

GENERAL DEBILITY FOLLOWING INFLUENZA

Strength Can Only Be Regained by Enriching the Blood.

Following a wide-spread epidemic of influenza, general debility is on the increase, and its effects may be noticed in the worn, listless appearance of so many of the men and women you meet.

For all such run-down conditions, sufferers should at once begin to make thin blood rich and red with Dr. Williams' Pink Pills.

CROOK MAKES BIG CLEAN-UP

It was in the good old ante-bellum days that gay Paree was the Mecca of wealthy victims, and the Parisian shopkeepers spotted an American as he landed in the great continental capital.

One day a loud-voiced, smooth-shaven, chubby-faced, innocent-looking customer entered one of the leading jewelry stores in Paris, and pompously producing a card bearing the name of a well-known Chicago millionaire...

The jeweler bowed assent, too full of the vision of the great profits he expected to glean to waste his breath in mere words.

The selection was going on, when, suddenly, the husband and the jeweler were interrupted by a female voice, with an American nasal swang, sharply calling from the stairway: "Amos, are you there? Where are you?"

"My wife's voice!" exclaimed the startled husband. "Here," hurriedly whispered the husband, "hide the jewels. That's right, tumble them into the bag. Now, where can we hide them?"

A cabinet stood at one end of the apartment. It was open, and the jewels were lying on a table at the other end. That, also, was locked. A little secretaire stood close to the door, against the wall, and the jeweler was about to open it.

The jeweler, listening, heard the husband say: "Ah, my love, is that you? Come along. I have something to tell you."

The jeweler patiently waited for the Chicago Crook to return. Half an hour passed. An hour rolled around. Then the jeweler got impatient. He started to ring for the servant to inform the Chicago gentleman that someone was still waiting for him in the drawing-room.

He could find no bell. He opened the door and looked out. He could see no one. He called. No one answered. Then he returned to his chair and sat down to think.

"These American swells are an eccentric and forgetful lot," said he. "I guess I'll take my private call and see if I can't get the secretaire."

He went to the secretaire. The lid was locked. He got excited and, grasping a poker, smashed the lock.

Heaven! The secretaire was empty! The jewel bag had disappeared. He thrust in his arm. It went right through the back of it. He thrust in the poker. It went right through the wall. He tried to pull away the secretaire. It was fastened to the wall.

Then he rushed out of the room and discovered at the back of the wall a large hole, from which the paper had recently been burst.

It was through this hole the bag had been thrust when the wife came downstairs, and when the husband joined her she had as readily secured the bag, and by the time the jeweler had discovered his loss the swindlers had fled with \$100,000 worth of precious stones.

So far as known, the jeweler is still hunting for the "Chicago millionaire," who, however, was not an American at all, but a Jew named Jacob.

The jeweler and his wife had a surprise. It had been carefully planned by the husband. But it was not for the wife, but for the jeweler.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children.

PROVES BIBLE. Parallel Between Germany and Fall of Man.

The world war has brought to the of Bible illustrations of the truth of Bible doctrines as usually interpreted by what is called the old theology.

Take, for example, the fall of man as recounted in Genesis. Some have had difficulty with this fundamental doctrine of the Bible.

But, Doctor, think how irrational is the theory that man fell in a garden, just created by an all-wise and all-powerful God!

I replied by pointing out the very interesting fact that modern Germany also fell in a garden. There was not a country upon the earth more blest and prosperous than Germany.

When the Day Is Over When the household cares and the worries of everyday life have dragged you down, made you unhappy, and there is nothing in life but headache, backache and worry, turn to the right prescription, one gotten up by Dr. Pierce fifty years ago.

Everything growing out of the ground seems intended for some use in establishing natural conditions. Dr. Pierce, of Buffalo, N. Y., long since found out what is naturally best for women's diseases.

