

REMARKS.

AS every department of the Establishment is under the personal attention of the Proprietors, they feel that they may confidently guarantee the identity and correctness of all the Trees and Plants sent from their establishment, as every tree that is expedited, is selected and packed under their own eyes, and they have further to say, that should any error arise, it will be rectified with the greatest pleasure.

In the introduction of the products of foreign countries, the proprietors do not intend to confine themselves, to those alone which may yield pecuniary profit to themselves, but to obtain from various parts of the world every tree or plant which may promise to yield any benefit; it being their object to make their establishment a National Repository of every thing useful or interesting in Botany, both as regards Manufactories or Horticultural and Scientific Experiments.

Visitors are allowed free access to the Establishment on all days—persons conversant with Horticulture are invited to visit their Establishment for their amusement, as well as in order that they may form a proper estimate of the extent and value of their Collection.

It will be perceived that numerous and splendid acquisitions have been made and great attention has been exercised in selecting the most interesting and beautiful, many of which have been purchased at a great expense, the prices have been greatly reduced, and are lower than articles of the same quality can be obtained elsewhere.

Priced Catalogue of Canadian and American Plants and Seeds for exportation to Europe can be had *gratis*.

The Trees, Shrubs and Plants, can be packed in such manner as to be transported to any distance, all orders will receive the same pointed attention as if the persons desiring them were present, to make their selections.

The Proprietors in offering this Catalogue to the Public, call the attention of amateurs to the numerous highly interesting plants which it contains, many of which cannot be found in any other collection in this country.
