As for the former, public stocks are 20 per cent. less than a year ago, and this general statement applies to the amount in farmers' hands. In Ontario we do not think there is a very large stock; anyway, as compared with the world's output, this would only be a drop in the bucket. The move toward a higher price level has been checked a number of times by the interminable flow of wheat into more freely with the opening of lake navigation. Winter wheat stocks are not burdensome.
