

Moth (*Samia cecropia*, Linn). No. 3, Larva of the Yellow-necked Apple-worm (*Datana ministra*). No. 4, Larva of the Apple Buprestis, Borer (*Chrysolothris femorata*) which is very destructive to young trees in many parts of the country. No. 5, a true Bug (*Hemiptera*) in its wingless state. We do not know its name. There were also enclosed three caterpillars, without numbers attached; they had so lost their colours from preservation in alcohol that we were unable to determine them with certainty.
