CHEAP GAS FROM SEWAGE.

Latest of the Many Schemes Being Propounded to City Council.

Special Meeting of Fire and Light to Look Into It—Sheppard and Hubbard Make It up—Proposal to Advertise for Tenders to Supply Electric Power—Estimates Hardly Trimmed—At Last a Quorum and Lots of Business.

Chairman Sheppard at last succeeded in rallying together a quorum of the Fire and Light Committee yesterday afternoon and waded through a volume of business.

A very pathetic reconciliation between the chairman and Ald. Hubbard opened proceedings. Ald. Sheppard had called the other "a cur" once, but promised it would not happen again. He recalled how the twain had often fought together and made the amende honorable, which Ald. Hubbard most gladly accepted.

Gas From Sewage.

Then came a new scheme, promulgated by Messrs. W. J. Elliott and J. A. Pennyfather of Toronto and L. R. Arnott of New York. The trio laid before the committee a new discovery whereby city sewage and garbage was to be utilized for the manufacture of lighting gas. Premising the proposition by mentioning that it was already in use in Greater New York, the deputation claimed that the 50 tons of garbage daily consumed at the crematories would produce enough energy to light from 1200 to 1600 arc lamps for 12 hours. Under the new gas process all the sewage could be utilized equally well by the construction of a trunk sewer and of a plant whereby gas could be produced at a cost of 15 or 20 cents per 1000 cubic feet. From 10,000 to 14,000 feet of gas could be produced from a ton of garbage and the lamps would sustain a candle power of from 18 to 20. All that was asked was that the company be permitted to construct a plant at their own cost and under the City Engineer's supervision at one of the crematories to demonstrate the method of gas production.

The chairman will call a special meeting of the committee to deal with the proposition.

Waterous Engine at $2560.

Ald. Hubbard, in supporting Chief Graham's recommendation for a light fire engine for Yonge-street Fire Hall, argued that the maximum of 90 lbs. pressure, which was obtained from the high level pumping station for points north of College-street, was insufficient. The chief explained that the Bay-street engines were the nearest available for the protection of that part of the city, and it was decided to offer the Waterous Company $2560 for an engine which they were wanting to sell to the city for $2700.

Bertram Co. Want Better Protection.

In response to a petition of the Bertram Company for mains to protect their shipyards, the chairman promised to confer with the company, with the Grand Trunk Railway and with the Steamboat Company to ask them to bear a share of the cost.

Incidentally Ald. Dunn asked the reason of the chairman's delay in arriving at an understanding with the insurance companies with reference to sharing the cost of salvage corps accessories to the Fire Department. Ald. Sheppard blamed the questioner's non-attendance at meetings for the delay, but promised a report at the next meeting.

Upon recommendation of Ald. Frankland and the Chief, $150 will be devoted to procuring supplies for Kew Beach Fire Hall.

Make Them Take Down Posts.

The Solicitor, having reported favorably, will be instructed to take proceedings to have the Consumers' Gas Company remove unused lamp posts from the streets. The legal department, however, advised that the Grand Trunk Railway could not be compelled to construct a corrugated iron roof over the old station at the foot of Yonge-street, so that surrounding property cannot be protected by this means.

The Chief's recommendation for an outlay of $964 for Island fire protection services was concurred in. The secretary will report as to the need of an electric light at the corner of Euclid-avenue and College-street.

Dunn Felt Snubbed.

The chairman and Chief thought they knew had been appointed a committee to consider the application of assistant fire engineers for increases in salary and brought in a report advising that it be not granted. Ald. Dunn kicked because he had been appointed to the sub-committee, but had not been consulted. His contention was found to be correct and the report was referred back.

They Cut Off $100 Gn'y.

The fire and light estimates were then reviewed, but of the whole amount asked for only $100 was struck out. It was taken off the item, "two small hose reels for Island, $200."

Aqueduct Disposed Of.

One final wrangle and the committee got rid, by gracious consent of Ald. A. Macdonald and his following, of the aqueduct agreement. The only point, according to Ald. Davies, was as to whether the Aqueduct Company should be given the privileges asked for in case no other offers were received or whether tenders should be advertised for. Ald. Hubbard thought the latter the more business-like alternative, but Ald. Davies moved the adoption of the agreement, which meant the adoption of the former course.

