of troubling the public with fresh offers. Perhaps there will | Poor at Mile End. After thirty-four days of court proceedbe no great rush of new ventures or new offers until the later autumn.

## Business Men Taking in Sail.

Trade is depressed not because the current volume is particularly small but because instead of expansion there is contraction. So far as may be seen, business is bigger now than in 1906 but business men are taking in sail. General profits are low but with rising copper, an improving demand in cotton and cheaper coal rather better results are hoped for.

Limited companies continue to show a rising birth ratethere were 5,265 registered last year. italization is still decreasing, and of those formed not more than 7 per cent. issue prospectuses to the public. The comptroller notes as unfavorable to healthy affairs a growing disposition to trade on debenture capital only. Acquaintance has been made lately with various financial

Acquaintance has been made latery with various financial matters that are not right. Note some of the allegations made against the bubble-trading in foreign premium bonds. Some "bonds" sold are said to be Panama Bonds which are long out of date and worthless. Some are stated to bear fictitious numbers and false names. Where the bonds themselves have been genuine Continental securities, the prices paid for them have ranged from 100 to 300 per cent. above the market. Strange bonds and unknown bond dealers may profitably be looked at very carefully before purchases are made.

## Exit This "Bank."

Feltham's "Bank " which previously had been shown to exist for the convenience of the bond-dealing concern called the International Securities Corporation is being compul-sorily wound up. Feltham appears to have been the maiden name of the wife of Henry Bebro (alias Benson). There is no Feltham, and Mr. Justice Eve is positive that the concern was not a bank. But believing the business to be a regular one numerous poor people sent it money. For the cure of civic corruption there is no treatment

more hopeful than that administered to ten Guardians of the

ings, costing £12,000, all the accused lose the right of citizen-ship for seven years. One who had been thrice Mayor of Stepney goes for two years of hard labour and is to pay £250. A justice of the peace is condemned for one year and to pay the same sum. Seven are fined  $\pounds 25$  each and sent to hard labour for terms between six and fifteen months. Not only the wicked tremble before such wrath. Municipal officers are beginning to regard even innocent relations with contractors in a new and serious light.

An early effect of the Old Age Pensions Bill is noted. The Great Central Railway has let it be known that if this Bill passes its private pension scheme will be much curtailed. Other companies may follow suit and transfer this burden to the taxpayer. In that case the demand for higher pensions at earlier ages will certainly lose none of its insistence. Manchester and Montreal.

The three steamers on the Manchester-Montreal and Quebec service are to be made into six, and a regular weekly departure is being arranged. The steamship company-Quebec service are to be made into six, and a regular weekly departure is being arranged. The steamship company— Manchester Liners, Limited—are influenced by the knowledge that the grain crop is exceptionally good. There are Man-chester interests also which seek to do a larger proportion of the apple trade. As England's largest market for butter, and as one of the largest for bacon and cheese, Manchester is likely to gain a good deal from improved direct connection and Canada must gain with it. and Canada must gain with it.

A story comes from New York that a prominent Wall Street house has taken out a policy for \$100,000 with Lloyd's of London on the life of Judge William H. Taft to insure them against loss in case of Mr. Taft's death within a year. The rate was 5 per cent. City Treasurer Coady of Toronto says that the payment

of taxes has become so systematized that the large revenue is collected with ease and satisfaction to all parties concerned. The amount received on the first instalment this week, \$2,675,000, is the record.
