It is claimed that the telephone was invented in 1635. It did not come into general use, however, because the word "hello" was not invented till some years after. If you will just try it a few times you will understand how it was utterly impossible to run the telephone by saying "Prithee, friend," or "Odds bodikins, man," or "Give thee good morrow, sirrah." No wonder the telephone was a failure.

SPECIAL NOTICE

We have decided in future to put Dr. Jug's Medicines in a Brown Jug instead of a glass bottle as heretofore. The Jugs that we will use for this purpose are made of the finest imported Rockingham of a mottled brown colour, with Dr. Jug's Medicine for Lungs, Liver and Blood, in raised letters on the side. Our reasons for making this change are: 1.—Its wonderful curative qualities will be better preserved by the medicine being kept entirely in the dark. 2.—As the Jug will be registered, it will be impossible to counterfeit it. 3.—The name, FACSIMILE OF A JUG OF DR. JUG'S MEDICINE, will be more easily remembered by association. 4.—Our friends will be able to recognize at once that they are getting the genuine article, as there is no other medicine put up in a jug. PRICE, \$1 PER JUG. SIX FOR \$5.