Ald. Dunn: Give us your reasons and save them short.

The Chairman: "That's a hot shot." [Laughter.]

Ald. Davies, in response, spoke of the advantages of having power produced at our doors, over long transmission schemes.

The agreement meant, said Ald. Dunn, that the city would be bound to accept Macdonald's offer if at the end of six months no other had been received. He would not stand for that.

Ald. Hubbard roundly denounced the agreement. He had interviewed a number of manufacturers who would profit by cheap power and yet none favored the aqueduct scheme. He defied the promoters to point out one reputable engineer who considered it practicable. Electricity generated in this way would cost three times as much as by coal. Aqueducters were not in the thing for their health, but were after the same thing as other schemers of the garbage and cattle market class included. "This company," said he, "is even now in court under a bankruptcy winding up order. Would we be sane men to entertain such a proposal now?"

E. A. Macdonald did not think it would be public honor to have his offer published and then advertise. But it was finally decided to recommend that tenders for the supply of electric energy be advertised for for three months, the lowest or any tender not necessarily accepted.

Navigation Companies Preparing.

The past two or three days' fine weather has given the vesselmen notice of approaching spring, and they will now begin preparing for the forthcoming season. Commodore Williams of the Ferry Company sent a lot of carpenters at work on the company's fleet at the Island yesterday, and it is likely that the first boat will run on April 1.

A circular has been issued from the head office of the Richelieu and Ontario Navigation Company to their local agent, J. F. Dolan, announcing that the steamer Hamilton will commence her trips about May 1. A tri-weekly service will be put on May 30, and a daily service on June 13. The Passport may not be on the route this season, as her cabins have all been taken out, and she will likely ply between Montreal and Kingston, but the steamer Bohemian will be added to the fleet here.

The Glorious Twelfth.

The Executive of the County Orange Lodge will meet on Friday evening to make arrangements for the 12th of July celebration. A proposition to hold the annual games at Hanlan's Point instead of Exhibition Park will be discussed.

TO BAR OUT ALIENS.

Mr. McMullen Wants Canadian Mines and Minerals Held for Our Own People—Ottawa Notes.

Ottawa, March 8.—(Special.)—Mr. McMullen gives notice of a bill to shut out aliens from holding mining and mineral rights or claims in Canada. He will embody in the bill a naturalization law of three years' residence before an alien can qualify for a claim after taking the oath of allegiance.

Dredging in Toronto Harbor.

Mr. Tarte stated to Mr. Clancy yesterday that W. E. Plum, who did the dredging in Toronto harbor last year, was recommended for the work by reliable parties; $5310 was paid Mr. Plum for his year's work, or $8 an hour for each hour of working time. It had not been decided whether the work would be continued this year.

Member From the Coast.

Mr. Thomas Earle, M.P. for Victoria, arrived yesterday. He looks well and is receiving many cordial welcomes from his numerous friends. Mr. Earle says that there are between two and three hundred persons leaving Victoria for the Klondike daily, while hundreds more are awaiting their chance to embark. Prices, he says, are not as high as has been reported, owing to the very keen competition in all branches of trade. Col. Prior, Mr. Earle's colleague, left for home to-night, having been called to Victoria on urgent business.

General News Notes.

Mr. Monk will move that it is desirable that an insolvency law should be enacted.

Sir Henri Joly gives notice of five bills relating to different branches of his department.

Mr. McInnes will ask what steps are being taken to procure telegraphic communication with the Yukon district.

PRIZE LANTERN VIEWS.

A Delightful Open Meeting at the Toronto Camera Club.

It would take columns to amply describe the one hundred lantern slides observed on the Toronto Camera Club's screen last night. They were the cream of American lantern slide interchange, and in addition to the charm of subject and scene were technically almost perfect. They carried the spectator from the genre subjects of everyday life to the days of Ramoses, from a homely farm scene to the wilds of Norway, from ancient England cathedral's interior to the Pacific-washed shores at Monterey, Cal., from typical household scenes to the showrooms of an English duke's ancestral castle, and so on ad infinitum. The whole world was laid tribute upon, and the very large audience spontaneously applauded the gems presented to view. The club was pleased, the audience was pleased, and art photography was advantaged by last night's exhibition at the Toronto Camera Club.

For Young Women's Benefit.

