

A remarkable incident is reported by Mason City, Iowa, physicians. An infant born in the hospital in that city is said to have called "mother" a few minutes after birth. The enunciation was so clear that attending physicians and nurses were amazed. Yes, it was a girl baby.

#### How does your Subscription stand?

**Poultry Increase Income.**  
Produce infertile eggs by removing the roosters from the flock in the summer time.  
Provide clean nests and keep eggs clean.  
Gather the eggs twice daily during the summer, to prevent them from being heated by the hen.  
Keep them in a cool dry place away from the flies.  
Market them at least twice each week.  
Insist that they be bought on a quality basis.  
Producers are admonished not to wash eggs.

#### SUCCESS AND FAILURE

##### In Raising Young Pigs for Real Profit.

Pithy Paragraphs Full of Facts About Feeding Them—Fertilizers for Fall Wheat—Pregnant Ewes Require the Best of Care.

(Contributed by Ontario Department of Agriculture, Toronto.)

Causes of failure and success in the feeding of young pigs are pointed out in the following article:  
**Causes of Failure in Feeding Young Pigs.**

1. No one on hand to see that everything is right when pigs are born.
2. Excess of fat in mother's milk.
3. Cold, damp, uncomfortable quarters.
4. Intestinal parasites.
5. Shortage of sweet skim milk at weaning time.
6. Ration out of balance.
7. Ration composed of unsuitable grains.
8. Lack of mineral matter in food.
9. Housing conditions unsuitable.
10. Diseases—hog cholera, etc.
11. Neglect to alter male pigs at proper time.
12. Neglect to supply ample feed for proper development, regularly.
13. Working with poor stock.
14. Treating the pig as a general scavenger.

##### Success in Feeding Young Pigs.

1. Mother's milk normal.
2. Clean, dry, bright, comfortable quarters.
3. Practice of disease preventive measures.
4. Ample yard room, protection from hot sun and flies.
5. Ample clean drinking water and wallow, during hot weather.
6. Mineral matter and conditions supplied during winter when on the soil conditions are not available.
7. Working with well-bred, vigorous stock.
8. Ample supply of green forage, such as alfalfa, red clover, sweet clover, rape and blue grass.—L. Stevenson, Sec. Dept. of Agriculture, Toronto.

##### Fertilizers for Fall Wheat.

Fall wheat must have a strong well-rooted plant to withstand the winter. To insure this there should be an abundance of all kinds of available plant food in the soil. The two constituents the wheat plant has the greatest difficulty in getting out of the soil are nitrogen and phosphorus. If the land has been manured and summer fallowed, or, if a clover sod has been ploughed down there will probably be no need of purchasing a further supply of nitrogen and an application of acid phosphate alone will probably be sufficient. If, on the other hand, the wheat is to follow oats, or if there is any fear that the plants will not develop a good top, then some form of readily available nitrogenous fertilizer may be used to advantage.

Cereal crops have little difficulty in getting their supply of potash, consequently it will rarely pay to purchase a fertilizer containing this constituent for application on the land to be sown to wheat.  
The Department of Chemistry at the Ontario Agricultural College has found that an application of from 200 to 400 pounds of acid phosphate and 100 pounds of ammonium sulphate per acre has very much increased the yield of wheat on the clay soils predominating in the Niagara Peninsula and in the area lying along the north shore of Lake Erie. It is probable, however, that when the soil contains a good supply of organic nitrogen, enough to furnish sufficient nitrogen, the ammonium sulphate may be omitted.—Chemistry Dept., O. A. College, Guelph.

##### Pregnant Ewes Need Best of Feed and Care.

Lambing time is perhaps the most important season of the year for the shepherd. A successful lambing period helps to make a successful sheep year. It then behooves every shepherd to have as high a percentage of strong, healthy lambs as possible. The lambs, and perhaps here and there a ewe, that he will save by good feed and care will amply repay him.

If the ewes are to lamb before going on pasture they should receive some grain about one month before lambing. This insures a good flow of milk. Oats and wheat bran, either half and half or two parts of oats and one of bran, which is lower in price, should be fed. One-half pound a day of this mixture for each ewe should prove sufficient.

It is also very important that succulent feeds, such as corn silage or roots, be given pregnant ewes. These keep the bowels in good condition and serve as general tonics and regulators. The weight of the wool can also be increased by feeding good succulence. All winter long each ewe should receive daily from two to two and one-half pounds. After lambing this amount can be increased. It should be remembered that no frozen silage or roots should be fed to sheep. Either is very dangerous. The flock should be supplied with pure, fresh water at all times and barrel salt should be placed within their reach so that they can get it at will.

## The Ladies' Fashion Shoppe

TAYLOR BLOCK

WATFORD

NOW is the right time to buy,  
and here's where to buy it.

Greatest values at lowest possible prices. The variety of colors, styles, and sizes make it possible to make an easy selection from our large stock.

### COATS

in Bolivia, valeur, lovetto cloth and Beaver cloth. Some fur collars and cuffs, others without, in the much wanted Burberry styles. Some belted, others loose back styles at prices ranging from

\$14.75 to \$34.50

### DRESSES

carefully designed in all the popular shades in canton crepes, valette, satins, silks, polairette, twill, tricotine and serges. Priced from

\$14.25 up

### BLOUSES

in graceful styles and attractive colorings, making a charming effect, prices at

\$4.50 to \$8.50

### SKIRTS

In Homespun, punell cloth, tricotines and serges. A large variety to choose from.

## Winsome Soap

Here is reached the very pinnacle of achievement in toilet Soaps. Never have the world famous Vinolia Laboratories created a soap of which they are more proud than of this—the pure, white, dainty free lathering Winsome.

Only the very choicest coconut and palm oils from our own plantations are used.

And not only absolutely pure—but prepared after years of study of the water and climate conditions all over Canada—with a view of giving to Canadian women a soap made scientifically and exclusively for them.

Make a lather in warm water with 'Winsome' Soap. Use both hands and gently massage every inch of the face and neck, work the fingers into the skin and take a little time to it. Then rinse thoroughly and dry with a soft towel. If your skin is naturally dry, use a little Vinolia Vanishing Cream before you wash, and a little after. If your skin is naturally oily, wash in warm water, but always rinse in cold.

Keep this up daily and neither rouges nor powder, rough winds nor hot sun, can injure your skin. 'Winsome' Soap "treatment" will make it naturally robust and glowing with color and beauty.

**Siddall Drug Co.**

W.L. McCrae & Co.

NO MATTER what kind of a Stove you will need for this Winter, whether Kitchen Range or Living-room Heater, McCrae's Stoves will satisfy your every want. We have a big assortment of the most popular styles in stock, marked at lowest prices and ready for your inspection. If you find it necessary to buy a new stove of any kind this fall, we advise placing your order without delay—the demand far exceeds the supply this year and sometimes deliveries are somewhat slower than usual.

This is the time of the year for Electric Toasters. We have them—guaranteed of course—in Deluxe and Hotpoint. Drop in and get yours today!

Electric Heater \$8.00 Deluxe \$4.25 Hotpoint \$5.50
