air Sprayer was I successful.  
I used this last year and found that it cost less than one cent per  
week per cow. With your Compressed Air Sprayer it takes but  
a few minutes to put it on, and the result has been that my cows  
were free from flies, and during the year gave 6400 pounds of  
milk each, which made 334 pounds of butter per cow. I can heart-  
ily recommend it to all stock owners.—**JOHN ARMSTRONG,**
