POTATO EMBARGO

Mr. HANSON:

1. Has the government any knowledge of the report as published in newspapers of the 7th and 21st instants, that an embargo against Canadian potatoes has been placed by the British government?
2. If so, what action, if any, does the government propose to take to have this embargo removed?
3. What action, if any, did the government take to prevent this embargo taking effect?
4. Does the embargo apply to potatoes grown in the United States?
5. If not, what is the attitude of the British government with reference to the importation of potatoes from the United States?

Hon. Mr. MOTHERWELL:

1. Yes, the report is correct.
2. 3. When the possibility of the embargo was first reported, the following cable was sent to the High Commissioner: "Unofficially reported here that British ministry contemplate putting embargo on Canadian potatoes because of presence here of Colorado beetle. This beetle has been in Canada for half century and to take objection to it now would be extremely unfortunate and untimely in view of recent action of United Kingdom looking to promotion of inter-Empire trade by establishing marketing committee upon which dominions have been invited to appoint representatives. Urge you have any such suggested action stayed until whole situation is carefully surveyed from all angles as another ill advised cattle embargo incident would be unfortunate."
