I got thinking about if I joined the active army it might help me to get leave so after a short time I ask for leave again I only ask for six days this time but again they said know so then I really hated the army and in the mean time I had received letters from home asking me if I had tried to get leave and I told them yes but could not get it.

so this is what are farm consist of I do not know it is not all cleared but there is about 40 acres of working land and there is a lot of work to be done and dad could not pay for help so I start thinking that I would wait till my furlough but by the time my furlough was due they put me on draft and I went home before the draft left I stayed there
