

# QUESTIONS AND ANSWERS. Miscellaneous.

## PLANTS FOR IDENTIFICATION.

Kindly tell me the names of the plants submitted.  
H. A. B.

Frontenac Co., Ont.

Ans.—The plant with leaves in a bunch at the surface of the ground, having a considerable stem, and yellow flowers, is a hawkweed. Wish you would send in three or four more of them, that we might determine just which one it is. The other small, bushy plant, is the silver potentilla.

## RIGHT TO A HORSE.

I gave my son a colt seven years ago; he paid for service only. I have kept same horse at my own expense for a little light work. Now, in my busy time, has his wife any legal right to come and take horse from my pasture and keep it away without my permission. Please state have I any claim on said horse, as he has never paid for its keep for seven years.  
SUBSCRIBER.

Ans.—We think that your son, as the owner of the horse in question, is entitled to do with him as he pleases; you might have a claim against him for pasturage and care of the horse during the time you have kept him, against which would, of course, be set off the value of the horse's services during that time.

## BLUE OINTMENT ON TURKEYS.

When about ten days old, I put a small portion of blue ointment on turkeys to prevent them getting lice. Within a day my flock was reduced from 14 to 6. Would the ointment cause their death?  
A RECENT SUBSCRIBER.

Ans.—We are of the opinion that there was too much of the ointment used. It is a poison, and a portion of the size of an ordinary pea is sufficient for a hen, and doubtless the quantity used was too much for the turkeys. Poisons will act on the systems of chickens when applied externally, and evidently you poisoned your turkeys by an over-application of this ointment. Any louse powder would be the best thing to use for lice on turkeys and thus avoid an over-application of ointment.

## INVERSION OF OVIDUCT.

I have several hens that have something the matter; the intestines seem to protrude and bleed, and they pick at it; they have oats, bran and plenty of milk to eat. Could you tell me what to do? They are in a closed-in run.  
F. R.

Nipissing Co., Ont.

Ans.—From the description given, we would say that the hens are suffering from inversion of the oviduct. This trouble seems to be more prevalent in the Mediterranean breeds than in the American breeds. There is no cure for it. As a rule, it is more common where hens are forced for egg-production than in the ordinary flock. We cannot suggest any remedy outside of changing the feed and feeding a ration which is not so highly nutritive as you have been giving.  
M. C. H.

## THIN HORSE.

I have a mare six years old in fairly good spirits, but in poor condition. Her teeth were bad, but have had them attended to. Am anxious to have her in good condition. She works on a farm.

1. What would you advise me to feed to build her up?

2. Is it advisable to feed oats that have a little barley in them?

A BEGINNER.

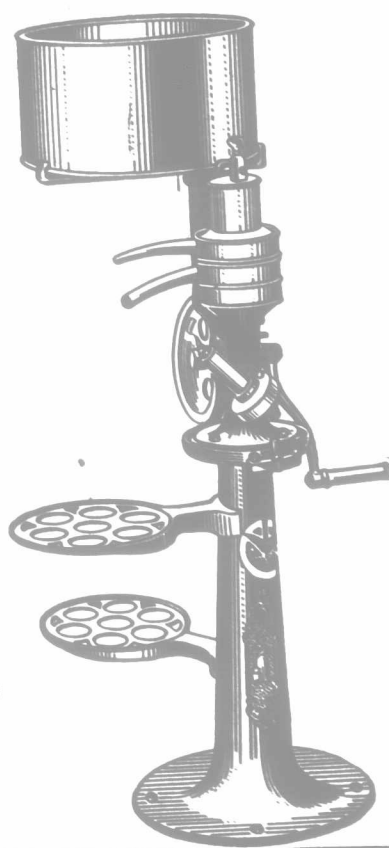

Leeds Co., Ont.

Ans.—1. Take 6 ounces each, sulphate of iron, gentian, nux vomica, ginger and bicarbonate of soda; mix and make into 48 powders. Give her a purgative of 8 drams aloes and 2 drams ginger. Feed bran only until purgation commences. After the bowels regain their normal condition, give a powder every night and morning. Feed moderate amounts of hay.

2. Yes.

## The CAPITAL Is the Cream Separator that will "Buy Itself" For You.

As soon as you have read this advertisement, sit down and write a post card for The Capital book—the book that not only tells the story of the easy-running, cream-saving separator, but that tells how you can put The Capital in your own dairy practically without costing you a cent.

The book also tells all about the wonderful Capital gears, about their perfect meshing and non-wearing qualities—how they run in oil—how an automatic clutch stops them running the minute you let go of the handle—and about how they give the light, three-and-a-half-pound bowl 7,000 revolutions a minute.

It tells how and why The Capital skims closer—why The Capital wastes less than one-fifth the cream that other separators waste—and then explains how the machine can be made sweet and clean in two minutes after you are through using it.

This book is full of hard-and-fast facts—separator facts—which every dairyman owes it to himself to know; facts which will prove a revelation to the dairyman who is not familiar with The Capital.

Write for the book to-day—NOW.
