Frost Wire Fence is Cattle-Proof

Frost Wire Fence is high carbon steel, coiled spring wire, tested to 2,000 pounds tensile strength. Each separate strand of wire can support 2,000 pounds weight. There are mighty few horses and cattle that weigh 2,000 pounds. "Frost" UPRIGHT WIRES are heavy. Each one supports its own share of the strain. This prevents sagging in the middle. Uprights are immovably locked to the running wires by the

Frost Lock

It does away with bends and bows, crimps and kinks, soft tie wires and weak spots, and preserves the whole strength of the fence. Galvanized by electricity so the lock can't rust. FROST WIRE FENCES stand weight, strain and climate—as strong ten years after as the first day they are put up.

Write for catalogue, which tells all about the Frost Fence and Frost Lock. It's free.

Sharple's Tubular Separators

Tubulars Find Gold In Milk

Good butter is worth 20 to 30 cents a pound. Butter is worth only one cent a pound as stock food, yet farmers using gravity skimmers—pans and cans that leave half the cream in the milk—feed that half the cream to stock, then wonder why dairying don't pay. Can't find gold without digging. Can't make dairying pay big profits without getting all the cream.

TUBULARS

Dig Right Down

to the paying level—squeeze the last drop of cream out of milk—make dairying pay. Tubulars are the only modern separators. The picture shows them. Write for catalogue G-193.