He learned it all through treating thousands of cases. The result of his studies was a medicine called Doctor Pierce's Favorite Prescription. This medicine is made of vegetable growths that nature surely intended for backache, headache, weakening pains, irregularities, inflammations, and for the many disorders common to women in all ages of life.

Dr. Pierce's Favorite Prescription is made of lady's slipper root, black cohosh root, unicorn root, blue cohosh root and Oregon grape root. Dr. Pierce knew, when he first made this standard medicine, that whiskey and morphine are injurious, and so he has always kept them out of his remedies.

Women who take this standard remedy know that in Dr. Pierce's Favorite Prescription they are getting a safe woman's tonic so good that druggists everywhere sell it, in liquid or tablet form.

LONDON FROM AIRSHIP. Metropolis Described as City of Enchantment.

London, seen from an airplane, lay in a golden bowl of misty sunshine, the vast circle framed in the blue-gray of the horizon.

It was obviously a day for the open air, and it seemed the best way of celebrating the first sunny day of the year to take to the air. At Chickweed, Lieut. Carruthers—they call him the royal pilot there, for he has taken up the prince of Wales and many other royalties—was just glancing over a big Handley-Page, and looking to be away from camp in a few minutes.

Most machines try across the ground before they leave it; a Handley-Page waunders ungraceful as a swan till she gathers speed and the jolting over the rough ground gives place to a gentle gliding, as your body glides through still water after a plunge. You are off.

Then if you look in-board, there is little sensation, and unless you watch a needle creep round a dial, ticking off each thousand feet you climb, you might be still sitting peacefully on the earth. In the rush of air the roar of the engines and the thrash of the propellers have drowned down to a gentle spring song. But look over the side and—London has gone!

Instead, you are passing over little cardboard models of houses, red-roofed to mark Golders Green and Hampstead, and a slaty-gray, with curious shades of purple, the nose of the machine swinging toward the town. Near Paas would sit

Joy this, for we are over a city that has not grown up—a city where the sunshine and spring-time have brought tiny people out of doors to play with toy trains and creep to and fro in tiny motor cars or fatigues coaches drawn by busy ants.

As the sun has passed over London at 5,000 feet on a sunny day, you do not know the golden haze, jeweled here and there with emeralds and occasional splashes of silver.

Earthmen may speak of St. Paul's and the white spires of churches, of the park and the little lakes; but the airman knows London as a tapestry of wondrous beauty, a gayly colored city of enchantment.—The Daily Chronicle.

No matter how deep-rooted the corn or wheat may be, it must yield to Holloway's Corn Cure if used as directed.

"One Man in His Time." Brimful of strange adventures was the life of James W. Rucroft, 49, of King Edward's Horse, as it was described, when he was charged at Lancaster, England, with breaking into a shop at Morecambe and stealing jewelry valued at £778. He said that he had:

Served in the South African War. Been a good miner and prospector in Klondike and Alaska. Traded as a copra merchant in the South Sea Islands.

Been a beachcomber in British Guiana. Worked on the Panama Canal. Fought under President Castro in Mexico.

Was in the Boxer riots in China. In Jamaica at the time of the great earthquake in 1907.

Worked on the Trans-Siberian Railway. Assisted to quell the Sinn Fein rising in Ireland.

Fought in France and was severely wounded. Following the shop-breaking which was done while he was on a sick leave, he sent valuable presents to his sister, gave rings to nurses at Colchester Hospital and other people in the town.

When arrested he had still £200 worth in his possession, and he helped the police to recover an additional £190 worth.

Sentence of twelve months' hard labor was passed upon him.

As a vermicide there is no preparation that equals Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Where Wood is Money. Who ever heard of wooden money? The only known currency of this kind is issued by the Hudson, Bay Company, and circulates all over the vast territory controlled by that powerful trading concern.

