

SMELTING CENTRE FOR THIS COAST

VANCOUVER ISLAND'S GREAT ADVANTAGES

Expert Who Knows the Conditions May Interest Capital and Establish Iron Works.

There is a possibility that the question of a iron smelter on Vancouver Island may be taken up by a man who knows the business from start to finish. Wm. Price, of Port Townsend, who had charge of the Ironside smelter for years, is in the city, and expresses the opinion that such an industry on this island would prove a paying investment. Moreover Mr. Price is seriously considering the question of taking the initial steps in the matter, and is assured that he could obtain the capital to carry it on inside of a very short time.

Mr. Price received his knowledge of the iron and steel business in Pittsburgh. He went through all the branches of the work and became recognized as an expert in this business. About seven years ago he came West to examine into the ores on this coast with the object in view of erecting works. His preliminary study of the subject led him to the conclusion that work just then, but three years ago Mr. Price came out and took charge of the Ironside works, associated with Homer Swaney, who was the financier of the institution.

Starting with an indebtedness of about \$42,000 the Ironside works had a hard struggle. The plant was not the modern neither, and the ores required to be experimented with in order to get the very best values out of them. Mr. Swaney working against the odds eventually have come out all right it is thought. Just as he was to branch out, and after he had interested capital in the steel works, he was cut off from the work, losing his life in the loss of the Clallam.

Others have attempted to revive the work and put the finances in shape to proceed. It is seriously questioned whether this will be accomplished. The time therefore seems opportune to transfer the manufacture of pig iron to this side of the line. The Ironside plant derived its ore supply almost exclusively from this side and paid a duty on it entering the United States. Mr. Price thinks all the advantages between manufacturing the pig iron in the United States or in British Columbia, is altogether on the side of this province.

Mr. Price dissipates many of the objections previously raised against the treating of the iron ores in British Columbia. He says the Ironside smelter proved just what could be done with the ores from this province. The experimental stage has been passed. It has been demonstrated that pig iron second to none can be made from the ore.

He has also visited personally the various deposits of iron found on the coast. Vancouver Island, he believes, is rich in ores, and there is sufficient to meet the supply for smelting for a hundred years. He speaks of the objection which is often urged against the iron deposits found here on the ground that they are but capings to copper deposits. It is an easy matter to tell whether or not a showing is a capping or is a bona fide iron deposit. He says nearly every inlet on the West Coast of the Island has iron deposits, and among the best are those including Texada Island, this is continued.

The coal and coke produced on the Island are excellent, and a sample of the limestone from Barkley Sound, which was experimented with by Mr. Maccreath, chemist of Pennsylvania, was pronounced by him as the best that ever went through the blast furnace.

Vancouver Island possesses all the raw materials for the making of pig iron, and these are of the best quality. The question then arises as to the best place to manufacture. The ore would cost here \$1.85 a ton. On Puget Sound this is increased by 40 per cent duty, making it \$2.55 a ton. The cost of fuel is about 50 per cent, iron, so that the duty makes an addition of about 80 per cent. per ton on the iron produced.

The market for the iron produced gives a bonus of \$3 a ton on pig iron made in Canada from Canadian ores. A duty of \$4 a ton on pig iron smelted in Canada would be met with on that entering the United States. The difference between the bounty and the duty would be nearly met by the duty imposed upon ores going into the United States, so that the conditions are very nearly equalized with respect to the ore required.

But Vancouver Island has a marked advantage in other ways. Mr. Price thinks, that this is due to the better quality of the fluxes and the coal and coke. Taken altogether he believes the advantage lies on the side of Canada. Then the market would not be altogether with the United States, but a market would be obtained in Japan and China, and in Australia. These markets would still further be increased when a later period steel works were developed.

He thinks that in these markets the Western Canadian producer is ready to be able to compete with the output from the Eastern United States, the Pittsburgh district, Great Britain and Belgium. In the Pittsburgh district the ore has to be brought from Michigan and the midland states, involving the handling of it five or six times. The ore costs them, therefore, \$5 a ton compared with \$1.85 on Vancouver Island. Moreover the cost of other materials is greater than it is here. Charcoal is 9 cents a bushel at Pittsburgh and only 4 cents here. In this latter case it is by the products that the cost can be made for nothing. In England there is constantly arising the increased cost of ores, which have to be brought from Spain and elsewhere. Belgium has been capped on account of the trouble and expense in getting coke. Taken altogether Vancouver Island with all the raw ma-

terials right at hand and at deep water has decided advantages.