The Board of Directors in connection with the Y.W.C. Guild held its monthly meeting Monday afternoon, at headquarters. The President, Mrs. Harvie, was in the chair, and a large number of the members were present. A report from each class and committee was read, and the secretary stated that 66 new members had been recorded during the month. Plans were considered for the enerring of the cottage at the Island. The Board subsequently visited Mrs. McDougal of Montreal, who held a reception at the Y.W.C.A., Elmstreet.

Independent Order of Oddfellows.

Loyal Lord Stanley Lodge, 6858, I.O.O.F., M.U., held their regular meeting last night in Dominion Hall, Queen-street west, N. G. Hancock in the chair. There was a good attendance of members and visitors. The district officers, Prov. G. M. Gardner, Dep. Prov. G. M. Blain, Prov. C. S. Dunn and Past Prov. G. M. Davis, paid the lodge an official visit and were well received. They each made addresses on the progress and benefits of the order. The meeting was further enlivened by songs by Bro. Arnold and others. This lodge was reported to be making most gratifying progress.

In the Surrogate Court.

Mrs. Hattie Murdroff, widow, died intestate, leaving $1,055.05 in cash. Her sisters ask the Trusts and Guarantee Company to procure administration.

Peter Barclay, a retired miller, made his son, Alexander W. W., and John Smith the executors of his will. He owned 35 D'Arcy-street, 170, 172 and 174 Euclid-avenue, and 303 Sackville-land, $200."

Aqueduct Disposed Of.

One final wrangle and the committee got rid, by gracious consent of Ald. A. Macdonald and his following, of the aqueduct agreement. The only point, according to Ald. Davies, was as to whether the Aqueduct Company should be given the privileges asked for in case no other offers were received or whether tenders should be advertised for. Ald. Hubbard thought the latter the more business-like alternative, but Ald. Davies moved the adoption of the agreement, which meant the adoption of the former course.

Ald. Dunn: Give us your reasons and save them short.

The Chairman: "That's a hot shot." [Laughter.]

Ald. Davies, in response, spoke of the advantages of having power produced at our doors, over long transmission schemes.

The agreement meant, said Ald. Dunn, that the city would be bound to accept Macdonald's offer if at the end of six months no other had been received. He would not stand for that.

Ald. Hubbard roundly denounced the agreement. He had interviewed a number of manufacturers who would profit by cheap power and yet none favored the aqueduct scheme. He defied the promoters to point out one reputable engineer who considered it practicable. Electricity generated in this way would cost three times as much as by coal. Aqueducters were not in the thing for their health, but were after the same thing as other schemers of the garbage and cattle market class included. "This company," said he, "is even now in court under a bankruptcy winding up order. Would we be sane men to entertain such a proposal now?"

E. A. Macdonald did not think it would be public honor to have his offer published and then advertise. But it was finally decided to recommend that tenders for the supply of electric energy be advertised for for three months, the lowest or any tender not necessarily accepted.

Navigation Companies Preparing.

The past two or three days' fine weather has given the vesselmen notice of approaching spring, and they will now begin preparing for the forthcoming season. Commodore Williams of the Ferry Company sent a lot of carpenters at work on the company's fleet at the Island yesterday, and it is likely that the first boat will run on April 1.

A circular has been issued from the head office of the Richelieu and Ontario Navigation Company to their local agent, J. F. Dolan, announcing that the steamer Hamilton will commence her trips about May 1. A tri-weekly service will be put on May 30, and a daily service on June 13. The Passport may not be on the route this season, as her cabins have all been taken out, and she will likely ply between Montreal and Kingston, but the steamer Bohemian will be added to the fleet here.

The Glorious Twelfth.

The Executive of the County Orange Lodge will meet on Friday evening to make arrangements for the 12th of July celebration. A proposition to hold the annual games at Hanlan's Point instead of Exhibition Park will be discussed.

CHEAP SMELTING AT TRAIL

C. P. R. to Charge Only 50c Freight and $7 for Treatment

Of Rossland Ores—Western Liberals Kicking Against the Teslin Railway Deal—Alaskan Quartz Mining on a Big Scale—The Future of British Columbia—Mine Sold.

