

and warm clothing in cold weather. The medicines promote absorption of the stricture, and render the urine bland and unirritating and the bowels soluble. Beef-tea is the only diet or drink that is to be allowed during a paroxysm. By observing this advice in regard to diet and bathing, the skin will be stimulated, and thus aid our medicines, by throwing off a proportion of offending matter in the blood.

N. B.—Hot-water baths, in all chronic, skin, and syphilitic cases, we recommend as a great help to our medicines. Taken twice per week. R. & Co.

INFLAMMATION OF THE BLADDER.

DR. RADWAY & Co.—SIRS: I have been using your RESOLVENT and for some time with great success for the inflammation of the bladder. I have tried all the medical skill in the country, but to no avail; my water was by times slimy, then again bloody; the catheter would have to be applied four and five times a day, sometimes oftener. I am seventy-two years old. I used two bottles of your RESOLVENT with the PILLS, and find great relief; in fact, I think it will cure me. Some of your medicines can be had; the druggists are out of your RESOLVENT, and I thought it best to order for it myself. Inclosed you will find \$5.00. Please send the RESOLVENT by express to Bedford, Pa.

Respectfully yours,
MICHAEL A. STRAUB.

WEST END, BEDFORD CO., PA., March, 1870.

PAIN IN THE KIDNEYS CURED.

PLEASANT GROVE, OLMSTED CO., MINN., April 29 1874.

DR. RADWAY—SIR: Having used your medicines for the cure of my disease, viz.: constant pain in my kidneys, I can safely state that they were the sole cause of my relief, and eventually restored me to sound health, all other medicines advertised by others having failed to do so.

Yours respectfully,
DAVID OVEREND, Sr.

A Republication of Good Advice.

Try it To-Night.—“*You will Sleep Well and be Better in the Morning.*” You have caught cold? another cough; can't raise the phlegm; irritation of the throat; a heavy pressure on one of the lungs; breath short; if you could only raise up that matter that sticks so tight, you would feel easy; a sharp pain every once in a while troubles you near the heart and sometimes pains in the shoulders and back. As soon as you lie down you have a fit of coughing; this is the experience of thousands at this minute. Now for relief, prompt, quick, immediate relief and assistance: Take at once a dessert-spoonful of SARPAPARILLIAN RESOLVENT; ah, yes, the obstinate phlegm is loosened; good! that is right, up with it, it relieves you; well, you feel much easier; now, then, rub the chest well for five minutes with RADWAY'S READY RELIEF; very good; the skin becomes reddened; you begin to perspire freely, and the soreness and pain are gone; now rub the back and shoulders with READY RELIEF a few minutes; pain gone; good! you feel like sleeping; very well, take twenty drops of READY RELIEF in some water—pleasant, stimulating and tonic; now take six of RADWAY'S PILLS—then go to sleep. Morning;—you look fresh, pleasant; no cough; have had a good, thorough operation, feel like eating a good hearty breakfast; no more cold, no sore throat or difficult expectoration. This treatment is simple, and sure to cure the worst colds between bed-time and breakfast. Try it to-night, all who have a cough, from catching cold. Obstinate chronic coughs will in a few days be cured by this treatment.

Consumptives Look to It.—New lungs cannot be made, but the SARPAPARILLIAN RESOLVENT will stop the decay and waste now going on, and repair the waste with new material made from pure, strong blood. It will stop your cough, give you strength, and keep you alive.

The sick may offend in a slender diet, and thereby grow worse.

Winter is the greatest enemy to old, and summer to young people.

In pregnancy a fine complexion indicates a male foetus, the contrary, a female.
