

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Chas. H. Fletcher

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

MILITARY EFFECTS FOR CHILDREN'S COATS.

BROWN STRIPED COAT.

The little coat pictured here is suitable for the small girl's school wardrobe. It is one of the new models for spring. The material is self striped brown silk and wool mixture. The wide collar and deep cuffs are banded with dark brown moire. There is a very wide belt, with a very decorative application of buttons.

The new coats for children's spring wear are made in a great variety of attractive styles. Covert cloth, serge, gabardine, poplin and checked fabrics are modish. They are without much elaboration, the trimming being confined to the collar and cuffs. Silks and satins in white or matching colors are most frequently used on these. For later wear silk and satin coats will be permissible for dressy occasions. Taffeta, faille and poplin are considered suitable for these.

Many of the new coats are cut on short waisted lines. The belt is a characteristic feature. The lower part of the coat is given the popular flare. The sleeves are set in as a rule, although some examples of the modified kimono sleeve will be used.

The military influence is seen even in these juvenile coats. Many of them are trimmed with gilt, gun metal or silver braid and buttons. Army and navy colors are favored. One sees models of navy blue, army gray, Russian green and Belgian blue.

Wraps which are very fair imitations of the English topcoat are carried out in covert cloth. Decorative pockets, wide belts and skillfully applied collars and cuffs are features of many covert coats.

Lingerie collars and cuffs are to be very much worn. These will give a charming finish to the simple coats. Linen, pique, organdie and lawn sets are being shown for children's suits and coats.

Using Up Meat Scraps.

A nice pudding may be made with cold meat. Take pieces of minced cooked beef and lean ham, a quarter of a pound of suet, half a pound of flour, a chopped onion, pepper, salt and a little finely chopped parsley. Rub the chopped suet into the flour, add pepper and salt, meat, onion, parsley, and, if liked, a dash of curry powder. Mix these ingredients, moisten with a little cold stock to make it cling together, but it must not be wet. Place in a greased pudding basin, tie over with a pudding cloth and steam steadily for two hours. Turn out to serve and pour gravy round.

Smart Sleeves.

An additional smartness is imparted to the sleeve of the coat suit by the embroidered clock on the outer side. Either black or colored silk to match the suit may be used for the clock.

Clean Stomach, Clear Mind.—The stomach is the workshop of the vital functions and when it gets out of order the whole system clogs in sympathy. The spirits flag, the mind droops and work becomes impossible. The first care should be to restore healthful action of the stomach and the best preparation for that purpose is Parrelle's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their value.

SHRINKAGE OF CORN.

How much will corn shrink in weight during the year is a question often asked by farmers. For eight years the Iowa experiment station carried on a thorough and complete test with the following results for each month from the time of cribbing: November, 5.2 per cent; December, 1.7 per cent; January, 6 per cent; February, 3 per cent; March, 1.9 per cent; April, 3.1 per cent; May, 1.9 per cent; June, 1.6 per cent; July, 1 per cent; August, 5 per cent; September, 4 per cent; October, 0; total shrinkage for the year, 18.2 per cent, or nearly one-fifth.

WORTH OF WOOD ASHES.

Farmers Are Advised Not to Waste Valuable Constituents.

Don't waste wood ashes. Apply them, as produced, to acid soils. This is the advice of A. R. Whitson, head of the Wisconsin state soils laboratory. It is of particular value to farmers in upper Wisconsin and others who actually have waste wood to burn.

Wood ashes contain a large proportion of lime, which makes them of value in correcting acid soils. Often-times land intended for clover or alfalfa can be better prepared for the crop by a top dressing of fresh wood ashes, either hard or soft wood being equally satisfactory. Such a treatment will be of especial value on marshy and sandy soils.

If not allowed to leach out, wood ashes are also rich in potash and so form a home source for a much needed element. Practically all of our potash supply has been imported into this country from certain of the countries of Europe now at war, which fact has caused considerable concern with many here who purchase in large quantities.

Whether or not it will pay to use ashes for agricultural purposes depends upon the distance they have to be hauled. When buying ashes the purchaser should satisfy himself that the material is neither adulterated nor full of coal residue.

The Newest Steps.

You may talk of fancy dances, Your fox trots and your glides, Your Argentina prances, And the latest Gotham slides; You may prattle of the tango, Boost the steps from o'er the sea, Praise the latest from the Congo, Or the newest from Parce; Rave about the hesitation, How it drives dull care away, And express your admiration For the steps of cabaret— But the steps that catch your fancy And at home cause endless talk Are those first ones—kinda prancy— As the baby learns to walk.

