Mayor Wenige Outlines His Civic Policies For 1924

## **NEXT YEAR MAY BREAK RECORD IN SETTLERS**

Huge Advertising Campaign For Canada Will Then Bear Fruit, Says John Farrell.

CAMPAIGN TIMELY

Opinion Still Prevails in Rural England That Canada Is Land of Winter.

Immigration to Canada in 1924 will be double that of any past year if plans of the provincial and federal migration department, said today.

"I have information that a gigantic advertising campaign is on foot," he said. "Toronto ministers are cooperating with members of the Dominion cabinet with this in view, and we can be confident that the influx of old countrymen into Canada next year will eclipse previous records.
Within two years Canada could absorb practically all Great Britain's unemployed."

Mr. Farrell added that the leakage

of emigrants to the United States in the western provinces would be effectively curtailed. The seriousness with which the federal government is taking up the immigration and emigration problem indicates that it is the most important question.

gration problem indicates that it is the most important question with which they have to deal.

"Thousands of men and women can be placed in Western Ontario at this moment," he continued. "An average of about three a day are coming in at the present time. The demand for farm labor was never so great.

"The campaign advertising Canada in an attempt to secure immigrants will probably extend all over Furence."

will probably extend all over Europe. Hon, Mr. Robb has given assurance that many restrictions will be lifted so we can bring in the best class of people in Italy, Greece and other more southern European countries. Next year will doubtless see the big-gest influx of old country people Can-

ada has experienced."

The increase in the number of Britishers seeking entry into the United ishers seeking entry into the United States is accounted for by the still prevailing opinion across the Atlantic that Canada is a land of ice and snow. It is largely to overcome this idea that an advertising campaign has

been decided on. English and Scotch immigrants, who are coming in a perpetual stream to Western Ontario, must sign a year's contract with farmers, Mr. Farrell explained. Not the slightest difficulty has been experi-enced in placing them. Even those unaccustomed to farm work are in demand.
