DOINGS AT THE MINERS' STRIKE. Steam Shovel Digging Coal Out of Heap at No. Two.

Militia Department's Reply to Mayor Douglas.

Conditions in the Several Militia Camps.

Glace Bay, N. S., July 15 .- Another increase in the output from the banks and collieries was claimed by the coal company to-day. An extra steam shovel is now at work, digging the coal out of big heap of a quarter of a million tons lying at Dominion No. 2, and with this augmentation of their forces the this augmentation of their forces the company stated to-night that the ton-nage secured from the banks would be probably six or seven hundred tons greater to-day than yesterday. They also anticipated an increase of several hundred tons from the collieries. They claim that about 100 more men came to work to-day at the various mines, and state that there will likely be a much larger increase in the number who turn up in the next few days. If their infor-mation as to the temper of the men is correct, they say they are almost up in the next few days. If their infor-mation as to the temper of the men is correct, they say they are almost certain that there will be much larger numbers than hitherto at work within a very short time now. The United Mine Workers' officers still claim that the company are not getting one-half of the tomage that they claim, and members of that union declare among other things, that tubb

declare, among other things, that tubs are being brought to the surface empty in some of the collieries in order to vey the impression to those outside fence that things are booming

MORE ARRESTS.

There were few new developments during the day. Some more arrests were made during the day for intimida-tion, and Mayor Douglas received an answer from the Militia Department, in response to his last telegram regarding who should appoint the magistrates to ontrol the movements of the troops. control the movements of the troops. The Militia Department politely inform-ed his worship that the troops having been called out at the request of the civil authorities, they have nothing more to do with the matter, which is about tantamount to an invitation to his wor-ship to please ring off and not cause any more departmental expenditure for tele-craphic pile. It is likely howyone that set illustrated contains four different styles of Dutch collars, a turn down collar and cuff. The pattern is cut in three sizes for ladies and missea. It is likely, however, that his worship will have some more comunication on the matter vet

Shipments at the International piers in Sydney were very good to-day the company report, they stating to over six thousand tons were sent thro the chutes.

TRAINING FOR THE TROOPS. Glace Bay, N. S., July 15.—One good result of the calling of the troops to Glace Bay has been that the five hun-

dired men of the Halfax garrison now doing duty here are receiving a training that they would not get under other cir-cumstances apart from actual war. It has been a succession of night patrol duty. At the different collieries strong detachments are continuously on duty detachments are continuously on after dark, and as much zeal has thrown into the work as if a hostil force were assailing Glace Bay. Th force is split up into a number of small garrisons. At headquarters on Table Head, the main body, about 250 in num ber, are encamped. At Dominion No. 6 Head, the main body, about 250 in num-ber, are encamped. At Dominion No. 6, the most isolated of all the mines, there is a strong detachment of infantry. The fifty engineers garrison Dominion No. 3; at Caledonia there is a detachment of fifty artillerymen, and another detach-ment of twenty, five mon is stationed at ment of twenty-five men is stationed at Bridgeport. At Domimion No. 1 there is an infantry garrison, and all the rest of the troops are at the headquarters, from which the guards for Dominion No. 2 and Dominion No. 7 are supplied. Between 5 and 7 o'clock strong guards are placed on all the roads leading to the various pits. For two hours they march up and down the streets, sluring which time the men who are working come to the various mines, and again in the afternoon they are turned out in case of any demonstration as the men nent of twenty-five men is stationed at case of any demonstration as the case of any demonstration as the men leave the pits. Although everything has been absolutely quiet since they arrived on the scene, there has been no relaxa-tion in the vigilance of the officers in charge, and they are taking the oppor-tunity to put the men through a stiff course of training. Harry Laing, Walter Laing, William Laws, Wallace Leslie, James Linklater, Robert Logan, Harry Loudea, Leo ents, for the proportion of successes generally is smaller than for a good many years. In Hamilton a somewhat remarkable condition prevails-the boys have done very much better than the girls. In all about 640 wrote on the examinations in this city, and only 420 passed. This is less than two-thirds-65.7 per cent. to be exact.

Among the boys the proportion of those who succeeded was not so very far behind the average, being 75 per cent, but the girls did badly, only 201 out of 343 passing, an average of 58.5 per cent.

The pass standard was the same this year as last, and the number of examinations the same. Among the candidates it was noticed at the time the examinations were being held that they seemed Mills, William Minnes, Hadley to think the arithmetic and geography papers were particularly hard, and som of the examiners thought so, too. That might account, in a measure, for the

CALLED "LIAR." British Commons Shocked by an Unseemly Incident.

London, July 14 .- The House of Commons, the tempers of whose members have been sorely tried by the frequent all-night sessions, was thrown into an uproar by a scene between Earl Winter-ton and William James Thorne, a Labor member. Earl Winterton, replying to an interruption from the Labor benches, remarked that Thorne was unfit to take part in the debate. Thorne replied by awayne that he was a scher as any mem-

part in the debate. Thorne replied by saying that he was as sober as any mem-ber of the House, and concluded by ex-claiming: "I call him the complete liar that he is." Thorne left the House, and invited Earl Winterton to follow. The latter apologized, but Thorne refused to withdraw his remark, and was sus-conded pended

"Hypocrisy," said Dr. Pankhurst at a farewell dinner in New York-he was about to leave for Europe—"hypocrisy is often not hypocrisy at all. We all have bad in us. Well, if we hide that badness, it's a sign that our goodness preponderates over it. Yet, the short-sighted, detecting something of bad in good men, dub them hypocrites. "The sincere and honorable, these shortsighted people think, must always slow their worst side. But surely that would be a foolish thing to do. "Take, for example, the inscriptions on our tombs.