It is stated that as a result of the C.P.R.'s purchase of the Heinze interest in West Kootenay the cost of treatment of ore at the Trail smelter will be considerably reduced. The World gathers that the Canadian Pacific means to so far reduce the cost of shipping and smelting Rossland ores as to make even a comparatively low grade proposition profitable. It is stated that the company will charge only 50 cents a ton for carrying ore from the Rossland camp and only $7 a ton for smelting. Heretofore the Heinze charges for both freight and treatment have been so heavy as to keep the smelter unemployed a great deal of the time. Again the successful work of one smelter in the Trail Creek district should lead to the establishment of others.

Rossland Liberals Kick.

According to accounts received from the West, Rossland Liberals are indignant over the action of their leaders at Ottawa in connection with the Teslin Lake Railway grant, and they are preparing a memorial to the Government condemning the proposition. In this connection The Rossland Miner says: "Those Liberals who are independent enough to hold themselves aloof from the Government party are justly indignant and will remonstrate in a way that will create surprise and consternation among the wire-pullers at Ottawa and cause the pushing young Minister of the Interior to hide his face with shame."

1100 STAMPS

Will Found Out $5,000,000 in Bullion From Gold Quartz in Alaska.

According to the latest returns the output of the quartz mines of Juneau, Alaska, during the past 12 months was $3,000,000. This sum was produced by 650 stamps. Now, however, the number of stamps in this Canadian district has been increased to 1100, and it is estimated that the annual bullion output will exceed $5,000,000 hereafter. These statements go to show that besides the placer deposits the Klondike region may be found to possess gold quartz reefs which will pay to work on a large scale.

THE COMING FIELD

For Mining—So Says an English Authority Regarding British Columbia.

Wherever we look, says The London, Eng., Mining Journal, in an editorial, the mining industry appears to be in a most flourishing condition, and especially is this the case in British Columbia. Old subscribers know how, in the past, we sounded the praises of these gold fields, and those who took our advice and went to the colony to see for themselves have been struck with its wonderful richness. There is no doubt about it that British Columbia is the coming mineral field. Speaking of Rossland, The Journal says that the district has now reached that stage when persistent development, sustained by ample capital, must be done to prove its many veins and surface showings. At present there are several very prominent mines opened up in the district, and there are many others with equally good prospects provided they can get sufficient money to carry on the development of the work. In the past the colony has suffered from lack of transport facilities and smelters at convenient points, but now these drawbacks are being overcome and the mining industry is going ahead with a bright future.

Sold for $10,000.

The British American Corporation, according to The Rossland Miner, has bought the Black Eagle from Hector McRae for $10,000.

Against the Amendment.

A proposed amendment to the British Columbia mining laws is now under consideration. One of its effects will be to compel the prospector to do assessment work on his claim before he is allowed to record the location. The prospectors are up in arms against the innovation.

The Canada Mutual.

Ore shipments have been started by the Canada Mutual Mining and Development Company, Limited, from their Gladstone mine. Returns from the first carload shipped to the Tacoma smelter have just been received at the offices of the company. These show the ore to run from 66.7 per cent. in lead and a small amount in silver, the value being $33.35 per ton, and the net returns of the carload $31.88 per ton. The management of the company are much elated over this result, and intend to develop it as speedily as possible. A force of men are now at work drifting on the ledge. The ore encountered is being sacked and packed for shipment, but no stoping will be done for some time. As the mine is situated just south of the international boundary line, the high rate of duty imposed by the United States on lead ores does not have to be paid. The present freight rate to the Tacoma smelter is $7 per ton, but when the Northport smelter is prepared to treat this class of ore the freight rate will only be 50 cents per ton, so that the property is very advantageously situated.

Starts for the Klondike.

While all the world was at the height of its wonder at the resources of the Yukon, its wonder at the resources of the Yukon, Mr. R. A. Cunningham, one of the directors of the Slocan-Cariboo Company, started for the Klondike. The public were not advised of his departure; scarcely one of the stockholders in the company was aware of it, for the directors kept the matter a profound secret, and the expenses of the journey were defrayed without calling upon the shareholders for a single cent. The directors knew that if Mr. Cunningham discovered any claim at all it would be a good one. In the first place, he was the largest shareholder in the company, and in the second he was a man of great experience in placer mining, having made his pile in the Cariboo placer boom of 1862.

