WITH EXAMPLES, PROBLEMS AND TABLES

—BY—

I. J. BIRCHARD, M.A., Ph.D.,

Mathematical Master, Collegiate Institute, Brantford.

(Joint Author of "THE HIGH SCHOOL ALGEBRA," Part I. and Part II.)

PRICE, . . . \$1.25.

Some Special Features:

- 1. A Complete Theory.** The definitions, Theorems and Proofs, though expressed in language which is clear and easily intelligible, are still perfectly general. The foundation thus laid being complete, it will not be necessary for the advanced student to re-examine elementary principles.
- 2. Theory and Practice Combined.** Each principle in theory is illustrated and fastened in the mind by suitable examples. The fundamental laws of correct teaching have been observed in the arrangement of the work.
- 3. Geometrical and Symbolical Truths Compared.** The Algebraical and the Geometrical methods of representing lines, angles, etc., are carefully prepared, their differences and resemblances pointed out. Algebraical operations are illustrated geometrically; geometrical truths are stated algebraically thus combining the power of analysis with the clearness and simplicity of geometry.
- 4. A Great Variety of Examples.** Many original examples have been constructed; good examples from previous publications in the United States, Great Britain, France and Germany have been inserted, and Examination papers from various sources are given.
- 5. Preparation for Advanced Work.** Both Theorems and Examples have been arranged to secure valuable exercise for the present and to lay a proper foundation for future progress.
- 6. Mathematical Tables.** Tables are given of the Logarithms of Numbers, of the Natural Sines, Cosines, Tangents and Cotangents of Angles, and of the corresponding Logarithmic Functions. These Tables, though of necessity not elaborate, are still sufficient to illustrate the different methods for the solution of triangles, and give results sufficiently accurate for any ordinary calculations. Teachers and Students alike will readily perceive the great advantage of using a uniform series of Mathematical works throughout the High School Course.
