EDITORIAL NOTES.
During the century now closing more than \$200,000,000 have sought new homes in foreign lands. The greater part of this vast migration has occurred within the past fifty years, and simultaneously a great outward movement of the Chinese has taken place. The western world has had little idea of the actual extent of this outflowing of Chinese, for most of them have been directed to other lands of Asia, and only minor streams of emigration have been directed to North America, Peru and Australia. A noteworthy difference between the masses from Europe and that from China is to be observed. The high tide of European emigration was reached in 1882 and then its volume waned to grow again. In 1882 the outward movement of Chinese was also under full headway, and as far as can be ascertained, the stream has not diminished, but has tended to increase up to the present time. The movement began slowly, but has not lost the impetus it finally gained.

Fifty years ago scarcely one hundred thousand Chinese were living outside of their own country. Thirty years ago the number living in other countries of Asia was estimated at \$50,000. Ten years ago the figures had increased to 6,000,000. Since then the emigration has been larger than ever, though it has dropped to very small proportions in its relation to all except Asiatic countries. Careful inquiries made recently by French officials in view of the growth of Chinese immigration in French Indo-China and other French possessions, and the conclusion was reached that about ten million Chinese are now living in other countries, and over nine millions of them have settled in lands bordering on the China Sea, the Gulf of Bengal and in the East Indies Archipelago.

Wherever they go in Asia, they are as in this country, industrious and law abiding, always quite distinct from the rest of the population, and preserving the customs of their own life and land. In one respect, however, their position differs widely from that which they occupy in America and Australia. They are superior in business ability and energy to the people among whom they live, are absorbing a great deal of the retail and other trade, and are becoming more and more numerous in the enterprises of south Asia as far west as Calcutta. Reclus wrote, years ago, that they had created the prosperity of Singapore, and a German authority recently reported that Chinese immigrants own two-thirds of the real estate in that city, hold positions of influence and honor, and provide some of the most brilliant members of the Council. Most of the coast trade from China to Burmah is in the hands of these immigrants. They form the bulk of the population of Hongkong, the capital of Siam, are found in large numbers in all the coast towns of Burmah, comprise most of the artisans of Java, are a large element in the population of the Legation of Siam, are prominent as retail merchants in the Philippines, 20,000 of them living in Manila, and are the leading factor in French Indo-China.

There are natural difficulties in the way of immigration into a region so densely populated as India; but still there are thousands of Chinese in Calcutta, and a large number of them are doing a very profitable and somewhat monopolized by them. Another significant fact is the large movement of Chinese which has been in progress for some years, from other parts of their own empire, particularly to Manchuria and Mongolia, where they have carried out only enterprise, but wealth, and are developing trade to their own advantage and that of Russia, whose territory marches with these vast domains, and whose railroad is now pushing into Manchuria. On the whole, there is no doubt that the large Chinese immigration to other Asian countries is advancing their development, for, next to the Japanese, the Chinese are the most energetic and energetic of the Asiatic races; and the western world is already reaping material benefits in the growth of the East, and the influx of Chinese in neighboring lands.

IN DUEL WITH THREE BOBS.
Sergeant Mason of the Colonials, did some fine shooting.
Writing of the fighting around Patigier's Drift, Bennett Burleigh, correspondent of the London Daily Telegraph, says—
"Sergeant Mason, a former Glasgow man and Durban hansom cab driver, did some fine shooting. He and other Colonials by adoption are crack shots. While waiting Boers at 1,500 yards range, he changed to turn and saw three creeping up the mountain side upon his left rear. Dropping his sights he bowled one over, then a second across a rock and never stirring, for he was shot through the heart. An instant later he fatally wounded the second, who tumbled headlong down hill. The third caught sight of his helmet and rifle and dodged behind a boulder.
Here a duel ensued between the twin, Sergeant Mason and the Boer. Every time Mason tried to peep round the corner, he was shot at, and the Boer returned the compliment. Five Mauser bullets were put through the Boer's chest, and he fell forward, but leaving him unharmed.
By Jove, you do look nice, my dear," he exclaimed quite enthusiastically. "I'll bet there won't be a word in the book looking half so spry and spry," and he gave her a little old-fashioned kiss.
Mrs. Jobson spent the next few hours like a woman in a dream. The play was over and even made surprising love to her between the acts. After the play they went to the hotel and had Newburg lobsters with

