

EXPERIENCE: THE BEST ASSET WE HAVE

Away back there, forty years or more
ago, the

INGERSOLL-RAND

commenced the manufacture of

ROCK DRILLING MACHINERY

Since then they have evolved and developed drills for every class of rock excavation. They have been the pioneers of rock-drilling for over two score years, and each year's experience fits them better for giving the consumer more reliable service.

The Ingersoll-Rand line of drills embraces a tool just adapted to every class of work from plug and feather tools to the large heavy traction type of deep hole machines. From this enormous range of sizes, types and designs there is sure to be some machine perfectly adapted to your particular work. The whole range of drills and the Company's experience are at your service.