Mr. Cunningham arrived in the Yukon District in due course, and was as fortunate as his confreres expected him to be. Before leaving he secured a splendid placer mining claim (No. 38) on the Calder Creek, situated in the Indian River mining division of the Yukon, about 28 miles from Dawson City, and reached by trail up Bonanza and Eldorado; thence across the "davide." The claim was secured under the old law, which entitles the miner to stake out five times as great a claim as under the present regulations, so that the company have really five times as much land as their competitors, and have, therefore, five times the opportunities. On his return he turned over the claim to the company, and it is said that there is no other mining company in America which is in a position to place an assured Klondike claim on the market. Mr. Cunningham, whose statements are highly reliable, says that on the surface alone the claim assays from 25 cents to 40 cents to the pan, and that the location is a good mining one, with plenty of timber and other necessities. What value it will be below the surface he is not prepared to surmise.

On No. 40, Calder, there has been a shaft sunk, and prospects running from 50 cents to $1.25 have been taken from the gravel and bed rock had not been reached when I was there, the shafe being down only 15 feet.

A good estimate of the value of the find can easily be obtained from Mr. Ogilvie's celebrated account of the Yukon. On page 95 of his book that gentleman, in remarking on the value of pay dirt, makes the following statement: "As to the quantity that will pay, it is considered that 10 cents to the pan, with three or four feet of dirt, is excellent pay. Less, of course, pays in a less degree, and more in a greater, but that is considered good pay in that country, even under present conditions." If 10 cents per pan is good pay, it will be apparent to all sensible people that 25 cents and 40 cents, as stated by Mr. Cunningham, offers exceedingly rich prospects.

For Young Women's Benefit.

The Dominion Young Women's Christian Association delegates continued their sessions yesterday, which included a meeting of the Executive in the morning and the completion of selecting delegates for the convention in London, Eng. Other business connected with the work of the society was transacted.

AT THE COUNTY COURT.

Question of Determining Tenancy and Removal of Fixtures—A Horse Examined by the Jury.

Judge Morgan presided at the County Court sittings yesterday morning and Judge Morson in the afternoon.

The first case heard was brought by the Gurney Foundry Company, owners of 35, 37 and 39 Adelaide-street west, against H. S. and H. D. Thornbury, who, as the Toronto Electrical Works, occupied the premises from Oct., 1896, until last July. The claim was for $200 for damages to the building. It was claimed that when they moved the defendants took away some piping and left the place in an unsanitary condition, and that they did not vacate within the time of a notice to leave, served upon them.

The case involves two points of law: First, if the tenant did not leave when the notice to quit was up, was he entitled to take the fixtures? Secondly, if he contended that he held under a new agreement, could he remove the fixtures or would they pass to the landlord unless expressly excepted at the end of the first lease?

Judgment was reserved. Mr. A. F. Lobb for the plaintiff and R. C. Clute, Q.C., for the defendants.

The Horse as an Exhibit.

It is not often that a horse figures among the "exhibits" in the County Court, but such a one the Jury were invited out to view yesterday afternoon. It was a grey gelding named "Gordon," for the value of which, $150, Beauchamp H. Montgomery, a commercial traveler, was suing the Toronto General Trusts Company. The animal, whose best gait is about 2.40, went to the defendants under a chattel mortgage, along with the property of a man who had the use of the horse for his keep. Joseph Parkes is acting for the plaintiff and E. T. Malone for the defendants. The case was not concluded.

KLONDIKERS DETAINED.

American Steamer From South America is Held at Valparaiso Through Lack of Funds.

New York, March 8.—A despatch to The Herald from Valparaiso, Chili says: The American steamer Columbia, which started from New York for the Klondike, is still lying here waiting for funds. Her supplies are liable to be cut off, as her captain has been unable to raise money, and her owners in New York have declined to send him money to pay for repairs, provisions and coal.

The passengers, twenty of whom are women, are becoming desperate. There is a possibility of the ship being seized for debt. Americans here are indignant over the conduct of the vessel's owner. The United States consul can do nothing as matters now stand.

A Klondike Whiskey Still Seized.

Vancouver, B.C., March 8.—The activity of the Vancouver Inland Revenue Inspector is responsible for the prevention of the establishment of at least one illicit still in the Klondike. D. Montigny of Montreal, was fined $200 for having a still in his possession. He was on his way north.