It is a coinage consisting of pieces of wood known as "castors," which are stamped with a die. These are accepted everywhere in that territory as cash, and are exchangeable for all sorts of supplies and commodities.

ties of the widely scattered stations of the corporation. The area governed by the company is vast. In one straight line it extends as far as from London to Mecca; from King's Posts to the Pelly Banks is further than from Paris to Sarmacand. Over all of this region the corporation exercises a complete dominion, employing the native Indians, chiefly Ojibway and Cree, to collect the furs which furnish its revenue.

Hudson Bay is about two-thirds the size of the Gulf of Mexico. It is an almost landlocked sea, with 3,000 miles of coast line. More than 300 years ago Hendrik Hudson, trying to find the north-west passage, wintered there. His crew mutinied and set him afloat in an open boat with his son and seven others. He and his companions were never seen again.

The unit of value in that part of the world is beaver skin. Two martens are equal to one beaver, and twenty muskrats are equivalent to one marten. The trapping is done in winter, and in spring the Indians bring the pelts to the stations, receiving in payment for them wooden money. With the latter they buy what supplies they need at the store maintained by the company at the stations.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very inmost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

A World's Record. What is said to be the world's record production of marketable potatoes on one acre—49,531 pounds, or 825 bushels—has been made on an acre of land near Kanab, in the southeastern section of Utah, a few miles from the Arizona state line.

The record yield was made in response to a competition fostered by the Mormon church, and the church authorities drew a check for \$1,000 payable to a representative of Kanab ward of the Kanab stake of the church, which is responsible for the production. This yield is certified to by more than 50 farmers.

Dr. Martel's Female Pills For Women's Ailments. A Scientifically Prepared Remedy, recommended by physicians, and sold for nearly fifty years for Delayed and Painful Menstruation, Nervousness, Dizziness, Backache, Constipation and other Women's Ills. Accept no other. At your druggist, or by mail direct from our Canadian agents, Lyman Bros. & Co., Ltd., Toronto, Can., upon receipt of price, \$2.

At the Turn of the Road. Where the rough road turns and the valley sweet, Smiles bright with balm and bloom, We'll forget the thorns that have pierced the feet. And the nights with their grief and gloom, And the sky will smile and the stars will beam, And we'll lay us down in the light to dream.

We shall lay us down in the bloom and light, With a prayer and a tear for rest, As tired children who creep at night To the love of a mother's breast; And for all the grief of the stormy past, Rest shall be sweeter at last, at last.

Sweeter because of the weary way, And the lonesome night and long, While the darkness drifts to the perfect day, With its splendor of light and song— The light that shall bless us and kiss and love us, And sprinkle the roses of heaven above us.

A New Landmark. A new landmark will shortly appear above the trees of Kew Gardens, near London. Already there is of course the famous Pagoda, but a new landmark will rise many feet into the air above the Pagoda. It is the giant flagstaff, weighing 18 tons, and 215 feet long, presented by the British Columbian Government to Kew Gardens some four years ago. Arriving in London by the R. M. S. P. in December, 1915, it was afterwards towed up the river to Kew, and is now about to be erected by Canadians in the gardens. Its first use, so it is said, will probably be that of flying the Flag of Victory and Peace in the forthcoming peace celebrations.

Spanking Doesn't Cure! Don't think children can be cured of bed-wetting by spanking them. The trouble is constitutional, the child cannot help it. I will send you any mother my successful home treatment, with full instructions. If your children trouble you in this way, send no money, but write me today. My treatment is highly recommended to adults troubled with urine difficulties by day or night. Write for free trial treatment.

Mrs. M. Summers WINDSOR, Ontario Box 8.

Worth Knowing. Canned fruit and vegetables should be taken from the can an hour before using, turned into a bowl and put where there is fresh air. Careful experiments made by the National Canners' Association show that the modern sanitary can cannot harm food even when open. However, turning the contents of the can into another dish and exposing it to the air oxidizes and thereby freshens the contents.

MURINE Night Morning Keep Your Eyes Clean - Clear and Healthy

Write for Free Eye Care Book Murine Co., Chicago, U.S.A.

