The great comet of 1264 and 1556 is expected by astronomers to re-appear at the latter end of 1847 or the commencement of the following

you will have another crop of potatoes, all the small tubers having grown to fine roots. I have known, in very fine weather, three crops taken from the same plant. Adding a little good manure at the time of replanting is generally a good plan. Those who practise this, must not be discouraged by seeing the tops wither and even die; the roots will grow without the tops. The adoption of this plan, which the