At the present time the Pacific coast west of the Rocky mountains consumes about 1,000,000 tons of pig iron a year. This is constantly increasing and affording an excellent market for the product. Mr. Price says that it is a mistaken notion that the magnetite which is found on this coast requires hematite in order to be of any use for smelting. The former may be used alone and makes a first class quality of pig iron. Swedish iron, which has a wide fame, is made from magnetite alone. Of course a little mixture of hematite facilitate the smelting without injuring the quality, but it is not absolutely necessary.

He advocates the putting up of a smelter of about 150 tons capacity a day if coke is used, or if charcoal is to be utilized the capacity might be a little less. This would cost about \$350,000. The by products of the smelter which, with the ovens and fluxes used here, includes a very fine quality of cement, would readily pay the costs of smelting. Such a smelter would produce about 75 tons of cement a day which, according to the current rates on this coast, would give a very large revenue.

Mr. Price sees in the iron and steel industry on the Pacific coast great opportunities along this coast will some day be a great business. The life of steel rails is a comparatively short one. It is necessary now to bring these out from the East and carry the discarded ones back again. This involves a large expense. The rails to be replaced could be readily purchased at an easy rate. Mixed with a small percentage of pig iron new rails could be turned out on a ready market at this end of the trans-continental railways.

When a practical man like Mr. Price turns his attention to this subject can be no doubt of its feasibility. Knowing the conditions as they exist in the Pittsburgh district and the fortunes which have been made there in steel and iron industry, he believes the conditions on Vancouver Island are infinitely better than they are there for this business.

NEXT CONVENTION TO BE HELD IN VICTORIA

Ladies of Macabees Held Interesting Gathering in Vancouver—Address by Mrs. Baxter.

The Victoria delegates to the provincial convention of the Ladies of the Macabees, which was held in Vancouver this week, returned Thursday. The gathering was a very successful meeting. It was decided to hold the next provincial convention in Victoria in May, 1905.

A public reception was held in the city hall Vancouver on Wednesday evening which was largely attended. Mayor McEwen delivered an address of welcome, to which Mrs. Spofford, of Victoria, replied. Other delegates also spoke.

Mrs. Baxter, deputy supreme commander, gave a stirring address. She deprecated the idea that there was any real line dividing American and Canadian, and prophesied that in the very unlikely event of Japan being defeated in the present war, Russia would try to dominate the Pacific coast and that two nations would be drawn together as never before. American and Canadian women were exactly alike, they laughed and sighed and wept alike, she said, because they couldn't help it. She spoke in high praise of the Vancouver press, which had always treated her very kindly, and regretted that she was connected with it. Mrs. McLagan of the World and Mrs. Whitney of the Mount Pleasant Advocate, were not on the platform. She spoke of her acquaintance with Mrs. Hollister, of Port Huron, Mich., supreme commander of the order, and ended with an earnest appeal to all women to come forward and join the order. Mrs. Baxter spoke with power and led down amidst loud applause.

Little Zeils Howe, the remarkable child ecoulist, recited in her imitation of a baby. "How Jimmy wanted the baby," and was loudly encored. Mrs. Spofford on behalf of the Ladies of the Macabees expressed thanks to a hearty vote of thanks to the press done for the order, and Mrs. Griffin, on behalf of the deputy commanders, presented her with a small smelling case, though the contents were not known. Mrs. Baxter said she felt too much taken aback by this unexpected kindness to be able to express her thanks as she should, but they would never know how much they had done for her and she could only say "God bless these women."

Mrs. Williscroft, of Victoria, moved a hearty vote of thanks to the Ladies Macabees of Vancouver for the royal manner in which they had received and entertained this first gathering of the Ladies of the Macabees of British Columbia in their city. The motion was endorsed with a round of applause from the audience. Miss Cook, of Victoria, moved: "That the thanks of the convention be tendered to the press of Vancouver for their generous treatment and full reports of the meetings and for their general services in forwarding the work of the order."

STRIKE RIOTS

One Man Killed and Several Wounded at Callao—Streets Patrolled by Cavalry.

Callao, Peru, May 20.—When the striking dock employees were going toward the dock yesterday, the police interfered and attempted to disperse them. The people arrested one of the strikers and his comrades made an effort to rescue him. A fight ensued in which the police fired over fifty shots which were struck by the crowd. One of the strikers was killed and seven wounded. The police arrested the members of the board of directors of the striking union. The people of Callao were alarmed and business houses are closed. The streets are being constantly patrolled by cavalry.