New Guinea

New Guinea, had it determined its sovereign powers itself, might be said to have "played both ends against the middle" with a vengeance; for it was divided among Britain, Germany and neutral Holland.

This island the largest in the world, if Australia be ranked as a continent, and in many respects the most primitive, furnishes one of the perplexing problems before the Peace Conference.

Conditions in New Guinea, in the period before the war, are described in the following communications from Thomas Earbourn.

New Guinea, the last great area remaining in the tropics which is still almost completely unknown, has a peculiar charm for the naturalist.

Lying between the Equator and Queensland, Australia, its length is about 1,420 miles and its maximum breadth is 430 miles. Its area is greater than that of Borneo, being about 300,000 square miles. Practically it is divided into three parts.

The lower coast borders the Torres Straits (form British Papua as it is now called). The eastern coast as far as 140 degrees 47 minutes east longitude, goes to make up Dutch New Guinea, or German New Guinea. In both of these districts there are a considerable number of white settlements and mission stations; and mining and copra farming are carried on. The great western region of New Guinea is Dutch territory, and it is in this region that we are dealing especially.

It is in this region of white folk which gives this land an added interest, for here the native may be seen in his primitive simplicity. With such a bewildering variety of human types among the Papuan tribes, each speaking its own language, the ethnologist has a field, one which is certainly unexcelled.

In coming to Papua from Malasia it is the sudden contrast in the people which makes the most startling impression on one's mind. The Malay, grave, reserved, and dignified, is unlike his New Guinea neighbor as a Chinaman is unlike a European. These islanders are a happy, boisterous lot until some little thing of suddenness, when they at once become sullen and treacherous; but as we had no occasion to cross them, we got along admirably.

The pure Papuan is very dark brown, usually a well-built, thick-set man of medium height. Occasional individuals are almost white, and are said to be of European descent. They are strongly marked Negritoid characters. These probably represent inhabitants of the region, as were the Negritos in the Philippines. Out on the Pacific coast toward German territory the human type is markedly different. Here in carrying across we meet people who have characteristics of other island groups of the eastward, for there probably has been accidental colonization along this shore.

From Wau it is a short journey to Jobi Island, another of the group which lies in the mouth of Geelvink Bay. The people here vary little in appearance from the other Papuans of the region, but their manners and customs differ much from village to village. Indeed, while this island is hardly larger than Long Island, New York, eleven mutually unintelligible languages are spoken on it. Many feuds exist, and when our ship came to anchor in Pom Bay, canoes full of natives, some smoke and which had come from neighboring harbors did not spend the night even close to the ship, because their occupants were afraid of the people of Pom.

The raiding canoes of Pom were enormous affairs, with bows decorated with intricate carvings, in elaborate designs, and with wooden heads which were made to look like real ones, by having enormous mops made of cassowary feathers stuck in them.

THE JOY STICK. Canadian Ace of Aces Describes How a Plane is Operated.

In a "Talk on Aerial Tactics," which appeared in the publication "National Service," Canada's famous Ace of Aces, Col. William A. Bishop, V.C., D.S.O., M.C., D.F.C., describes some effective methods employed in aerial fighting.

"To those who have never seen a war machine," says Col. Bishop, "I would explain that to control one the pilot has to manipulate but a single lever, which we call the 'joy stick.' It is very much like the lever with which you shift gears on an automobile, but it moves in four directions. If you should want your machine to go down, the instinctive move would be to lean the body forward. Therefore, the fighting airplane is so rigged that when the pilot pushes the 'joy stick' forward the nose of the machine points down. In the same way if he pulls the 'joy stick' back the nose of the machine goes up and the machine climbs at the angle he wants it to. In turning it is necessary that the machine be not banked too much. This is one of the first things a pupil is taught when learning to fly. The 'joy stick' also controls the banking. By moving it to either side you can tilt up whichever wing is desired. At his feet the pilot has a rudder bar which controls the horizontal direction of the machine. If he pushes his left foot forward and banks slightly, the machine turns slowly to the left. To go to the right there is only necessary a push with the right foot and a slight bank. The pilot thus has both feet on the rudder bar, holds the 'joy stick' with his right hand and with the left controls the engine of the machine by holding the throttle. He is always able to do