The most obstinate corns and warts fail to resist Holloway's Corn Cure. Try it.

Canada's Wheat Supply

OTTAWA, March 9, 1915.—A press bulletin issued to-day by the Census and Statistics Office gives the results of a special inquiry for this purpose of ascertaining the stocks of wheat in Canada on February 8, 1915. The inquiry, carried out by direction of the Hon. Sir George Foster, Minister of Trade and Commerce, and conducted by the Census and Statistics Office in conjunction with the Department of Trade and Commerce and the Board of Grain Commissioners, was effected by means of schedules addressed to elevator, flour mill and railway companies and to crop-reporting correspondents for the estimation of quantities in farmers' hands. Completion of the returns received shows that the amount of wheat, and of wheat the equivalent of flour, in Canada on February 8 last was 79,130,593 bushels, or, if allowance be made for a small proportion of non-replies, an aggregate in round numbers of 80 million bushels. The total of 79,130,593 bushels is distributed as follows: terminal elevators 2,833,679 bushels, railway elevators 1,213,952 bushels, other elevators 26,776,246 bushels, flour mills 6,160,840 bushels, in transit by rail 12,571,876 bushels and in farmers' hands 29,554,000 bushels. The result of the inquiry shows that the quantity of wheat in Canada should be amply sufficient to meet all requirements between now and the next harvest. For seeding this spring and for food during the next six months, it is estimated that 444 million bushels will be required, this leaving, on February 8, 1915, in addition to the usual small quantity of imports, a balance of 35 1/4 million bushels for export and reserve. From February 8 to March 2, 36,370 bushels of wheat, and flour expressed as wheat were imported and 6,741,900 bushels were exported. The inquiry took no account of quantities of wheat flour in the hands of wholesale and retail vendors in towns and villages throughout Canada, nor of quantities of wheat in local grist mills. These quantities, although relatively small in individual cases, amount to a considerable aggregate, tending to show that the estimate of 80 million bushels is not excessive.

Average Acre Values of Ontario Field Crops

The figures in the following table are obtained or deduced from the Census and Statistics Monthly for December 1914 and January 1915. Profits per acre for 1914 will vary with the cost of production, yield and market price.

Crops	Ave. yield per acre	Ave. price per bush.	Ave. value per acre
Fall Wheat	21.51 bus.	\$1.08	\$23.23
Spring "	18.80	1.07	20.12
Oats	35.00	.49	17.15
Barley	30.34	.64	19.42
Corn (husking)	56.11	.69	38.71
Flax	15.76	1.70	26.79
Rye	17.19	.85	14.61
Peas	16.00	1.32	21.12
Beans	18.00	2.24	40.32
Buckwheat	25.40	.70	16.38
Mixed Grains	36.66	.63	23.09
Potatoes	167.35	.47	78.65
Turnips, etc.	430.31	.21	90.36

Hay a clover	tons	per ton	per acre
Hay a clover	1.14	14.91	17.00
Sodder Corn	10.95	4.72	51.68
Sugar Beets	9.00	6.00	54.00
Alfalfa	2.26	15.01	33.92

These figures are interesting in considering increased production for 1915. The cost of production includes the cost of preparation, seed, seeding, cultivation of crop, harvesting, threshing, wear and tear of implements and rental value of land. Preparation includes the cost of applying manure (if any). The value of the manure is counted as offset by the bye-products, straw, fibre, stalks.

Figures are not available for the profits per acre of the heavier-yielding crops as potatoes, roots, etc., but their high values should not lead the farmer to overlook their increased cost of production.

Seed Branch, Ottawa.

Children Cry FOR FLETCHER'S CASTORIA

A painful accident happened at D. E. Wallace's saw-mill, Thamesville, last Friday morning, when a log rolled onto Alf. Keeley's right foot, crushing his instep.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

Many women with disfigured complexions

never seem to think that they need an occasional cleansing inside as well as outside. Yet neglect of this internal bathing shows itself in spots, and sallow complexions—as well as in dreadful headaches and biliousness. It's because the liver becomes sluggish, and waste matter accumulates which Nature cannot remove without assistance. The best

CHAMBERLAIN'S TABLETS

remedy is Chamberlain's Stomach and Liver Tablets, which stimulate the liver to healthy activity, remove fermentation, gently cleanse the stomach and bowels and tone the whole digestive system. Sure, safe and reliable. Take one at night and you feel bright and sunny in the morning. Get Chamberlain's today—druggists 25c., or by mail from—