Harvey Wood, a pattern maker, was fatally injured at Fell's foundry, Ogdenburg, by a bursting pattern block, which crushed his skull.

EXHIBITION WILL OPEN THIS WEEK

INDICATIONS POINT TO SUCCESSFUL EVENT

Ladies Have Converted the Assembly Hall into Striking Scene—Some of the Features.

(From Friday's Daily) Assembly hall presents a scene of great activity to-day. Preparations for the "Made in Canada" Fair, to be held next week under the auspices of the King's Daughters, are in full progress. Already the interior of the hall is being gilded to show the results of the energy and artistic taste of those supervising the arrangement and decoration of the booths. Although as yet only a general idea of the system adopted by the ladies can be gained by inspection, there is no doubt that the method will prove satisfactory. A long stand has been erected and exhibitor and the spectator alike.

In the decorations, flags, bunting and evergreen have been utilized to a considerable extent. Festoons are suspended from the ceiling and ceiling decorations, the walls, and the entrances from the front and rear are being elaborately adorned with appropriate designs. It is in the arrangement of the stalls, however, that the ladies have displayed marked judgment, all available space being utilized in such a way that the exhibits will be shown to the best possible advantage. In the centre of the floor a long stand has been erected and divided into different sections, which are in the form of small but very commodious booths. These are all adorned with red bunting and small flags. The intention is to use this space for outside exhibits exclusively, and every effort will be made to display the goods sent here by outside manufacturers to advantage. Along each side of the hall stalls of different sizes are placed for the purpose of accommodating the many local exhibits, these are, of course, all artistically decorated, and among the firms that will be represented are the following: J. Savannah, T. N. Hibben & Co., North America Soap Co., Nanco, Terry & Co., P. J. Powell, J. H. H. & Co., Fairall, J. Piercy & Co., Brady & Houston, Brackman & Ker, Weller Bros., Toronto Carpet Co., Bancroft & Co., Brown & Cooper, L. & O. Ogilvy, The Mills, Blue Ribbon Tea Co., Martin & Robertson, Gold Dust Co., Turner, Beeton & Co., Enderby Columbia Co.

There will be a number of specially attractive features arranged for the fair. These will include a soda water fountain arranged by Terry & Marrett, at the entrance to the hall, and a billiard table on the grounds adjoining the building, which is being prepared by the local agent of the Blue Ribbon Tea Co. There will be an entrance to this tent from the hall, and all visitors will receive samples of goods. It is understood that there will also be practical cookery demonstrations in progress at all times during the exhibition. Besides these, those who desire a peep into the mysteries of the future will be given an opportunity, as a fortune-teller will be in attendance and signed and wined. The attractions are in course of preparation.

From the official opening, which takes place Monday morning, until the close on Saturday evening, refreshments will be served at moderate prices in the apartment at the rear of the main hall. This is a feature of the exhibition that should by no means be overlooked. Elaborate decorations have been made in the hall, the dominating colors being blue, white and yellow. The former two have been used in a design at the entrance and over the windows, while the latter has been used in shades for innumerable electric lights. Festoons of evergreen and sprigs of cedar complete the adornment of the room, which is a decided credit to those responsible for it.

It is unnecessary, perhaps, to state that the ladies have taken care to provide entertainment for the evenings. Choice programmes have been prepared for every day of the fair, and will be given by the following: Monday, the band of H. M. S. Gratton has been secured to play in the afternoon and evening; Tuesday, a concert of the vocalists and instrumentalists of the Arion Club will give a concert, followed by a serpentine dance by Miss D. Sehl; Thursday (Patriotic Day) appropriate songs, recitations and tableaux will be given; Friday, concert by Fifth Regiment band, and some selections by the Misses Sehl; Saturday, saloons of Esquimaux will give a programme, including musical selections (comic and sentimental), physical, outland and other drills.

Special mention should also be made of the costumes which the young ladies who will have charge of the stalls will assume. These are being prepared by Mrs. Tilton, and will be made to represent as nearly as possible the particular class of goods on exhibition. Thus a young lady attending at a stall advertising fur will probably have attire made from four skins, while the one in charge of the white swan soap booth will have a dress representing swans. This idea will be followed as extensively as possible, and the effect is expected to be most amusing. The ladies who have labored in the preparations for this affair deserve to be complimented upon the success which has so far attended their efforts. All that is needed to make the occasion a memorable one is the support of the general public.

