Cannot Pick the Winner.

TORONTO, July 7.—In response to the request of the Canadian Press, an interview of the participants of the Shamrock IV, in the approaching America's Cup contest, was had with the well known Canadian yachtsman, who has been part in the trial, has been good enough to prepare the following:

"The Shamrock IV, the challenger, and the Resolute are so different in type as it is possible to be imagined. Yachtsmen will be interested to know that the conditions for the race for the America's Cup are not similar to the racing rules in which other American yachts take part. Yachtsmen will understand when I say that in this race, classification is governed by water-line length whereas time allowance is governed by rating, whereas in the racing rules for all clubs in Canada and the United States, classification and time allowance is given for rating.

Heretofore, Americans have always out-built their opponents, and prepared to pay in time allowance for their excess rating, and experience has shown that it paid, in this case, Mr. Charles Nicholson, designer of the Shamrock IV, out-built them and prepared to pay for his excess power and sail area.

In the matter of lightness of construction, the Shamrock has an advantage of probably ten or twelve per cent, thus lowering her centre of gravity and giving her greater ability to carry sail (which she has taken advantage of) and as her sailing qualities are very much longer, she could be much faster through the water.

The whole question is—will her stand up to her enormous power? The difficulty that the Resolute has been experiencing has been weakness of hull, necessitating constant repairs and re-riveting. She is of wood, while the Shamrock is of metal, having very few structural frames, the strength being found by very light longitudinal frames, and sheer planking is really, what one might call criss-crossed and running fore and aft. Decks are but five-eighths of an inch thick, being five-ply of one eighth inch each. Most of her hulls are built on what is known as the McGruer patent, which is a practically light one-eighth inch sheering on top of moulds, one on top of the other, until the ultimate thickness and strength is attained. They are not much lighter than the usual method of hollow hulls, but they are infinitely stronger as you get grains of wood from

umber of altogether different trees. The top-mast that has been so much discussed was really a telescopic club top-sail-yard, which passed into the hollow top mast and did away with the weight of the doublings of a yard. A man was sent aloft to enter the luff of the sail onto the jackstay along the after side of the spars. The head had no hallyard but had a wire stop which went over the shoulder of the top-mast. The whole spar was then hoisted from the deck and fitted like an ordinary top-mast. The luff of the sails was kept tight by heavy downward pressure of the tack purchase. This top sail yard, having no doublings, was kept in position by rigging and had a separate forestay and backstay, and shrouds, the latter being led out to the main spreaders and thence to the deck. These shrouds were so long—nearly 175—that it was found that wire of sufficient strength for the strain was too elastic, owing to their great length and could not be kept tight. To put wire of sufficient size not to stretch would have added too much weight.

"Undoubtedly the top-mast and rig would have worked if there was sufficient time left before the race to properly rig it and try it out, but as the yachts are to be measured on Wednesday and raced next Thursday, it was found more prudent to go back to the top-mast that she had in England with the same top-sail spars set in the ordinary way.

"Some idea of the speed of these modern craft can be gained when I tell you that the Victoria, Sir Thomas Lipton's steam yacht, was logging ten and one-half knots an hour and she could not keep up to the Shamrock when sailing close by the wind. The great gain in speed has been made in windward work as in one of the trial races with the 22-meter Shamrock, the challenger sailed down the wind from Ambrose Channel Lightship ten and one-half knots to Whistling Buoy IV, off Far Rockaway.

"It took only six seconds longer to beat back, over the time taken to run down the ten and one-half knots—this is a fairly good breeze."

A MODERN INDUSTRY.
(From an Exchange.)
A motorist touring in a western state got stalled in a tenacious mud-hole. While making a vain attempt to escape, a boy appeared with a team of horses.

"Haul you out, mister?"
"How much do you want?"
"Three dollars."

After a long and fruitless argument the motorist was pulled to dry land. After handing over the money the motorist said:
"Do you haul many cars out in a day?"
"I have pulled out twelve to-day."
"Do you work nights, too?"
"Yes, at night I haul water for the mudholes."

SAY "DIAMOND DYES"
Don't streak or ruin your material in a poor dye. Insist on "Diamond Dyes." Easy directions in package.

"FREEZONE"
Lift Off Corns! No Pain!

Doesn't hurt a bit! Drop a little Freezone on an itching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.

**It Did Her Son
A World of Good,
Says Mrs. Brown**

Can Do As Much Work In A Week As He Could In A Month Before Taking Tanlac.

"Tanlac has been such a wonderful blessing to my boy Arthur, that I can't help talking about it to everybody I meet," said Mrs. Elizabeth Brown, of Blaketown, Trinity Bay, when on a visit to St. John's, N.F., recently. Arthur McKinley Brown, her son, is owner of the Fish Barrel Factory, at Blaketown.

"Even as a child my son was delicate, and never took an active part in play like other children, and he has always been too weak to do very much hard work. His food never seemed to do him any good and he was fearfully thin. If he attempted any hard work his strength would give out completely and he had to take it easy and rest a great deal of the time. We never could find anything to do him any good and it looked as though he would be delicate all his life.

