ST. JOHN, N. B., MAY 8, 1872.

Proposed Extension of Telegraphic Facilities in the Maritime Provinces.

In the House of Commons Committee on Railways, Canals and Telegraphs, on the 1st inst., an interesting discussion arose over a Bill to permit the Montreal Telegraph Company to extend its lines into Nova Scotia. This Company controls several thousands of miles of wire in Ontario, Quebec and New Brunswick. It is one of the best managed and best paying institutions in the world, while the expenses of its tolls, compared with the extent of territory covered, is unequalled in any quarter of the globe. As stated by Hon. Mr. Holton, this Company forwards messages from Montreal to any of its offices in any part of the Dominion (Nova Scotia only excepted) for the small charge of twenty five cents for ten words, and although the charge from Montreal to St. John is double this amount, the fact is not chargeable to the Montreal Company, which receives only twenty five cents to St. John, while the charge from Montreal to St. John is double this amount, the fact is not chargeable to the Montreal Company, which receives only twenty five cents to St. John, while the charge from Montreal to St. John is double this amount...

OSWEGO, MAY 1.

The Standing Committee on Railways, Canals and Telegraphs met yesterday afternoon, Sir George Carter in the chair. The first order was the consideration of a Bill to extend the powers of the Montreal Telegraph Company. Mr. Holton moved the adoption of the preamble. He said the powers proposed to be given by the bill were of a domestic character, except the power of extending the lines of the Company all over the Dominion. The object of seeking the latter power was to secure the public interest and not merely those of the Company. This would be done by establishing all over the Dominion a uniform rate of telegraphic messages of ten words. As the rate now stood telegraphic messages of ten words were charged at an exclusive monopoly, and not a Canadian, but a foreign monopoly, the Nova Scotia Telegraph Company of the United States, which had leased the wires from the original Nova Scotia Company, the consequence of which was that no message could be transmitted from any of the other Provinces, or over the Atlantic cables to Europe, except at double the rate charged in the Dominion. The practical result was that, while merchants in Montreal or Toronto could send messages of ten words for twenty-five cents over the Montreal Telegraph Company to any part of Ontario, Quebec, New Brunswick, he had to pay fifty cents if he went to any station across the boundary line of Nova Scotia, the monopoly existing in that Province preventing the construction of any communication line of interest to any ground of public interest it was time that such a monopoly should come to an end, and he maintained the right of Parliament to interfere by chartering other companies to operate in Nova Scotia by virtue of a clause in the original Nova Scotia Act in which power was reserved by the Legislature to set aside at any time the exclusive privileges conferred by the Act. He held that the Legislature in which this power rested was the Legislature of Nova Scotia, but in opposition to that view, he held that the Parliament of the Dominion had inherited the power of the Nova Scotia Legislature, and that therefore Parliament had a right to determine whether a monopoly which was opposed to the public interest of the rest of the Dominion, should longer continue or not.

Sir Francis Hicks said the hon. gentleman had not considered the point whether the services performed by the Nova Scotia Company in regard to supplying telegraphic facilities on lines of Government railways, and in outlying parts of the Province where the business was not profitable, was not an equivalent for the exclusive privileges conferred. Mr. Holton said he had not considered this point, because he supposed it would be raised by the other side as an objection to the bill. He did not think there was any force in it, for the interest of a few inhabitants of Nova Scotia could not be held to outweigh the interests of the remainder of the Dominion. Then, with regard to this point, it must be remembered that the Government had already contracted with the Montreal Telegraph Co. to put up wires along the line of the Intercolonial railway, and he did not suppose this arrangement contemplated the prevention of that Company from extending its lines into Nova Scotia, and performing the service there in the same efficient manner it had performed it in this country for the past twenty five years. In any case the effect of this bill would be to release the public from the

in stimulating the members towards the attainment of proficiency must be beneficial, and the gain to society correspondingly great.

