# Why Women Have Nerves

The "blues"—anxiety—sleeplessness—and warnings of pain and distress are sent by the nerves like flying messengers throughout body and limbs. Such feelings may or may not be accompanied by backache or headache or bearing down. The local disorders and inflammation, if there is any, should be heated with Dr. Pierce's Lotion Tablets. Then the nervous system and the entire womanly make-up feels the tonic effect of

### HORSE SUGGESTIONS.

Horses are very fond of a variety, and fussing always pays in the better condition and greater usefulness of the horse.

Never whip a horse when he shies. It will increase his fear. Confidence in his driver will do much to overcome fear of ob-

It is just as necessary to fit a collar to a horse as it is to fit a shoe to the foot.

A man cannot work on boiled turnips alone; neither can a horse work on a diet of straw and fodder.

It costs a good deal of money to buy a satisfactory team. In most cases this can be avoided by the farmer raising his own.

Always tie your team or put them in a barn when you go to town. It is much cheaper than having to buy a new harness and wagon.

The horse that is all the time being tapped with the whip never knows what his master means by it and comes to think he means just nothing.

## THE MARKET TYPE OF HOG.

Points to Note When Selecting Sown For Breeding Purposes,

In selecting a brood sow there are certain points which are so generally accepted that they may offer a guide to the beginner or to the breeder who would improve his herd. Perhaps the demands of the packer will serve as a good guide in this matter. The experience of the packer has taught him that a certain type of hog is most profitable for him because it will produce the largest amount of salable pork with the smallest amount of waste. Any hog that varies from this type is confronted with a variation in price when he goes to the market.

The head should be medium in length, with a full jowl, which must not be heavy or baggy; the neck must be short and full: the shoulders well set and in line with the side; the chest full, well let down and wide between the legs: the back rounded; the lower line should be straight and the ribs well sprung. but not round. There should be plenty of meat on the loin, the sides should be straight and the flank low. Too many breeders overlook the importance of the flank. A low, deep flank means a deep side and middling and means a corre spondingly good side and ham. The flank is one of the indexes of a quiet disposition, easy feeding and early ma-

Baron Masher, Jr., 135,962, whose portrait is shown herewith, was champion Berkshire boar at the Wisconsin state fair of 1912. This nne animal weighed over 800 pounds when the picture was taken. Baron Masher, Jr., is descended from a long line of prize winners and boasts the bluest blood of Berk-shire aristocracy. He is owned by George E. Kelly, Mineral Point, Wis. fine animal weighed over 800 pounds

turing qualities, and a hog which has a good flank and a good head will generally be found to possess these.

Depth of body is more essential than length, although both are desirable. The sow which combines depth, length, a good top line, low, broad flank and stands on good feet and legs will generally prove to be an excellent brood sow, and if she possesses the breed character her progeny will be in de-mand and may develop into prize winners. There has been for a long time an impression that one could not secure too much ham on a hog of any one of the lard type breeds. This, however, is erroneous. The surplus ham, which has a baggy appearance, is so much waste material, and any surplus that can be bred into a hog should go into quality. In measuring a hog the distance from the root of the tail to the center of the forehead over the back should be about the same as the measurements about the heart and about the flank. If one should have in mind a box of oblong shape from which the corners have been rounded off he would have a good idea of the proper type for the individual hog.

The herd boar should be the best that money can buy. This does not mean that he should be secured at an exorbi-

tant price, but it does mean that his qualities should be such as are needed in the herd and should be the best of their kind and that a few dollars should not stand in the way of his purchase if he is exactly the right animal.

Salting the Butter.

In salting the mass should be spread out thinly and the salt sprinkled over evenly, because it is impossible to work the salt through all of the butter if the salt is thrown all in one place. Streaked or mottled butter is often caused by uneven salting. After salting the butter should be allowed to stand for five or six hours and then worked again.

Edible Flowers of Butter Trees.

By far the most remarkable of edible flowers is that culled from the butter tree of India. The blossoms of this singular tree are the chief means of subsistence with the Bhils and other Indian hill tribes. An average tree yields from 200 to 350 pounds of pulpy, bell shaped flowers that, when they drop off during March and April, the hot months of the Indian year, are eagerly gathered by the natives. They have when fresh a peculiar and lus-cious taste, but the fragrance of them is not pleasant and is best and most briefly described as "mousy." Usually they are cured in the sun, shrivel to one-fourth of their size and then resemble nothing so much as raising The natives prepare them for food by boiling or using them in sweetmeats. Suburban Life Magazine.

Whoever may have introduced the potato into England, according to Dr. Doran's "Table Traits," it was not known in North America in 1586, when Raleigh's colonists there are said to have sent it over to us. But the Span-"batata," or sweet potato, from which the vegetable derives its name, was brought to Ireland many years be fore by Captain Hawkins from Santa Fe, in South America. This is probably the potato of Shakespeare's time. "Let the sky rain potatoes. I will remain here!" cries Sir John Falstaff, embracing Mrs. Ford.-London Tele-

girls always accept everything a man gives them and then marry the fellow who saves his money? Jack-Sure I That's the reason I'm blowing in do. mine.-Boston Transcript.

Her For For Music.

"What is that tune your daughter is playing?" "Which daughter?" asked Mrs. Cum-

rox. "if it is the older girl it's Liszt's Hungarian rhapsody, and if it's the younger one it's exercise 27."-Wash ington Star.

The truest mark of being born with great qualities is being born without envy.-Rochefoucauld.

Does Beauty Bring Happiness ?

Does beauty bring happiness? One of the most beautiful women in the world thinks that by itself it cannot, but says that every woman has a charm-for some man.

"Every women is charming in some way to somebody," she says. "Beauty of itself cannot bring happiness; frequently it is a snark to the woman who posesses it. One cannot be beautiful forever, and love that centres only round a woman's beauty turns to hate when she grows

old.
"I have known ugly women who charmed men by their grace of manner, their high intelligence, their kindliness of heart. You may say that is little consolation to the woman hungry for beauty, but I know how little of a man's heart the woman has who holds him by beauty alone.

Nothing is better than a good wife and nothing much worse than a bad one.

Mrs, Randall— Those two women don't speak any more; each claimed to have the smartest child in town.
Mrs. Dart—Which was right?
Mrs. Randall—Neither of them—I have.
—New York Globe.

CAUSE OF ASTHMA .- No one can say CAUSE OF ASTHMA.—No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellog's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the brouchial tubes. It is sold everywhere. where.