Simultaneous raids on twenty-two alleged pool rooms and pool room extensions were made in New York by the police on Friday. Axes, hammers and crowbars were used at many of the places to batter down specially constructed iron and steel doors and to gain entrance to the rooms. Seventy prisoners were taken and telegraph and telephone instruments were confiscated, besides a number of books and racing charts that were in the rooms.

ANOTHER DEAL

Richard Hall, M. P., Acquires Premises Occupied by His Firm.

Saturday afternoon Richard Hall, M. P., purchased from the Burlington Smith estate, the property on Government street, which for more than a score of years has been occupied by the well-known firm of Hall, Gossel & Co. The building was erected in 1860 for Burlington Smith, who conducted a grocery business in it, the bricks being manufactured at Fox's brick yard.

For a time the upper part of the building was occupied by a newspaper, The Press, and subsequently the Colonist was published there. This was the morning paper's stand until the early eighties, when the old Colonist building was erected further along the street. The sum involved in the purchase is \$250,000, which Mr. Hall points out is actually less than the amount he paid in rent as a tenant. Messrs. Heisterman & Co. were the agents for the property. From a business standpoint the premises are well situated for the accommodation of a firm, and it is expected to avoid any necessity of being compelled to move to quarters less advantageous than Mr. Hall made the purchase.

REGULAR MEETING OF HOSPITAL BOARD

Steps Taken Towards Furnishing the New Strathcona Wing—Monthly Reports Disposed of.

The board of directors of the Jubilee hospital met Thursday evening in the general office of the institution. The matron's report was received. It acknowledged the donation of the following: Miss Fraser, Hannelette following floor; a friend, old linen; a friend's papers and magazines; J. C. Newbury, dahlia plants.

It was resolved to notify the Orick Club that the amount of rent due from them to the board was \$300 on the 1st of June next, and that if the club paid up in full a rebate of \$90 would be allowed. In connection with this some discussion arose with reference to saws and hammers being heard on the cricket grounds on Sundays. This was introduced by Alex. Wilson, who thought it was unseemly and advised the stopping of it.

Other members agreed it was not proper, and favored a better observance of the Lord's Day than this gave evidence of. Dr. Hasell, resident medical superintendent, reporting for the month gave \$87.80, and were paid on June 22. The number of patients treated 137; the total days' stay, 1,638; the total daily average 54.18.

The health committee reported that a range would be required for the Strathcona wing kitchen, and recommended a No. 9 Alkion, which could be supplied with all necessary connections made, for \$87.80, and were paid on June 22. The number of patients treated 137; the total days' stay, 1,638; the total daily average 54.18.

The report of the finance committee was received. The accounts for April amounted to \$1,541.90, and were examined and approved for payment. The salaries for the month amounted to \$87.80, and were paid on June 22. The number of patients treated 137; the total days' stay, 1,638; the total daily average 54.18.

It was decided to require bonds to the amount of \$500 from the secretary. It was pointed out that in the event of loss the board would be liable to insure for failing to safeguard the hospital.

The hospital carpenter, Mr. Sears, applied for an increase in pay. The board expressed a high opinion of Mr. Sears as a workman, but decided not to increase the present salary at present, but to allow him a two weeks' vacation, his pay to continue during the holiday.

The question of Mr. Sears' salary was referred to the Strathcona wing committee for report.

The president and Messrs. Forman and Musgrave were appointed a special committee to undertake the furnishing of the vacant rooms in the Strathcona wing.

After some further business the board adjourned.

FOUND WHAT HE WAS LOOKING FOR

A COMPLETE CURE FOR BLADDER TROUBLES IN DODD'S KIDNEY PILLS.

James Atwell Tried Other Medicines and Bandages—But They Failed—Dodd's Kidney Pills Did It.

Campbellford, Ont., May 20.—(Special)—"I had Lumbago and Bladder Trouble for years. I could get no relief till I tried Dodd's Kidney Pills and they cured me."

This is the statement of James Atwell of this place, and all his neighbors know it to be true. Speaking further of the cure he says: "For five months of the time the pains in my bladder were very severe and in passing my urine would hurt me so as to prevent me from going to my work. I used other pills and got no relief. I used a bandage and got no relief. Dodd's Kidney Pills cured me completely and permanently."

All bladder diseases are caused by disordered secretions. There is just one natural way to cure them—by curing the kidneys with Dodd's Kidney Pills.

