DR. WISTAR'S BALSAM OF WILD CHERRY.

From the Fall River Monitor Mass. This medicine, prepared by a long experienced and skillful physician, tested and approved by a great number of intelligent, distinguished and respectable persons in various parts of the country, is now received, and used with entire confidence and with great success by those afflicted with pulmonary complaints. It is also recommended as a valuable medicine for other diseases, such as colds, coughs, and particularly diseases whose tendency is to consumption.

Important from Canada.

Quebec, July 24th, 1848. To all who are afflicted with Asthma. I have at different times been afflicted with severe colds, which produce in my case the Asthma. I have, on these occasions used DR. WISTAR'S BALSAM OF WILD CHERRY. Two years ago I was quite sick, so much so that I could not rest at night. I procured of the agent of this city, a bottle of this Balsam of Wild Cherry. Before I had taken the whole of it I felt relieved. I continued taking it, until I had used three or four bottles, which completely cured me. The present season I took another severe cold, and immediately resorted to this Balsam, and a part of one bottle had the desired effect. I therefore cheerfully recommend my friends and all others who need it, to try this medicine for their coughs and colds, and particularly the Asthma.

Respectfully yours, Wm. McGrath.

E. V. WILSON, General Travelling Agent.

Observatory, Toronto, Sept. 9, 1851.

At the request of Mr. Wilson I have examined his Lightning Conductor, and a satisfactory explanation respecting it. His views appear to me to be reasonable and correct, and the Metallic Point a good form of the Instrument; the Platinum Point is an essential part of it, but I do not consider the Magnets to be so, or that they can have any possible effect, good or bad, as such: as additional points, the opinion of the best authorities is that such are of no use; one good point being all that is necessary, but they can do no harm.

I further state, at Mr. Wilson's request, that in my opinion any building so elevated as the St. Lawrence Hall, or the Lunatic Asylum, ought to be provided with several Points, and several Conductors, which latter should be placed in good metallic communication with the tin covering of the roof and any other considerable masses of metal about the building. The Conductors should be led off to the iron water pipes underground.
