THE SMART YOUNG MAN.

He Played a Trick on His Girl, but She Get Even.

One day a smart young man got a long piece of ribbon paper out of a stock ticker and wrote a lotter on it to his girl. As he wrote he rolled the paper up so that the outside of the roll contained the closing remarks of the letter, which were:

"Of course you will not repeat what I have told you in this letter about Helen. It was given to me in strictest confidence, and I wouldn't think of telling any one except your to me in strictest confidence, and I wouldn't think of telling any one except your will make the beat most bothersome letter are the term and wind it up again, starting at the end. But she could find nothing in it about Helen, although she read it twice very carefully and looked along the back from one end to the other. And it was a most bothersome letter to read.

She brooded over that letter several days planning her revenge. At length she came to a decision. She got a large square piece of cardboard and started her letter in the very center of it, writing in an ever widening circle. Her very first sentence was: "Dear Jack: If you persevere in reading this letter, you will find in it something you greasly what to know. Mining engineers agree that the limit to which shafts may be sunk into the earth with the present machinery and equipments is 10,000 feek. The deepest shaft ever dug is the one now in existence in one of the copper mines on Lake Superior. It has a sheer depth of 5,000 feek. Dr. A. C. Lane, the assistant geologist for Michigan, in an article in Mineral Industry on "How Deep Can We Miner" places the probable limit at 10,000 feet. He seek, however, that enormously rich deposits might lead man to dig to 18,000 feet with profit. The element of danger is not considered in these calculations. In conclusion, he says, "The present knowledge cannot foresee reaching a depth of 20,0%0 feet." How Deep We May Dig.

AVERY'S ROCK. The Ningara Falls Tragedy Whiel Gave the Spot Its Name. A few men still live about Niagara

which gave a name to Avery's rock, a
point usually of interest to the tourist.
On Friday, July 19, 1883, Joseph Avery,
a German, was on the river above the
cataracts in a small skiff with a companion. In some way they lost control of
their boat, and it went over the falls with
Avery's companion. Avery himself times Avery's companion. Avery himself jumped or fell out and succeeded in clinging to a log which had become jammed against a rock not far above the brink of the falls.

a log which had become jammed against a rock not far above the brink of the falls. It was evening when this happened, and Avery passed the night on the log, having made himself more secure by tying himself to it with a piece of stout cord which he had in his pocket.

In the fhorning the man was seen, and thousands quickly gathered on the shores. A high placard was held up where it could be seen by Avery, on which, in gigantic lotters, had been printed the words, "We will save you."

All day the people on shore strove to make their word good. Many devices were tried in vain. One boat was let down into the current by ropes, but this was swamped immediately. Another followed, but the lines became hopelessly entangled in the rocks, and it had to be abandoned. In the afternoon a raft was sent down, but the raft stuck fast in the rocks. There seemed no way in which Avery could be reached, and meanwhile his strength was fast failing.

At last, held securely by ropes, a boat

reacted, and meanwhile his strength was fast falling.

At last, held securely by ropes, a boat ventured out to him, guided by a daring navigator, who had almost reached the log when Avery, who had unlashed himself and was eagerly awaiting a chance to spring into the boat, jumped for it; but, being weak from hunger and terror, he missed his clutch, fell into the swift current and in an instant was swent over the

THOUGHT HE WAS A MARSHAL

Hand Over Mr. Field's Name.

For years Marshall Field has had an ardent admirer in Professor Johnnie Hand, the musician, and Johnnie has fistered himself that Mr. Field has entertained a most friendly feeling for him. Whenever Mr. Field chanced to be at a function where Johnnie led the music, he always smiled as he passed the band leader and add pleasantly, "How do you do, professor?" and the professor, beaming most delightedly, always made a profound salute and replied, "How do you do, marshall" Johnnie noticed on numerous cocasions thas Mr. Field's fitends looked astonished when the courtesies were exchanged and that Mr. Field always smiled. But he supposed it was due to surprise at inding

"To be sure," replied the professor.
"But, good heavens, man, you called him by his first name!"
"First name!" gasped the astonished bandmaster. "First name! I t'ought it vas his teetle!"
His friend laughed long and loudly, but Johnnie's misery was sad to behold. He refused to be comforted, and went home figuring out how he could apology from his friend, the professor, who explained how he had become mixed between a first name and a title. In due course of time a reply reached Johnnie. It was kind in the oxtreme. In it Mr. Field asked that Johnnie continue to address him as Marthe extreme. Was Too Conscientious For This Wicked, Wicked World. This is a French story—of Louis Blanc, who, as the world knows, was the most uncompromising man in the world and the most conscientious. He spent about half his life in prison because he would say what he thought was right, regardless of consequences to himself. In one of the brief intervals when he was out of prison, and when his popularity ran high, a paper, l'Homme Libre, was started for him. He was made the sole responsible head of it. One day he took the paper up as soon as it came out, and his eye happened to fall on a conspicuous advertisement, which read thus:

"The best pills are X——'s pills."