EDUCATION AND CHURCH LITERATURE

Subjects Were Discussed at Last Evening's Session of Methodist Conference—University Work.

New Westminster, May 21.—Church literature and educational matters received considerable attention at last evening's sessions of the Methodist conference. It is proposed to take over the Methodist Recorder and make it the official organ. The report of the present publishers was eulogized.

Incidental to the discussion Dr. Whitrow, criticised the authorities for discriminating against Canadian text books, alleging that certain American publications now in use contain sentiments adverse to British institutions. The annual report of Columbia College has been presented. This showed a most successful year, and the authorities are now face to face with the necessity of increasing the accommodation. There was considerable discussion on the policy of an advance on the lines of university work in this province. Dr. Lower, Hall and Rev. H. Eberington, D. D., being the chief speakers.

In the evening the new president, Dr. Sippell, delivered an address on education. Dr. Whittington, superintendent of Indian missions, also spoke and urged the church to become more generous. Superannuated benefits should be extended to laymen, and the church should aim at eventually supplying all the world's needs.

The weather favors the delegates on their eight-night trip this afternoon as the city's guests.

CANADIAN NOTES.

Marrett, Who Killed His Brother, Will Be Sent to Asylum—Mysterious Death.

Calgary, May 19.—Frank Marrett, the young Frenchman who killed his brother at Canmore last Wednesday, was acquitted on the plea of insanity. The evidence was similar to that given at the inquest and the preliminary trials, except that the medical evidence was given for the defence, and was unanimous. The jury was out ten minutes. Marrett will be committed to an insane asylum.

Confession Denied. Regina, May 19.—Norman Mackenzie, accused of Wilcox, denies most positively and emphatically that Wilcox has confessed to the mail robbery.

Bank Clearings. Winnipeg, May 19.—The bank clearings for the week ending May 19th were \$4,825,880; same week 1903, \$3,450,700.

Kicked by Horse. Winnipeg, May 19.—Joseph Pinnick was perhaps fatally injured by being kicked last evening in the head by a runaway horse, fracturing his skull.

Fatally Injured. Winnipeg, May 19.—Henry Heywood died last night from injuries received in elevator D 2, at Fort William, having been caught in a belt and whirled around the shaft. He leaves a wife and family of eight children, who are young. Deceased was a member of the I. O. F.

Caught in Belt. Sherbrooke, May 19.—While working in St. Francis mill at Windsor last week, a workman, Pelletier, and Mr. Henley were drawn into the belt attached to a heavy press and whirled round and round the shaft. Both had their arms torn from their shoulders before they dropped to the floor. Pelletier died a short time after and Henley is not expected to live.

Is Being Investigated. Rat Portage, May 19.—Coroner A. P. John, Indian agent McKenzie and Dr. Hanson returned last night from Dulles, Minn., as a workman, Henley, who was mysteriously surrounded the deaths of an Indian named Jacobs, his wife and two children, who are supposed to have been drowned below Laurier's point, eight miles from town, on the 10th inst. The accident, which is supposed to be due to intoxication, was not reported until yesterday, and has yet only one of the bodies, that of a boy nine years old, has been found. The cause is intact and well filled with provisions. Various circumstances lead to the suspicion that the bodies were thrown overboard.

Head Split Open. Sydney, N. S., May 19.—Mrs. Catherine McDougall is lying in a precarious condition here as a result of having had her head split open last night by Mr. Skinner, who claims that the woman abused him until he could stand it no longer, when he used a hatchet. The wound is of a serious character, and may prove fatal. Skinner is now in jail.

Favor Union. Montreal, May 19.—At a meeting of the district Methodists this morning a resolution was unanimously passed in favor of the union of Presbyterian, Methodist and Congregational churches.

WILL ISSUE DEEDS.

Government Will Grant Number of Type Applications to Test Validity of Claims.

The provisional government after taking into consideration the applications made for lands within the E. & N. belt by settlers is prepared to issue deeds for a number of them. This will be done in a day or two.

There are about one hundred and fifty applicants for lands in the belt. The government has selected several of these to grant deeds. As Dr. Dunsmuir has opposed the act all along, which he contends is nothing more or less than an attempt to take from him his lands and hand them over to those who have no right to them.

Under the act the province bestows the belt of the appeal. In order that the cost connected with it may be kept as low as

The Paterson Shoe Co. Ld. (WHOLESALE AND RETAIL)

Boots and Shoes, Rubber Boots, Etc.

