STAMMERERS

The methods employed at the Arnott Institute are the only logical methods for the cure of stammering. They treat the CAUSE, not merely the habit, and insure NATURAL Speech. If you have the slightest impediment in your speech don't hesitate to write us. I cure pupils everywhere. Pamphlet, particulars and references sent on request.

The Arnott Institute, - Berlin, Ont., Can.

"I guarantee that this play will not bring a blush to anybody's cheek," said the able author.
"Why produce it, then?" replied the New York man. "Don't you know that many of our patrons come to the box office and want their money back if they haven't blushed?"

GOSSIP.

S. J. McKNIGHT'S SHORTHORN SALE

Several of the Shorthorns to be sold at S. J. McKnight's sale at Epping, Ont., on Thursday, March 9th, are daughters and granddaughters of Imp, Eliza 2nd, a Duchess, by Master Ravenswood. Two pairs of heifer twins that will be sold, are daughters of the grand, big, thick cow, Crimson Mayflower, a Crimson Flower; others are granddaughters of Imp, Charming Gem. All the offering are sons and daughters of either Imp, Governor-General (a Lustre), Imp, Nonpareil Fame (a C. Nonpareil), or Imp, Count Claret (a Claret), a son of the Augusta bull, Prince Augusta. Count Claret is the present stock bull, and all the females bred are in calf to him. Mr. McKnight is overstocked; this offering is the selection of his large herd; all will positively be sold; they are an exceptionally choice lot, particularly nice on their lines; they are in nice condition; they were winners all around the circuit of local shows, in big and strong classes; the young bulls are thick, mellow youngsters. Anyone looking for richly-bred and mellow, thick-fleshed Shorthorns, should visit this sale. Morning trains from Toronto will be met at both stations.

SOME GRAND CLYDESDALES LEFT.

With a continually-expanding trade in Clydesdale stallions and fillies, Smith & Richardson, of Columbus, Ont., were compelled to make a second importation near the end of 1910, the two importations making a big total, and, although they never sold so many stallions and fillies so early in the year, their big selection still leaves a few for late buyers, who, as a general rule, are hardest to suit. Some of their best of the two importations are still on hand, horses up to a ton in weight, typical in character, flashy in quality, with breeding the very best, among which are such good ones as the big bay four-year-old, Helsington Glory, a son of the renowned Glasgow champion, Gold Mine; the exceptionally good bay three-year-old, Invergowrie, by the famous prizewinner, Marmion; the intensely flashy bay-roan three-year-old, Glenavon, a son of the noted sire of winners, Baron Boquhan; the immensely big and model - underpinned Baron Crawford, a bay, rising three, by the great breeding horse, Blacon Sensation. All these are toppers. Then there are some splendid two-year-olds, and several crackers in Canadian-bred stallions. In fillies, there are several left from the extra big, typical draft kind to the intensely-flashy quality kind, with not so much weight. Parties looking for the best of the breed in imported or home-bred stallions or fillies, should certainly visit this noted stud.

C. H. SHAVER'S CLYDESDALE AND HOLSTEIN SALE.

In last week's issue appeared a short description of the horse end of the Clydesdale and Holstein sale of C. H. Shaver, near Davisville, Ont., a short distance north of the C. P. R. crossing, on Yonge street. This week, the Holsteins will be given a brief description. All told, there are seventeen head, fifteen females and two young bulls. Nearly all the younger things are the get of that most richly-bred and well-known bull, Cornelius Posch. The majority of the females belong to the well-known, high-producing, and show strain, the Faforits. Fairest Jewell, never officially tested, gives 70 lbs. a day on ordinary feed; Sherwood Edna's Faforit, sired by the R.-of-M. bull, Faforit 5th's Gamey, is in the R. of P. with 12,605 lbs. milk and 420 lbs. butter for the year. Faforit Butter Girl is in the R. of P. with 13,000 lbs. milk; she is a half-sister to Sherwood Gano, with 17,600 lbs. milk for the year. Kitty Westwood, R. of M., with 461 lbs. milk and 14.81 lbs. butter in seven days, and 68 lbs. milk 1 day, and so on. Parties looking for high-class Holsteins will not be disappointed in visiting this sale. There are several one- and two-year-old heifers that look good in type for great things when in milk. The young bulls are three and twelve months of age. The herd as a whole has splendid official backing, and cannot fail to be profitable buying. Conveyances will be at Davisville P. O. at 11 a. m. to carry visitors to the farm on day of sale. Lunch will be provided. March 9th is the date. Everything will be in good condition, and will positively be sold. Note the date, March 9.

GUNNS

"Prairie State" Incubators

Get the Most Chix

because they come closer than any other incubator to matching Nature's own conditions. The hen sitting on the ground is still, on a small scale, the most successful hatcher. But she **can't hatch** 20 or 30 dozen eggs at a time, and she **won't hatch** them at the right season to make winter layers or cockerels that are ready for market at off seasons, when prices are highest.

The most successful Canadian poultry raisers therefore use the "Prairie State" Incubator because it practically equals, on a great big scale, the hen's success with her little setting.

Gunns Prairie State Incubators are built not so much to sell, as to hatch chicks. Note that. We are making incubators and marketing them at rock-bottom prices simply because they will help in our campaign for "More and better eggs and poultry"—not because we want to make profits out of incubators.

Gunns Prairie State Incubators are **honestly made** in our own factory at Ste. Therese, P.Q.—the finest wood-working factory in the Dominion. No poor material or flimsy construction is tolerated, for we have a reputation for 40 years of square dealing at stake.

They are designed so that the **heat is distributed evenly** to every egg in the tray. There are no cold or hot spots.

The **correct temperature is maintained**, within a fraction of a degree, whether the temperature outside the incubator be zero or 80 degrees.

The moistened sand tray gives an absolutely **even and easily regulated supply of moisture** to every egg. This prevents drying up the eggs, and brings out big, strong, healthy chicks.

An even **supply of fresh air**, free from lamp fumes, is provided, greatly increasing both the hatch and the vitality of the chicks.

Thus Gunns Prairie State Incubator supplies so perfectly the conditions of natural hatching that it not only brings out a very high proportion of chicks, but **the chicks live.** When

GUNNS UNIVERSAL HOVERS

are used for brooding, results are even better than those secured by natural methods. These Hovers enable you to raise chicks successfully at any season and in any numbers. Gunns Combination Colony House Brooders make the most convenient, practical equipment known.

Write for our book on Practical Poultry Raising. It tells all about the "Prairie State" line, and how to raise poultry for profit by common sense methods that have proved successful. Meantime, note these prices:

GUNNS
Prairie State Incubator
No. 0.—100 hen eggs—\$18.00
No. 1.—150 " " — 22.50
No. 2.—240 " " — 32.00
No. 3.—390 " " — 38.00

GUNNS
Universal Hover
With lamp, lamp case and smoke conductor \$7.00
