NEGLECTED OPPORTUNITY

In a letter from Belleville which we are publishing in this issue, comes an other reminder of the big opportunit which lies here for the market gardener. The suggestion made this time is for a cannery here, principally for the purpose of putting up green peas, corn and tomatoes, and the writer backs up his opinion with the explanation that he is a canner of long experience, and was

STREET CORNERS

JUNIUS JUNIOR

The quiet and natural beauty of midight last Saturday was disturbed by the uproar of a group of young lads in the vicinity of Thirteenth St. Each and every one of them should have been at home and in bed at that time; all of them should have been under due parental control. and it is not too much to say that their parents were culpably negligent in this

No young person of either sex has any right as a citizen to be on the streets in a lesultory way some hours after darkness has closed in. Those who have cut their wisdom teeth are aware of this, even though they themselves have run wild.

It is true that ignorance and indifference, and a want of that strange element which we call social standing, allow the poorer class a greater freedom owing to ack of the conventionalities of life, but even poverty which comes from a hand to nouth existence can, and does, go hand in hand with beautiful virtue and whole

The bunch seen here often running around the streets at night, is not of the poor hard-working class; their mothers are not usually of the kind who go out doing housework by the day. Whose fault is it that lads and lassies are on the streets when even the authorities who conider the good government and management of the town, realize that these youngsters should be in the safety of their parents' homes?

The "teens" is not an age when wisdom perhaps is expected, and the inexperience of youth must exist, or else it would not be youth. If the proper authorities do do not teach and control, they are worse than useless, and it is a grave question f others should not step in and take a share of the matter.

Who are the ones who neglect the young olks and let them run into moral deterioration, and perhaps physical harm? Are they the poor laborers and the casual workers who struggle so keenly to provide the necessaries of life, and clothe their offspring properly? Not usually: they are often persons who aim at being called "society people". At least they live in decent houses, have good clothes and full meals.
