The state of the native population, too. though upon the whole affording abundant evithe Gospel, in many places, is such as to afford the Missionaries cause of much anxiety. The excitement of novelty once connected with Christian truths and ordinances has passed away and with it all such interest in them as does not spring from religious feeling and principles .-Far from affording an argument against Missionary labours, the present state of things presents a reason for strengthening and multiplying ration. From the Waima Report an extract may be given in a few words, but of great significance: Popery in every part of this Circuit has ceased to exist among the natives, even as a profession. All are now accessible and, in some degree, under the influence of our teaching." From Wellington the Committee have received advices up to December last. There is an increasing Congregation at the Hutt. A new chapel is in course of crection, and the Society is prospering, having the advantage of several Local Preachers or Leaders, who are much needed at Wellington Many of the New Zealanders have acquired considerable property, (horses, cattle, drays, implements of husbandry, &c.,) showing a steady advancement in the civilization which naturally follows Christianity. The most casual observer cannot fail to mark the improved tone of moral feeling among them in the last few years. A

during the last year exhibits some sorrowful cir cumstances. Of the seven European Missionaries stationed there, three have been compelled to leave by failure of health-Messrs, Miller, M. Wilson, and Peter Turner. The first not being likely to be able to resume his Missionary labors has returned to Sydney, and retires from the work altogether. Mr. Turner has honourably completed a period of nearly twenty-five years' active service, and takes his place on the Supernumerary List. Mr. Wilson may, it is hoped recruit himself for further service. The evil effects of the late war have not been exhausted at its close, but have been painfully manifested in the impaired tone of the piety of many, the unsettledness of others, and the drifting away from the Church of those who had more of the form than the power of godliness. Diminution of numbers and local finances are the natural results of such a state of things. In the midst of these afflictions, however, there is ample cause for gratitude and rejoicing. The report from Tonga refers in pleasing terms to the benefits already realised since the restoration of peace. The Report of Schools states that nine additional schools have been established in Tonga since the close of the war. From the Training Institution seventeen students who had completed their dents have been admitted. From the Haabat Circuit we are informed that the teachers so rekeived from Tonga have given a great impulse to the work of education. Schools and premises suitable for the training system have been built, tion to that arising from the transfer of those at sonal piety, and platform ability were of great been, on account of the continual removward. ported by the scholars without expense to the Mission. The Committee observe with eatisfaction that the subject of local contributions in furtherance of the cause receives some attention. Thus from the Haabai Circuit it is reported that several tons of oil and yams have been brought. From another Circuit the members given a ton and a half of oil as a thank-offering for the favourable termination of the war, and thy of the friends of Missions. £2 18s. in cash. A small increase of members is reported from Cradock; with other cheering and hopeful circumstances After a long residence at Morley, Mr. Garner has removed to D'Urban and Fort Peddic, where he has found great cause of thankfulness in the prosperity of the work, upwards of fifty persons having been baptized the last year. The Burgher's Dorp Station, commenced little more

than a year since, promises well. In British Kaffraria, Mount Coke has realised o a great extent the advantages which were anicipated from the restoration of peace. A large and commodious building has been erected for the use of the Watson Institution, which has continued in operation through the year; and the former institution premises will be henceforth occupied by the Printing Press, which is to be removed from King William's Town. At King Wil site for a chapel and a Minister's house of Christliam's Town there is no decrease in the Society church is secured, and the subscriptions having and honeful siens of a better future present them reached £100, the work will probably soon selves.