The Waterworks system of Water Supply has just received valuable recognition in the Upper Provinces. On the 1st inst., an influential deputation of gentlemen interested in the Welland Canal had an interview with the Hon. Mr. Langford, for the purpose of urging on the Government the adoption of the Waterworks "Litters" to keep up the water supply from Lake Erie. They were introduced to the Minister by Senator Benson and Messrs. Street, Merritt and Thompson, M. P.s. Their request, they were informed, is to be complied with, and the machinery will be erected immediately. The Toronto Mail congratulates Messrs. Waterworks & Co. on this important recognition of the value of their cheap and efficient machinery for raising water, and anticipates that it will receive due consideration in Toronto as in other places where the problem of water supply is before the public.

The Shareholders of the Bank of New Brunswick are to be congratulated on the splendid exhibit of the Bank's condition, made yesterday. There were shown a good dividend, a large "ret." few months ago, and a number of successful management. The President was congratulated by \$5,000 for his services last year, and \$500 was added to the Cashier's salary. The resources of the Bank were shown to be \$4,345,000.

IN AND ABOUT FREDERICTON.

LEMONT'S VARIETY STORE. Lemont's Variety Store is one of the attractions of Fredericton in its waywardness. It is not the most felicitous choice. Adams was the favorite of the New England Party, perhaps because his politics were not very pronounced, and he was a friend of the Government. He was a long-time member of the Administration organs, and the Liberals rather tolerating than approving it, and the Democrats being ever that it is not the most felicitous choice. Adams was the favorite of the New England Party, perhaps because his politics were not very pronounced, and he was a friend of the Government. He was a long-time member of the Administration organs, and the Liberals rather tolerating than approving it, and the Democrats being ever that it is not the most felicitous choice.

LOCALS.

Base Ball. The Mutuals propose having a game of base ball, weather permitting, on the Barrack Green, to-morrow afternoon at 2 o'clock.

New Hotel Building. The new building which Mr. Price is erecting, adjoining the Park Hotel, is rapidly going up. It will be four stories in height and will contain sixty rooms or more. It will form part of the Park Hotel when finished.

Over the Hotel. The flags of England and the United States were hung to the breeze from the flag staffs of the principal hotels yesterday. The American flag will be placed on the flag staff of the fact in engaging quarters.

State of Acadia. A small but lively gathering attended at the meeting of the Acadia Association at the private boxes of the Academy of Music for the three concert nights. There are six boxes, each on each side of the stage, holding about six persons each.

St. Francis of the Sandwich Islands. Mr. Barron—May I be permitted to make a few remarks about the extract from a San Francisco paper which you reproduced in yesterday's issue, as I think the extracts are apt to do damage, in the estimation of those who are in the habit of taking whatever appears in print as gospel, a little thing which, though small and unimportant, is much farther advanced than it is represented to be by your exchange.

A Lady of the Period. The Richmond Enquirer publishes the following receipt to make a woman of the period—Take a half pound of fish and bones—but chiefly bones—wash clean, bore holes in the ears and cut off the small toes, bend the back to conform to the Grecian bend, the Boston dip, the Kangaroo dip, the Santago slope, or the half-roog brook, as the taste inclines; then add three yards of linen, one hundred yards of ruffles, and seventy-one yards of edging, eighteen yards of dimity, one pair silk cotton hose with patent kip attachments, one pair silk of false calves, six yards of fannel, embroidered, one pair of balmoral boots with heels three inches high, four pounds whalebone in strips, seventeen hundred and sixty yards of steel wire, three quarters of a mile of tape, ten pounds of raw cotton or two wire hemphires, a wire basket to hold a bushel of corn, and an old horse with a pair of false hair braided and fringed a la manille, one bundle Japanese switches with rattles, one or nine drops of the "Blessed Balm" or "West End." Stuff the head with hair, and the neck with hair, play billiard wedding cards, some scandal, a great deal of late news, and a very little of the first. This dish will be taken not only on grand occasions, but not suitable for the table of a private family. It is a most valuable article, and causes them to be thrown in if you have them; it is not paste and glue, as some people will say. Whirl all around in a fashionable circle and stay by daylight for six hours.

