POWERFUL NEW POISONOUS DRUG.

Lascellus Sott, of England, has r cently published some startling facts about cyanid of cacodyl. It is a white powder, melting at 33 degrees and boiling at 140 legrees, which, when exposed to air, rives off a slight vapor, to inhale whih is death. Its effect s so powerft that Mr. Scott states that he has sen the one-millionth part of a grain of the drug instantly kill four dogs whn they were introduced into an airtist cage with it. While years ago by noted French chemist, Cadet. He cmbined potassium acetate with whis arsenic, producing a fuming liquid, wide of cacodyl. This, when combinedwith cyanogen, a radi-cal of prussic tid, produces cyanid of cacodyl, thousads of times more poionous than th pure prussic acid.

James Reynolds, the secretary of the board of directors, characterized the cutcry against the Sunday opening as absurd. He said that it was "very hard if a men." Mr. Reynolds "did not suppose that those who had signed the petitions had given a cent towards getting the park for the city.
