PILLS.

FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

There has long existed a public demand five an effective purgative pill which could be relied on as unce and perfectly safe in its operation. This has been prespared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pill—one which should have noticed the objections, but all the advantages, of complete. This has been attempted here, and really submit to the public decision. It has been unfortunate for the perfect in the real purpose the submit to the public decision. It has been unfortunate for the perfect in the real produce and implicit produce in the system as to more than counterbulance the good to be derived from them. These pills produce no irritation or pain, takes it arise from a previously existing obstruction or derangement in the bowels. Being purely regestable, no harm can arise from their use in any diamity; but it is better that any medicine should be taken indiciously. Minute directions for their use in the several discause to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Blitus Hendacha, Billous Feeders, Feirs and Ague, Pan in the Side and Loine; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they afford prompt and sure relief in Costiveness. Piles, Colic, Dysentery, Humorn, Scrotter and impurity of the blood; in short, any and crery once where a fungative is required.

They have also produced some singularly successful curse in Rheumatism, Gout, Dropsy, Gravel, Rryspeline, Palpitation of the Heart, Pains in the Back, Stomesh, and Side. They should be freely taken in the spring of the year, to purify the blood and prepare the system for the change of seasons. An occasional dose stimulates the

wasted or diseased energies of the whole organism. Hence in occasional does in advantageous, even though no serious derangement exists; but un accessary dosing should never be earried too far as every purgative medicine reduces the strength when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, bu and them to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their wirtuo are once known, the public will no longer doubt what remedy to employ when in need of a sathertic medicine.

Farm for Sale.

Copy of a Letter from Mr. Edward Tomkingon, of Cape Brenn, Nova Scotia, dated the 25th August, 1854.

The Subscriber offers for sale a valuable Farm situated on Murphy's Ridge, Parish of St. Parick, formerly known as the Wilson farm, sud adjoining E. McElroy's, containing 60 Acres more or less, about 8 acres of which are cleared, and under cultivated for a great number of years from a bad leg; in which there were several deeply seated and old wounds, defying the skill of some with the most eminent of the mounch for some with the most eminent of the mounch faculty, a variety of remedies were also used dissuccessfully; and it is emed to me and one of the most of the most eminent of the mounch of previous to the 10th April next, it will then be sold at Public-Auction, in St. Andrews D. McNAB.

November 1, 1854-xwp

AYER'S PILLS,

with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing anything hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. Among the eminent gentlemen to whom we are allowed to refer for these facts, are Paor. VALESTINE MOTT, the distinguished Surgeon of New YOK City.

BOCT. A. A. HANIS, Practical Chemist of the Port of Boston, and Geologist for the State of Massachusetts.

sachusetts.

IRA L. MOORE, M. D., an eminent Surgeon and
Physician, of the City of Lowell, who has long used
them in his extensive practice.

H. C. Sourniwick, Esq., one of the first mer-

Physician, of the City of Lowell, who has fong used them in his extensive practice.

H. C. Southwerk, Esq., one of the first merchants in New York City.

C. A. Davis, M. D., Sun't and Surgeon of the United States Marine Hospital, at Chelhea, Masa.

Did space permit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more convincing than the certificates of these eminent public men is shown in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compodited not of the drurs themselves, but of the medicinal virtues only of Vegstable temedics, extracted by chemical process, in a state of purity and combined together in such a magner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a more efficient remsely than had hitherto, been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities; of each substance employed are Fift behind, the curative virtues only being retained. Hence it is self-evident the effect should prove as they have proved more parely remedial, and the Pills a surer, more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not proposity judge of a remedy without knowing its composition, I have supplied the accurate Formula by which both my Pectoral and Pills are made to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how few would be taken if their com

few would be taken if their composition was known; Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject, freely asknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many emment Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trials. They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting wherever they exist such derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions, see the wrapper on the Box.