OUR BOSTON LETTER. The Philosophical Candidate.—A Bohemian at the Equator.—A Consequence.—Moral Reflections. [FROM OUR OWN CORRESPONDENT.] [FOR OUR OWN CORRESPONDENT.] The telegraph has just informed you of the unexpected result of the Cincinnati Convention. The nomination of the Tribune Philosopher was entirely unexpected in this section, where he has been learned to have been an agricultural sage rather than an honest and somewhat eccentric man, than as the most available leader of the great Reform movement. The political press guarded in its utterances concerning the nomination, the Administration organs pretending to view it as a most desirable result, the Liberals rather tolerating than approving it, and the Democrats being ever that it is not the most felicitous choice. Adams was the favorite of the New England Party, perhaps because his politics were not very pronounced, and he was a friend of the Government. He was a long-time member of the Administration organs, and the Liberals rather tolerating than approving it, and the Democrats being ever that it is not the most felicitous choice.

The Turning of the First Sod of the River du Loup Railway

was accomplished yesterday with but little ceremony, in the presence of several hundred spectators. The Company's Directors and several members of the Legislature and leading merchants were present. The sod was removed by Governor Wilton, and Messrs. Boyd, Wedderburn, Hatheway, Fraser, King, Beveridge, Willis, Dow and Needham, all enunciating the importance of the work and wishing it success. Mr. Boyd and Mr. Wedderburn, Mr. Fraser and the Governor appear to have made sensible speeches, the Provincial Secretary and Mr. Needham talked what is vulgarly called "rot." Mr. Willis praised Mr. E. G. Godfrey in the presence of the crowd of St. Mary's opposite Fredericton.

Opening of the Academy of Music—To-night's Grand Concert.

To-night, the graceful structure, the Academy of Music, which in ornamental beauty of appearance, and general richness of exterior and interior, will compare favorably with any of the American opera houses, and which far surpasses anything of the kind in the Dominion of New Brunswick, will be opened to the public by a Grand Concert, which, through the indefatigable exertions of the Messrs. Torres, promises to be one of the best ever given in this city. The instrumental music, in addition to the piano-forte, will be furnished by the Mendelssohn Quintette Club of Boston, without exception the finest artists of the continent. The performances of this Club are alone musical treat of rare merit. Among the soloists will be Mrs. J. W. Weston, Soprano; Boston; Mrs. G. H. Perley, Soprano; St. John; Mrs. J. A. Crowell, Soprano; Bangor; Mrs. E. T. Wasgett, Contralto; Bangor; Mr. James West, Tenor; Boston; Mr. G. W. Sumner, Pianist; Bangor; Mrs. F. S. Dovey, Pianist; Bangor; and there will be a full chorus of the most eminent singers of Bangor, St. John, and Fredericton. Mr. H. O. Barnabas, the popular Boston singer, was expected to be present, but last evening it was learned that it would be impossible for him to attend. Addresses will be made by Rev. S. P. Fay and Judge Godfrey of Bangor; and Dr. Keator, President of the Academy Company; of course, these will be short and appropriate. Last evening and this morning the attendance of citizens and gentlemen of Bangor having turned out in large force. The arrangements for seats have been prepared carefully, and all the seats are numbered. Tickets and plans of the seats are at the stores of E. Peile & Bro., Prince Wm. street, and T. H. Hall, King street, and at the box office of the Academy. The interior of the building lit up last evening presented a brilliant appearance, and justified the fondest hopes of its shareholders and admirers.

Bishop's Opera House

The audience at the Opera House last night was a rare one, the comfort and elegance of the establishment, and the interesting and respectable class of ladies and gentlemen. The programme was the same as on the first night, with the exception of a comic song by Wheeler in place of the improvement. A varied and attractive bill of songs, dances, jokes and burlesques will be presented to-night.

The Prison of the Sandwich Islands.

Mr. Barron—May I be permitted to make a few remarks about the extract from a San Francisco paper which you reproduced in yesterday's issue, as I think the extracts are apt to do damage, in the estimation of those who are in the habit of taking whatever appears in print as gospel, a little thing which, though small and unimportant, is much farther advanced than it is represented to be by your exchange.
