D. SAUL.

NOTICE TO SUBSCRIBERS.

Subscribers who may change their addresses on the 1st of May are requested to advise us of the fact, and send us promptly their new addresses, thus insuring correct delivery of their papers.

PROPOSED NEW BUILDING REGULATIONS.

The Fire and Light Committee of the Toronto City Council have approved of the following recommendations of the Federated Council of Building Trades: That when buildings under construction reach one storey in height the joists shall be covered or floored temporarily with one-inch boards, as each storey is built. In case of steel structures, where girders are 12 feet centres, two-inch plank shall be used with sufficient support in the centre. Where joists are over 16 inches and up to 48-inch centres ½-inch plank shall be used, and where six-foot centres, 2-inch plank. In builders' scaffolds the distance between standards shall be eight feet instead of eight or ten, as formerly allowable. Where trestles are used the height is to be five feet and the material substantial. When scaffolding is formed by putting trestles one upon another, not more than two trestles shall be used, each five feet high. Above the height of ten feet standard-ledger or ropes shall be used. A guard-rail shall be built around the scaffold to prevent bricks falling, and another guard three feet above the scaffold to keep men from falling off.

Canadian Industries and Canadian Products are taking the lead the world over. Why should not Canadian Varnish do so at home? When making out the specifications for your next building, remember that

The Imperial Varnish & Color Co.'s Limited

HIGHEST-GRADE ARCHITECTURAL VARNISHES

are designed for first class work, and are not surpassed by any of a foreign make. Try them. Put up in tins with our brass seals. :: :: :: :: ::