anything he wishes either with the engine or the machine itself. When firing the gun he simply proves his thumb slightly along the 'joy stick' and presses the lever which pulls the trigger. To be able to fight well a pilot must have absolute control over his machine; he must know by the 'feel' of it exactly how the machine is, what position it is in and how it is flying, so that he may manoeuvre rapidly and at the same time reach his opponent or opponents. He must be able to loop, turn his machine over on its back, and do other flying 'stunts.' Not that these are actually necessary during a combat, but from the fact that he has done these things

several times he gets absolute confidence, and when the fight comes along he is not worrying about how the machine will act. He can devote all his time to fighting the other fellow, control of his machine coming instinctively. Thus the actual flying, although perhaps the hardest to train a man for, is the least important factor in aerial fighting. A man's flying ability may be perfect. He may be able to control the machine and handle it better than anyone, but if he gets into a fight, risking his life many times, perhaps, to gain the right position for a 'good shot' and then fails to hit the mark, he is useless.

If he is unable to bring his opponent down he must further hazard his life in order to get out and away from the enemy. For this reason I consider aerial gunnery the most important factor in fighting in the air.

Tactics are next in importance, because of the proper use of the right tactics it is easy to eliminate risks and also to put the enemy at a great disadvantage. Surprise is always to be striven for, because if you can surprise the enemy and get into the proper position to shoot before he is aware of your presence it simplifies matters tremendously, and there should be no second part to the fight."

An Easy Pill to Take.—Some persons have repugnance to pills because of their nauseating taste. Parlee's Vegetable Pills are so prepared as to make them agreeable to the most fastidious. The most delicate can take them without feeling the revulsion that follows the taking of ordinary pills. This is one reason for the popularity of these celebrated pills, but the main reason is their high tonical quality as a medicine for the stomach.

Just for the Baby. Have you seen the "don't kiss me" necklaces? They are of satin ribbons with white medallions and the sensible inscription so that all who would kiss may read.

And among the warm, new knitted things to keep him comfortable this winter, there are mittens and socks, of course, caps and gaiters and legging, as well as afghans for his "pram." The new brush and comb sets are the cunningest things imaginable. One set has tiny military brushes! Some have just the comb and soap boxes, too. They are all in the imitation white ivory, and daintily boxed.

More practical than the satin covered, coat hangers are those of painted wood—quaint little figures which may be washed with soap and water when they are soiled.

Films to Replace Books. Motion pictures will take the place of textbooks in schools and colleges, according to Thomas A. Edison, in an interview recently. "The only textbooks needed will be for the teacher's own use," declares the inventor of the motion picture camera. "A great film library of educational and industrial subjects should be built up in Washington. Then these films could be issued on the rental system to all institutions in the United States, even to the most remote rural schoolhouses, and the system could be so operated that it would pay its own way." Asserting that "anything which can be taught to the ear can be taught better to the eye," Mr. Edison continued: "The moving object on the screen, the closest possible approximation to reality, is almost the same as bringing that object itself before the child or taking the child to that object. Film teaching will be done without any books whatsoever. The

only textbooks needed will be for the teacher's own use. The films will serve as guide posts to these teacher instruction books, not the books as guides to the films." By making every class room and every assembly hall a movie show, 100 per cent. attendance will be assured, Mr. Edison says. "Why, you won't be able to keep boys and girls away from school then."

"I understand your cook left your house." "Not all of it," said Mr. Cumrox. "We had to put a mortgage on it to meet her requirements as to wages."—Washington Star.