We are the largest exclusive dealers in Boots and Shoes in the province, and carry complete stocks of every description of Boots, Shoes, Rubbers, Rubber Boots, etc., etc., in each of our five large stores. Miners' Footwear a Specialty. All orders promptly and carefully filled. Write for Catalogue to

The Paterson Shoe Co. Ld. VICTORIA, B. C. Branch Stores: Vancouver, B.C.; Nanaimo, B.C.

THE Tyece Copper Co., Ltd.

Purchasers and Smelters of Copper, Gold and Silver Ores.

Smelting Works at LADYSMITH, VANCOUVER ISLAND, B. C. Convenient to E. & N. Ry. or the sea.

CLERMONT LIVINGSTON, THOS. KIDDIE General Manager Smelter Manager.

Oiled Clothing ROYAL BRAND

A large stock of Oiled Coats, Jackets, Pants, Hats and Aprons now in hand.

J. PIERCY & CO., Wholesale Dry Goods VICTORIA, B. C.

The Daily Times Has All the News

NOTICE. Notice is hereby given that thirty days from date I intend making application to the Chief Commissioner of Lands and Works for special license to cut and carry away timber from the following lands, situated in Cariboo district: Commencing at a post on the north side of Mud lake, about five chains from the bank and adjoining the Western Pulp & Lumber Co.'s reserve, thence north 40 chains, thence east 100 chains, thence south 40 chains, thence west following the south bank of Mud lake to point of commencement.

H. O. STEVENS. NOTICE.—We have continued inquiries for Vancouver Island farm lands, and WANTED is for sale write us at once, giving full particulars, and we will sell for you if it can be sold. HASTINGS & CO., Victoria, B. C.

possible, it has been decided to issue what will be regarded as typical ones, so that these may be tested in the courts. If the government will then know just what to do with the remaining applications.

TRADE CONDITIONS. A General Revival at Western and Southern Centres. New York, May 20.—Special dispatches to the International Mercantile Agency describe a general trade revival in work at prominent western and southern centres.

THE WAY TO BE WELL. The Blood Must Be Kept Rich and Pure and the Nerves Strong. Good health is the most precious treasure any man or woman can have. But good health can only be had by keeping the blood rich and pure, and the nerves strong. If the blood is allowed to become weak and watery, the whole system is weakened and falls an easy prey to disease. There is no medicine can equal Dr. Williams' Pink Pills in keeping the blood rich and pure, and the nerves vigorous and strong. Every dose helps to create new blood, and by a fair use of the pills, sickly people are made bright, active and strong. Here is proof. Mr. Robert Lee, New Westminster, B. C., says: "Before I began using Dr. Williams' Pink Pills, my blood was in a very impure state, and as a result pimples that were very itchy, broke out all over my body. My appetite was gone, and I was easily tired. My wife urged me to try Dr. Williams' Pink Pills, and I got half a dozen boxes. By the time I had used them I was completely restored to health, my skin was smooth and clear, and my appetite good."

Dr. Williams' Pink Pills do not purge—they simply make pure, rich blood. That is why they cure such troubles as indigestion, neuritis, rheumatism, anaemia, partial paralysis, St. Vitus dance, scrofula, erysipelas, and the ailments so common to women young and old. Sold by all dealers or sent post paid, at 50 cents a box, or six boxes for \$2.50, by writing the Dr. Williams' Medicine Co., Brockville, Ont.

NOTICE.—We have continued inquiries for Vancouver Island farm lands, and WANTED is for sale write us at once, giving full particulars, and we will sell for you if it can be sold. HASTINGS & CO., Victoria, B. C.

NOTICE. Notice is hereby given that thirty days from date I intend applying to the Chief Commissioner of Lands and Works for permission to purchase 80 acres of land, situated at the southeast corner of the Indian Reserve No. 3 (Delia), thence north 20 chains, thence east 20 chains, thence south 20 chains, following the meanderings of the Bunding river, about 20 chains to point of commencement.

JANE HILL. Hazelton, B. C., February 17th, 1904. FOR SALE.—At Salt Spring Island, 100 acres, some cleared, good fruit and poultry ranch. For particulars address J. Le Jeune, South Salt Spring Island.

Compelled to Russia

St. Petersburg, May 24.—Daily Mail from Yihai said that Foreign Minister received a message from sul at Chetov saying had made a last attack and that in doing so he had killed 50,000 Russian loss is placed, ultimate outcome of the war.
