

which want has hitherto been supplied by select private schools.

There are five or six stores in Windsor ; a post office, railway station, and several mills. A house of worship belonging to the Presbyterians is located about two and a half miles below Windsor mills, where a clergyman from Melbourne holds service once in two weeks, and religious meetings are held in a school house near that point, each intervening Sabbath. The Methodist missionaries on Melbourne circuit hold meetings in school houses near the mills and on the opposite side of the river, each Sabbath alternately ; and it is in contemplation to build a church edifice at the mills.

About one mile back from where Windsor Brook falls into the St. Francis, powder mills have been built and are in successful operation. The powder made here is in general use for mining purposes, and the works will probably be enlarged in time.

But far the most important of the industrial works erected here, is the new paper mill, which forms a manufactory complete in itself. As the pulp mill above mentioned was designed to supply the paper mill at Sherbrooke, another of the same kind is included in the new establishment. One of the principal buildings is 175 feet in length by about 88 in width, and is three stories high ; another is 128 feet in length, by 60 in width ; one is 90 by 60 feet ; another 60 by 40 ; and others still of smaller dimensions. One of the tall chimneys is about 90 feet in height ; the other about 70 feet. These buildings are of brick, and are so connected as to form
