REMARKABLE FIGURES. It will no doubt be interesting to many people to know that by actual computation the output of "Salada" from the Montreal Branch alone for the year 1913, was equivalent to 30,000 one-hundred pound chests of tea, which, if placed one on top of the other would reach a distance of about 60,000 feet, or nearly 12 miles high. This may convey some slight idea of the enormous sale of the famous "Salada" Tea.