White Ribboners.

At W.C.T.U. headquarters on Monday the devotional exercises were conducted by Parkdale Union, Mrs. Boyce, President, in the chair. There was a large attendance. A vocal solo was rendered by Mrs. T. C. Biggs, "On Heights of Power." Mrs. Bascom spoke on the need for prayer. Mrs. Clement paid a tribute to the memory of Mrs. Youmans. Mrs. Cowan spoke of the influence of such a life as Miss Frances Willard's.

A circular was read from Mrs. Thornley, provincial president W.C.T.U., entitled, "An Emergency Call," relating to liquor in the Yukon, and urging unions to petition the Government, through Hon. Clifford Sifton, to prohibit its manufacture, importation and sale in that district. This has already been done in Toronto.

Creighton Union held a very successful parlor meeting at the residence of Mrs. Brine, 118 Bellevue-avenue. Addresses were given by Mrs. Bascom, district president; Miss Mircott of Australia; Rev. J. B. Kennedy, and Rev. C. O. Johnston; recitations by Miss Snider, solos by Miss Street, Miss Jessie Millgate and Mrs. Rhines; duets by the Misses Dawson and Mr. and Mrs. Armond. Mrs. Green presided.

At Gordon Union the devotional exercises were conducted by Mrs. Wickett, and Mrs. Ardill of Sydney. New South Wales, gave an interesting talk on the rescue work carried on in that country by herself and Mr. Ardill.

Under the auspices of Central Union, Prof. Robinson of Knox College will lecture on Thursday night in the Y.W.C.A. Guild Hall, McGill-street, on the "Holy Land."

Big Blaze at Providence.

Providence R.I., March 8.—A fire which caused damage to the extent of $150,000 broke out in a five storey building occupied by the Brownell & Field Company, wholesale grocers, on Canalstreet last night.

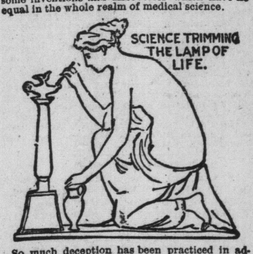
Free Trial To Any Honest Man

The Foremost Medical Company in the World in the Cure of Weak Men Makes this Offer.

HEALTH AND ENERGY ASSURED, HAPPY MARRIAGE, GOOD TEMPER, LONG LIFE.

In all the world to-day—in all the history of the world—no doctor nor institution has treated and restored so many men as has the famed ERIE MEDICAL CO. of Buffalo, N. Y.

This is due to the fact that the company controls some inventions and discoveries which have no equal in the whole realm of medical science.



So much deception has been practiced in advertising that this grand old company now for the first time makes this startling offer:—

They will send their costly and magically effective appliance and a whole month's course of restorative remedies, positively on trial without expense to any honest and reliable man!

Not a dollar need be advanced—not a penny paid—till results are known to and acknowledged by the patient.

The Erie Medical Company's appliance and remedies have been talked about and written about all over the world, till every man has heard of them.

They restore or create strength, vigor, healthy tissue and new life.

They quickly stop drains on the system that sap the energy.

They cure nervousness, despondency and all the effects of evil habits, excesses, overwork, etc.

They give full strength, development and tone to every portion and organ of the body.

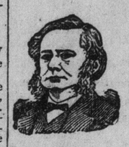
Failure is impossible and age is no barrier.

This "Trial without Expense" offer is limited by the company to a short time, and application must be made at once.

No C. O. D. scheme, no bogus philanthropy nor deception, no exposure—a clean business proposition by a company of high financial and professional standing.

Write to the ERIE MEDICAL COMPANY, BUFFALO, N.Y., and refer to seeing the account of their offer in this paper.

FREE BOOK TO MEN ONLY



which deals with those weaknesses resulting from ERRORS OF YOUTH, such as DRAINS, NIGHT LOSSES, WEAK BACK, IMPOTENCY, VARICOCELE, etc. It explains to you fully just why ELECTRICITY cures, and cures permanently. It tells all about the world-famed DR. SANDEN ELECTRIC BELT for WEAK MEN, young or old. I am the inventor, and with it I cured 5000 last year.

CONSULTATION FREE

at office, or if you do not live near enough to call, write for the above book, sent sealed free.