MRS. JOBSON'S GENEROSITY.
At noon the other day Mrs. Jobson received, per messenger boy, a large fragrant bunch of double violets, with Mr. Jobson's calling card attached thereto, and his affectionate felicitations scrawled on the back of the card.
Mrs. Jobson couldn't understand it. She turned the violet upside down and sideways, and studied them from all points of view. Then she scrutinized the card as if it were written in Arabic and the job of translating it was difficult indeed.
"Violet!" said she to herself, wondering. "And from Mr. Jobson! I don't recall how many years it has been since he sent me a bunch of violets."
But she couldn't recall.
"I wonder if there is anything the matter?" she mused. "Violet! And from Mr. Jobson! In his enjoyment of the situation, I've had a perfectly perfect time of it, and I thought I'd lost it, and so I didn't say anything about it to you. Well, seeing how much I've enjoyed it, I thought I'd thought that you were entitled to a good time out of it, anyhow, and—"
Mrs. Jobson's face during this recital was a study.
"I don't know," she said calmly, when Mrs. Jobson had finished her story of the situation, "I've had a perfectly perfect time of it, and I thought I'd lost it, and so I didn't say anything about it to you. Well, seeing how much I've enjoyed it, I thought I'd thought that you were entitled to a good time out of it, anyhow, and—"
Mrs. Jobson's face during this recital was a study.

THE WOMEN OF HUNGARY.
INTERESTING PICTURE OF PEASANT LIFE IN THAT COUNTRY.
No Weddings With Them During the Summer Season—The Home of a Famous Magyar Peasant—A Most Beautiful People.
A correspondent, writing from Szeged, Hungary, presents a very interesting picture of the life of peasants in that country.
To see the Magyar peasants to better advantage, says the writer, we pushed far into the wide of Hungary, and arrived in Veszprém late one afternoon. Before entering the city we were met by a Hungarian farmer, who had arranged to visit some Magyar farms the next day. At 9 o'clock we took our seats in the "city carriage," yellow and brown vehicles drawn by two rough-looking but fast horses, which were urged over the frozen ruts at an uncomfortable speed by the Magyar coachman, who looked very uncomfortable in his black and black horse boots completed their costume. After driving an hour our coachman drove in their horses before a new frame house. Three young peasants stood in the door to welcome us—the owner and two neighbors. The owner had selected this as a typical Magyar farm, and notified the owner of our introduction. Although the message was couched in this most difficult of European languages, it proved effective for while we were drinking our black coffee the mayor was announced. As he spoke no language but Hungarian, he brought with him, an interpreter, an Advocate, who spoke German. Plans were discussed and arrangements made to visit some Magyar farms the next day. At 9 o'clock we took our seats in the "city carriage," yellow and brown vehicles drawn by two rough-looking but fast horses, which were urged over the frozen ruts at an uncomfortable speed by the Magyar coachman, who looked very uncomfortable in his black and black horse boots completed their costume. The owner had selected this as a typical Magyar farm, and notified the owner of our introduction. Although the message was couched in this most difficult of European languages, it proved effective for while we were drinking our black coffee the mayor was announced. As he spoke no language but Hungarian, he brought with him, an interpreter, an Advocate, who spoke German. Plans were discussed and arrangements made to visit some Magyar farms the next day. At 9 o'clock we took our seats in the "city carriage," yellow and brown vehicles drawn by two rough-looking but fast horses, which were urged over the frozen ruts at an uncomfortable speed by the Magyar coachman, who looked very uncomfortable in his black and black horse boots completed their costume. After driving an hour our coachman drove in their horses before a new frame house. Three young peasants stood in the door to welcome us—the owner and two neighbors. The owner had selected this as a typical Magyar farm, and notified the owner of our introduction.