"It was by the statements in the papers from people who had been helped by Tanlac that we first heard about it, and that's why I'm glad to give this statement in the hopes that it may do good to others. Thinking it might help Arthur we sent for a bottle, and I want to say that it certainly has done him a world of good. He started to improve right away and by the time he had finished the second bottle he was a different as day is from night. His food did him good, he always later too weak to do very much hard work. He can now do a good day's work without tiring, and can turn out more barrels in a week than he used to in a month. He just looks like a different boy and I tell him that he doesn't need any more medicine. But he wants to make sure that his good health will stay with him and so is going to keep on with Tanlac for a while. The last thing he said to me before I left home was 'Mother, don't forget to bring back my Tanlac.' Our school teacher, who lives next door, has also been taking it with fine results and I am taking some back for her too. Tanlac has proved to everybody in Blaketown what a splendid medicine it is, and I think everybody ought to know about it."

Tanlac is sold in St. John's by M. Connors; by Reg. Sullivan, Pouch Cove; Sound Island Store, Sound Island; Dennis Flynn, Avondale; J. J. O'Brien, Cape Broyle; J. W. Smith, Baine Harbor; W. A. Burdock, Belleoram; John Morey, Fermanuse; Mrs. Joe. Quinn, Renew.—adv.

Consider the Editor.

Considered by the public at large, the newspaper editor is a benefactor and a bloomin' nuisance. A benefactor in that he freely (though perhaps reluctantly) and again; his private conceptions of what constitutes charitable assistance, inserts notices of benefits, bazaars, movie dancing lessons, colt shows, movie features, stock sales and separate maintenance absolutely free of charge, gratuitously, without remuneration. A nuisance because he eternally and everlastingly intrudes the point of his professional proboscis in other people's private affairs and makes them matters of public importance.

One of the fundamental prerequisites of the editor's job is that he be exhaustively familiar with every avenue and rural bypath of human learning. This position he must maintain despite his family connections and grammatical waywardness. Yet, if the poor dub fails, through the physical impossibility of discovering the well concealed secret to electricity that Adam Minchouiser shelled corn last Saturday, he is heralded near and far as an ignorant boob who ought to be cleaning streets—or practicing law.

An editor is not always ruthless and rabid as one might judge from the shape of his head. Don't judge for a minute that he does his limit in purging the community of crime and its citizens of sin. Why, say, if he'd publish just a suggestion of some of the stuff he has on you, your safest retreat would be "somewhere in Mexico." But he doesn't, and he won't. When you get to worrying it to him so hard that he decides to show you up, his wife locks him in the secrecy of her chamber and once more pleads with him to spike his spleen and pocket his pen, reminding him that your wife is suffering enough as it is. And so once more he refrains.—Prowers County News.

SLAUGHTER SALE

OF
Women's White Canvas and Kid Boots.

FOR CASH ONLY

\$2.50

\$2.50

\$2.50

1257 Pairs White Canvas and Kid Boots

CLEARING AT
\$2.50 the pair

We have reduced the price of every pair of Women's White Boots in our two stores down to

\$2.50 the pair.

No reservations, every pair must go irrespective of cost. Here you will find

Parker & Monroe, Ltd.

Origin of Tonic Sol-fa.

What is the origin of these syllables:—Do, Re, Mi, Fa, Sol, La, and Si, as names for the seven notes of the scale. The tale which one meets in histories of music goes back to Guido d'Arezzo or Guido Aretinus, a Benedictine monk of Pomposa, not far from Ferrara and Ravenna. His period was in the first half of the 11th century, and a great many inventions and improvements were ascribed to him. As a monk of the Pomposa monastery, compelled by the imperfection of the existing teaching of music, he was credited with the production of a method which, according to him, gave immediate results in singing which formerly could scarcely be attained in ten years. The practical merit of this method awakened the jealousy of the Abbot and his brother monks, so that he had to leave the cloister. He was called by the Pope of

JOYFUL EATING

Unless your food is digested without the aftermath of painful acidity, the joy is taken out of both eating and living.

KI-MOIDS

are wonderful in their help to the stomach troubled with over-acidity. Pleasant to take—relief prompt and definite.

C. B. B. S. Band

Excursion.

The S.S. Mary, Capt. Bourn, left here at 8:30 a.m. Wednesday and arrived at Bell Island at 11 a.m., with the C.B.B.S. Band and party. Only a small number took advantage of the excursion, about 30 or so, but all voted it a most enjoyable one. A garden party was held by the Ladies of the Methodist Church and tea, etc., were served at the Star of the Sea Hall. Football fives were played between the Cadets and a Harbor Grace team, resulting in a draw, both teams having two goals to their credit. In the evening a most enjoyable dance was held by the Band in the Star of the Sea Hall, which was kept up until 3 a.m. Messrs. Garland and Forsey providing the music. The party returned by the Mary, leaving at 4:30 a.m., and arrived here at 7 a.m.

The Band of the Conception Bay British Society is our only band, and it is ever ready and willing to give its services at all public functions, Wednesday being such a fine day and a whole holiday, the smallness of the number shows a lack of appreciation on the part of the townspeople.

An excursion to Harbor Grace in August is being arranged by the Bell Island people. A series of sports will be part of the programme for the day, and it might be timely to ask our Park Committee to have the park put in first class order by that time, as at the present it is not in good condition for any kind of sport.—Hr. Grace Standard, July 8.
