London Discussing Possibility --Britain Is Now Making Determined Effort to Stamp Out Treason--Scheeper's Death Would Be Terrible Lesson.

Pretoria, Oct. 14—General Methuen, who is operating near Marico, has captured and destroyed great quantities of foodstuffs belonging to the Boers. Commandant. Scheepers, who has been captured by one of General French's columns, was taken in a farm house, where he was lying dangerously ill. His capture is important, as he has proved a thorn in the side of the British for a long time. His commando has led the English on many a wild goose chase since they began their operations in the Cape Colony.

better. I have improved so much that everybody wants to know what medicine I am using. I recommend Peruna to everybody and some have commenced to use it. The folks all say that if Dr. Hartman's medicine cures me it must be great."—JOHN VANCE.

Mr. J. Brake, of Petrolea, Ontario. Canada, writes: "Four years ago I had a severe attack of Bright's Discase, which brought me so low the doctor said nothing more could be done for me. I began to take Peruna and Manalin, and in three months I was a well man, and have continued so ever since."—J. Brake.

At the appearance of the first symptom of kidney trouble, Peruna should be taken. This remedy strikes at once the very root of the disease. It at once relieves the catarrhal kidneys of the stagnant blood, preventing the escape of serum from the blood. Peruna stimulates the kidneys to excrete from the blood the accumulating poison, and thus prevents the convulsions which are sure to follow if the poisons are allowed to remain. It gives great vigor to the heart's action and digestive system, both of which are sure to follow if the poisons are allowed to remain. U. S. Ship Subsidy Bill.

When congress meets next December the scheme for subsidizing certain American ship owners who believe that other wise they cannot clear enough profits to wise they cannot clear enough profits to make it worth their while is to be revived. And the example of France, with her liberal grants of public money to her steamship lines, will be pointed to for the thousandth time. It will be worth remembering at that time that France has gained nothing from her subsidy system after all these years, but, as the Temps confesses, must grant still more bounties to maintain any merchant shipping at all in waters where it cannot pay its own way.—New York World.

New York, Oct. 16—South Africa, writes the London correspondent of the Tribune, is entering upon a phase of total eclipse so far as the newspapers are concerned. Lord Kitchener is military dictator and the country knows what he choses to reveal. If he succeeds with his proclamation of martial law the rebellion will be stamped out in Cape Colony and the Boers, repulsed from the invasion of Natal, will be gradually starved out on their own territory. Much depends on the temper and ability of the Boers respecting reprisals. They will lose the support of their Cape allies unless they can avail themselves of the resources of retaliation. The question is discussed in London and the opinion is expressed that Kitchener and Milner have warted before adopting strenuous measures until the precise moment when Botha, DeWet and Delarey are at the end of their resources and unable to capture British soldiers and retaliate by shooting them in revenge for hanging the Cape farmers and the execution of Lotter. The censorship of news from South Africa, writes the results of drumhead trials nor reprisals which they may invite will be exhibiterating reading for the present year of civilization and grace.

The son of the richest man in the daughter of a wealthy United and the daughter of a wealthy United and the daughter of a wealthy United and the daughter of a wealthy United States senator were married yesterday in Rhode Island in the presence of 1,000 the guests and surrounded by many evidences of the generosity of the bride's father. In spite of the great fortunes of young Mr. Kockefeller and his bride (Miss Aldrich), it is to be expected that their admirable personal qualities will insure their happiness of the great fortunes of the great fortunes of which sometimes are and which sometimes draw husband and wife into closer affection. Unfortunately, they will never know the happiness of those who are forced to begin modestly, to exercise on the precious to them a precious to them as representing mutual self-denial. There are many pleasures of which they will be deprived by their great wealth—such pleasures as remain a happy memory in after years—and they will be burdened with many heavy responsibilities. Only the fact that they are both sensible and amiable and conscientious can insure the degree of happiness in sensible and amiable and conscientious can insure the degree of happiness in their marriage with their friends desire and foresee. It is in spite of and not because of their money that they will be happy. In most of the relations of life great riches may promote high ambitions, but they do not insure success in marriage.—Philadelphia Record.

When Father Rode the Goat. The house is full of arnica

And mystery profound;
We do not dare to run about
Or make the slightest sound;
We leave the big piano shut
And do not strike a note;
The doctor's been here seven times
Since father rode the goat.

He joined the lodge a week ago-Got in at 4 a. m.,

And sixteen brethren brought him home,
Though he says he brought them,
His wrist was sprained and one big rip
Had rent his Sunday coat—
There must have been a lively time
When father rode the goat.

He's resting on the couch today And practising his signs—
The hailing signal, working grip
And other monkeyshines;
He mutters passwords 'neath his breath
And other things he'll quote— They surely had an evening's work
When father rode the goat.

He has a gorgeous uniform,
All gold and red and blue,
A hat with plumes and yellow braid,
And golden badges, too.
But, somehow, when we mention it
He wears a look so grim
We wonder if he rode the goat
Or if the goat rode him.

DETECTIVE HAS A STRONG CASE ACAINST RILL.

Halifax Officer Finds a Motive For Killing of Nathan Kaplan.

WAS MONEY STOLEN?

Asserts That Letter With \$30, Which Victim Was Sending to Bring His Wife to Him Was Appropriated by Rill, and Murder Was to Prevent Discovery.

Halifax, Oct. 15. (Special)—Detective Power, who was at Clark's Harbor investigating the Kaplan murder, returned home tonight. That Rill committed the crime there is not the shadow of a doubt, Power says, and it was done to cover up the theft of \$30. It appears the victim gave Rill on Oct. 2nd a letter to post to his (Kaplan's) brother at Yarmouth containing \$30, which the brother was to forward to Russia to bring out the victim's wife. On the 7th, the date of the murder, Kaplan was writing a letter to his brother asking him if he had received the money and while doing this Rill entered the store and, ascertaining that his crime in stealing the money would be discovered should the letter reach the brother, he decided to kill Kaplan.

The detective, in searching through the prisoner's effects, found the letter without
