

SAANICH EXHIBITION LARGER THAN EVER

Annual Show Opened Yesterday With Record Exhibits in Number and Quality

(From Friday's Daily)

Better, larger and more numerous exhibits are being shown at this year's fall exhibition of the North and South Saanich Agricultural Society, the forty-first consecutive exhibition given by this enterprising association since its inception. Yesterday was the first day of the show, but was devoted wholly to getting the exhibits into place and the judging thereof. The exhibits will not be put in until today when the show will be under full swing. As usual the Saanich fair always proved a success for Victorians and it is expected that there will be a large number from the city in attendance while judging from the keen interest manifested by the residents of the municipality there will be an exceptionally large attendance from the surrounding districts. It is no doubt but that this year's attendance will be the largest on record and even as it is the directors expect a record showing in the matter of admissions.

In fact this year's exceptionally large number of exhibits improved the directors with the absolute necessity of replacing the present agricultural hall, which has done service since 1873, with a larger and more up-to-date building. Every available inch of space in the present building has been used and still there is not room enough for the exhibits. The part of the root exhibits being shown in the dining hall in the building. The excellence of the exhibits is far ahead of previous years and in fact the products of this banner district, so well represented at the recent provincial fair here, have acquired an enviable name throughout the province.

High Quality Fruit

The fruit exhibit was without doubt the most important of all. For high quality, variety and appearance the fruits displayed are fully equal to those shown at the other provincial fairs. Apples of the highest quality, pears which would take honors at any fair and other fruit in abundance are on exhibition. The show was made by Stewart Bros., who captured the silver cup presented by J. Percy, president of the society, for the best exhibit of fruit, and of Tanager Bros., who captured the special prize offered by R. Layritz, and also the silver cup given by Mrs. Birch for the best five boxes of apples, of five varieties, is exceptionally good. The display comes from the absolute property of Stewart Brothers, who have won this trophy twice in succession. In addition the firm won the special prize of the judges for the best exhibit of fruit, this year is the first that there has been any competition in the commercial classes for apples and the array of twenty boxes of Pippin, King's, Belle de Boskoop, Canada Reinette, and other varieties and Yellow Bellefleur varieties would undoubtedly have carried off prizes at any fair however strict might be the judge. The individual exhibits of fruit are also remarkable for their quality. One noticeable feature of the fruit exhibits is the great care taken in the packing and that a youth, W. W. Strong, aged 14, could win the special prize given by Skene Lowe for the best packed box of apples by a boy under 17, indicates that the attention being paid by growers to this most important part of the fruit raising industry is being well repaid. The firm's strong exhibit would do credit to any adult, and the judge, K. Streetfield, was out in his praise, as indeed he was of all.

Root Exhibits

The exhibition of roots is also a most extensive and representative one and here again the quality is of the highest order reflecting the great productivity of the district, the size and appearance of the entries being exceptional. J. W. Grant, who has won many prizes at the recent Victoria show heads the list taking the Chalender & Mitchell cup for the best collection of roots and also the prize for the best collection of vegetables and novelties not mentioned in the catalogue. The best individual exhibits are also remarkably fine.

In the ladies' work department the exhibit is much larger than in former years and the quality of workmanship is high. The exhibit includes dresses, cushions, shawls, embroidery on silk, and a host of other handsome articles worthy of the name. The two judges, Mrs. Birch and Mrs. Puckle, had the greatest difficulty in picking the winners, and as judges in the flower plant and exhibit, both ladies remarked on the excellence of the various entries and the evident care with which they had been prepared. The exhibit was a variety of color and never having been equalled at any previous show of the society. A number of ladies were flowing with the dainties in the way of bread, cake, pies and jams, made by the ladies of the district is also a feature, and Garret Smith, a most appetizing task as he sampled the various exhibits and adjudged their merits.

Dance Abandoned

For the first time in many years the directors have been forced to cancel the dance which was to follow the annual event. Owing to the fact that it will be well impossible to clear the hall of the exhibits for this event and also because of the fact that no adequate train service can be secured to take the visitors back to the city in the evening, this great social event, one always looked forward to with delight, has had to be cancelled. It is probable that the dance may be held in about a week's time but nothing definite has been arranged so far in this regard. It has also been found impossible to serve meals from the grounds, but the directors have arranged with the proprietor of the Fairlie hotel to serve meals to the fair visitors.

Today the judging of the horses, cattle, sheep, swine, poultry, grain and dairy products will be in progress. The judges are as follows: Fruit, K. Streetfield; vegetables and sweet and fodder corn, William Noble; ladies' work, Mrs. Birch and Mrs. Puckle; bread, pastry and cake, Garret Smith; grain, D. R. Ker; dairy products, Anson Knight; horses, W. Hodson, live stock commissioner; cattle, Watson Clark; sheep and swine, Major Muttter; poultry, Harry Field.

Excellent exhibits in the live stock classes are promised, among them being George Santer's fine horses, C. H. Gillan's famous herd of Holsteins, J. Bryce's and A. Munro's heavy draught horses and Haldon Bros' prize winning sheep. Keen competition is looked for in the bar-

ness horses and single turnouts. The officers of the society this year are: J. W. Grant, honorary president; William Thompson; president, H. E. Tanner; vice-president, J. T. Harrison; secretary-treasurer, Fred Turgoose; directors, M. Dean, Geo. Stewart, J. S. Shopland, L. C. Hagan, E. R. John, A. Rey, W. R. Armstrong, R. B. Fowke, H. F. Haldon and J. W. Brethour.

REPORTS ARE RECEIVED FROM THE WARDENS

So Far Loss By Timber Fires Appears to Be Less Despite Dry Season

(From Friday's Daily)

The final reports of the fire wardens are beginning to come in, and those from the coast district are most encouraging. In his covering letter to the chief commissioner of lands and works, W. C. Gladwin, chief fire warden, writes that the season has been a very successful one, and that the amount of damage done by fire during the past season in the districts under his supervision, does not exceed the amount reported for the previous season. The report of the interior indicates considerably more fire than on the coast. The report of the interior indicates considerably more fire than on the coast. Train for Business

Most men train their brains and almost entirely neglect their bodies. They do not seem to realize that the keenness of judgment and clearness of thought depend as much on the body as on the brain itself. Any man can prove this to his own satisfaction by attempting to decide a weighty business problem while suffering with an acute attack of indigestion or a violent spell of biliousness.

The amount of work that the brain can do depends much on the healthfulness of liver, bowels, kidneys and skin. "Fruit-a-tives" are fruit juices in tablet form. They act directly on liver, bowels, kidneys and skin, and enable these vital organs to rid the system of all impurities. Thus the blood will be kept pure and rich, the brain active, digestion sound and life made pleasant.

"Fruit-a-tives" are now put up in two sizes, the new 25c box as well as the regular 50c size. If your dealer does not carry them, write Fruit-a-tives, Limited, Ottawa.

From the Warden's

The amount of work that the brain can do depends much on the healthfulness of liver, bowels, kidneys and skin. "Fruit-a-tives" are fruit juices in tablet form. They act directly on liver, bowels, kidneys and skin, and enable these vital organs to rid the system of all impurities. Thus the blood will be kept pure and rich, the brain active, digestion sound and life made pleasant.

"Fruit-a-tives" are now put up in two sizes, the new 25c box as well as the regular 50c size. If your dealer does not carry them, write Fruit-a-tives, Limited, Ottawa.
