

CREAM BY MACHINERY.

DeLaval's Cream Separator

3,000 IN USE IN EUROPE AND AMERICA.

Ameliaburg, O.,
May 29th, 1884.

Mr. Frank Wilson :-
Dear Sir—We got the Laval Separator ready on Saturday, and used it that evening. We have run it every morning this week. We run thro' ten to twelve hundred pounds of milk in about one hour and twenty minutes to one hour and thirty minutes.

We are pleased with it; it more than meets our expectations. We can discount any record you have given in any of your descriptive catalogues or circulars—do more milk per hour and get more butter from same quantity of cream. We are sure that we are taking over 25 per cent. more butter from the milk than we ever got by setting Cooley process. There is no use talking about the old slow and uncertain process, this is a sure thing and it is only a matter of short time when setting milk for cream will be looked upon as out of the question.

Will send you actual record of this week's work as soon as possible. Yours truly,
JOHN SPRAGUE.

Sunny Side Stook Farm,
Stanstead, P.Q., June 17, '84.

Mr. Frank Wilson :-
Dear Sir—The Separator is running very nicely, separating the cream from the milk as thoroughly as ever was done by cold water setting, and saving the labor of clearing a large number of cans. It is run part of the time by a boy of 15 years old and he has no trouble in managing it. The cream is always sweet and clean. Yours truly,
G. A. PIERCE.

Bloomfield, Ont.,
Sept. 3rd, 1884.

Mr. Frank Wilson :-
Dear Sir,—I am running the two DeLaval Cream Separators purchased from you with perfect satisfaction, one has been in operation fifty and the other thirty days. The Separators set as close together as the bottoms will let them and one driving belt runs both machines. One hand can attend them both and the engine easily. I would not attempt to make butter without them. The quality is pronounced by all to be the best butter they ever used. Yours truly,
L. V. BOWERMAN.

Stockwell, Canada,
October 14th 1884.

Frank Wilson, Gen. Man.:
Dear Sir—After a thorough test of the De Laval Cream Separator, I have no hesitation in saying it will do all you claim for it, and have much pleasure in recommending it to the dairymen of Canada. Yours very truly,
WM. SAUNDERS

The Judges of the great English Dairy Fair, just held in London, have made a report of an exhaustive comparative test between the DE LAVAL and DANISH machines resulting in favor of the DE LAVAL on every point covered by a Cream Separator. They give it the highest recommendation for superiority in construction, operation and results that any implement has ever received, and their endorsement clinches the evidence of the great merits and advantages of this most useful of all dairy appliances. They state that no butter-maker can afford to be without one. They say, also: "In regard to the essential points of construction, separation, temperature and quality of cream, and analysis of cream, the De Laval was far ahead of its opponents, and quite deserved the GOLD MEDAL given by the Council. The power of raising the skim milk after separation to a lighter level seemed to entitle the large A Danish to a second prize, but the failure to separate the milk satisfactorily debarred the other Danish machine from any further recognition."
